Fools Mad A History Of The Insane In Ireland:

Medicine, Disease and the State in Ireland, 1650-1940 Greta Jones, Elizabeth Malcolm, 1999 A pioneering collection of essays aiming to open up the previously neglected area of the social history of medicine in Ireland **Fools and Mad: a History of the Insane in Ireland** Joseph Robins, 1990 **The Cost of Insanity in Nineteenth-Century Ireland** Alice Mauger, 2017-12-21 This open access book is the first comparative study of public voluntary and private asylums in nineteenth century Ireland Examining nine institutions it explores whether concepts of social class and status and the emergence of a strong middle class informed interactions between gender religion identity and insanity It questions whether medical and lay explanations of mental illness and its causes and patient experiences were influenced by these concepts The strong emphasis on land and its interconnectedness with notions of class identity and respectability in Ireland lends a particularly interesting dimension The book interrogates the popular notion that relatives were routinely locked away to be deprived of land or inheritance querying how often land grabbing Irish families really abused the asylum system for their personal economic gain The book will be of interest to scholars of nineteenth century Ireland and the history of psychiatry and medicine in Britain and Ireland **Social Work in Ireland** Noreen Kearney, Caroline Skehill, 2005 *In Search of Madness* Brendan Kelly, 2022-04-14 Who is Mad Who is Not And Who Decides In this fascinating new exploration of mental illness Professor Brendan Kelly examines madness in history and how we have responded to it over the centuries We travel from the psychiatric institutions of modern India to scientific studies of the brain in Victorian England We discover the beginnings of formal asylum care and witness the experimental therapies of the cavernous psychiatric hospitals of the nineteenth and early twentieth centuries in Ireland England Belgium Italy Germany and the United States Covering lobotomy and the Nazis Aktion T4 campaign as well as Freud psychoanalysis cognitive behavioural therapy and neuroscience *In Search of Madness* examines the shift in recent times from psychobabble to neurobabble This is an all encompassing history of one of the most basic fears to haunt the human psyche madness and it concludes with a passionate manifesto for change four proposals to make mental health services more effective accessible and just *Irish Insanity* Damien Brennan, 2013-08-15 The national public asylum system in Ireland was established during the early nineteenth century and continued to operate up to the close of the twentieth century These asylums mental hospitals were a significant physical and social feature of Irish communities They were used intensively and provided a convenient form of institutional intervention to manage a host of social problems *Irish Insanity* identifies the long term trends in institutional residency through the development of a detailed empirical data set based on an analysis of original copies of the reports of Inspector of Asylums Mental Hospitals in Ireland Damien Brennan explores core social and historical features linked to this data including the political context governance and social policy the relationship between church and state changing economic structures and social deprivation professionalization legislation and systems of admission and discharge categorisation and diagnostic criteria international

developments family dynamics This book demonstrates that the actual rate of asylum utilisation in Ireland was the highest by international standards but challenges the idea that an epidemic of Irish insanity actually existed Offering a historical and sociological insight into an institutional legacy that is unusual within the international context this book will be of particular relevance and interest to scholars within the fields of sociology criminology law history Irish studies social policy anthropology nursing and medicine *Social change and everyday life in Ireland, 1850-1922* Caitriona Clear, 2013-07-19 Men and women who were born grew up and died in Ireland between 1850 and 1922 made decisions to train to emigrate to stay at home to marry to stay single to stay at school based on the knowledge and resources they had at the time This the first comprehensive social history of Ireland for the years 1850 1922 to appear since 1981 tries to understand that knowledge and to discuss those resources for men and women at all social levels on the island as a whole Original research particularly on extreme poverty and public health is supplemented by neglected published sources local history journals popular autobiography newspapers Folklore and Irish language sources are used extensively All recent scholarly books in Irish social history are of course referred to throughout the book but it is a lively read reproducing the voices of the people and the stories of individuals whenever it can questioning much of the accepted wisdom of Irish historiography over the past five decades Statistics are used from time to time for illustrative purposes but tables and graphs are consigned to the appendix at the back There are some illustrations An idea summary for the student loaded with prompts for future research this book is written in a non cliched jargon free style aimed at the general reader [Routledge International Handbook of Critical Mental Health](#) Bruce Cohen, 2017-09-22 The Routledge International Handbook of Critical Mental Health offers the most comprehensive collection of theoretical and applied writings to date with which students scholars researchers and practitioners within the social and health sciences can systematically problematise the practices priorities and knowledge base of the Western system of mental health With the continuing contested nature of psychiatric discourse and the work of psy professionals this book is a timely return to theorising the business of mental health as a social economic political and cultural project one which necessarily involves the consideration of wider societal and structural dynamics including labelling and deviance ideological and social control professional power consumption capital neoliberalism and self governance Featuring original essays from some of the most established international scholars in the area the Handbook discusses and provides updates on critical theories of mental health from labelling social constructionism antipsychiatry Foucauldian and Marxist approaches to critical feminist race and queer theory critical realism critical cultural theory and mad studies Over six substantive sections the collection additionally demonstrates the application of such theoretical ideas and scholarship to key topics including medicalisation and pharmaceuticalisation the DSM global psychiatry critical histories of mental health and talk therapy Bringing together the latest theoretical work and empirical case studies from the US the UK Australia New Zealand Europe and Canada the Routledge International Handbook of Critical Mental Health demonstrates the continuing

need to think critically about mental health and illness and will be an essential resource for all who study or work in the field
