*History of Linguistics, Volume IV* Anna Morpurgo Davies, Giulio C. Lepschy, 2016-04-15 The History of Linguistics to be published in five volumes aims to provide the reader with an authoritative and comprehensive account of the attitudes to language prevailing in different civilizations and in different periods by examining the very varied development of linguistic thought in the specific social cultural and religious contexts involved Issues discussed include the place of language in education variation and prestige and approaches to lexical and grammatical description The authors of the individual chapters are specialists who have analysed the primary sources and produced original syntheses by exploring the linguistic

interests and assumptions of particular cultures in their own terms without seeking to reinterpret them as contributions towards the development of contemporary western conceptions of linguistic science In Volume IV Nineteenth Century Linguistics Anna Morpurgo Davies shows how linguistics came into its own as an independent discipline separated from philosophical and literary studies and enjoyed a unique intellectual and institutional success tied to the research ethos of the new universities until it became a model for other humanistic subjects which aimed at scientific status The linguistics of the nineteenth century abandons earlier theoretical discussions in favour of a more empirical and historical approach using new methods to compare languages and to investigate their history The great achievement of this period is the demonstration that languages such as Sanskrit Latin and English are related and derive from a parent language which is not attested but can be reconstructed This book discusses in detail the theories developed and the individual findings obtained In contrast with earlier historiographical trends it denies that the new approach originated entirely from German Romanticism and highlights a form of continuity with the eighteenth century while stressing that a deliberate break took place round the 1830s By the end of the century the results of comparative and historical linguistics had been generally accepted but it soon became clear that a historical approach could not by itself solve all questions that it raised At this point the new interest in description and theory which characterizes the twentieth century began to gain prominence

bibliography of Rask should enable the linguist of today to obtain a fairly rounded picture of this important 19th century scholar who together with Bopp and Grimm has justly been ranked among the founding fathers of the comparative historical study of Indo European languages Rasmus Kristian Rask 1787-1832 did not occupy himself with historical linguistics alone as a comparativist but also with language as a system based on a notion of structure comprised of three key ideas the idea of wholeness the idea of transformation derivation and composition and the idea of self regulation He formulated theoretical and practical premises for the composition of grammars and in this he was far ahead of his time and in closer proximity to the linguistic concerns and problems of our era From both theoretical and pedagogical points of view Rask's grammar of Icelandic remains a most remarkable work *The Letter Liveth* Joan Leopold, 1983 Recently there has been increased appreciation of the fact that August Friedrich Pott 1802-1887 possessed valuable insights and articulated uncommon positions in Indo European comparative linguistics general linguistics and linguistic ethnology This introduction and accompanying bibliography and catalogue aim to provide additional access routes to Pott's career by chronicling his life works and library collection **Western Histories of Linguistic Thought** E.F.K. Koerner, 1978-01-01 The present bibliography suggests that there has been a constant flow of publications which survey the discipline of linguistics in its various stages of development It attempts to offer a comprehensive coverage of general accounts of the history of linguistic thought in the western world over the last 150 years *American Indian and Indoeuropean Studies* Kathryn Klar, Margaret Langdon, Shirley Silver, 2011-11-30 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing *Essay on the Principles of Translation (3rd rev. ed., 1813)* Alexander Fraser Tytler, 1978-01-01 This is a reprint of the third edition of Tytler's Principles of Translation originally published in 1791 and this edition was published in 1813 The ideas of Tytler can give inspiration to modern TS scholars particularly his open mindedness on quality assessment and his ideas on linguistic and cultural aspects in translations which are illustrated with many examples In the Introduction Jeffrey Huntsman sets Alexander Fraser Tytler Lord Woodhouselee and his ideas in a historical context As the original preface states It will serve to demonstrate that the Art of Translation is of more dignity and importance than has generally been imagined p ix
