**The Analysis of Sports Forecasting** William S. Mallios,2013-03-09 Given the magnitude of currency speculation and sports gambling it is surprising that the literature contains mostly negative forecasting results Majority opinion still holds that short term fluctuations in financial markets follow random walk In this non random walk through financial and sports gambling markets parallels are drawn between modeling short term currency movements and modeling outcomes of athletic encounters The forecasting concepts and methodologies are identical only the variables change names If in fact these markets are driven by mechanisms of non random walk there must be some explanation for the negative forecasting results The Analysis of Sports Forecasting Modeling Parallels Between Sports Gambling and Financial Markets examines this issue

**Football In the BCS Era The Untold Truth Facts Evidence and Solution** Matthew J. Siggelow,2016-11-04 An in depth exhaustive examination of college football's system in how they determine their National Champion at the FBS level of play. The facts and evidence within this research and literary work proves that college football does possess an unfair system in determining their National Champion. This research possesses over 100 Tables to support the facts and evidence to prove that the BCS was unfair. The author did develop a selection and seeding process for a 16 Team Playoff format which is inclusive to all FBS programs to be eligible for the 50 Million dollars on the table and to be called National Champion.

Predicting Presidential Elections and Other Things, Second Edition Ray Fair,2011-12-14 It's the economy stupid as Democratic strategist James Carville would say. After many years of study Ray C Fair has found that the state of the economy has a dominant influence on national elections. Just in time for the 2012 presidential election this new edition of his classic text Predicting Presidential Elections and Other Things provides us with a look into the likely future of our nation's political landscape but Fair doesn't stop there. Fair puts other national issues under the microscope as well including congressional elections, Federal Reserve behavior and inflation. In addition he covers topics well beyond today's headlines as the book takes on questions of more direct personal interest such as wine quality, predicting football games and aging effects in baseball. Which of your friends is most likely to have an extramarital affair? How important is class attendance for academic performance in college? How fast can you expect to run a race or perform some physical task at age 55 given your time at age 30? Read Predicting Presidential Elections and Other Things and find out. As Fair works his way through an incredibly broad range of questions and topics he teaches and delights. The discussion that underlies each chapter topic moves from formulating theories about real world phenomena to lessons on how to analyze data, test theories and make predictions. At the end of this book readers will walk away with more than mere predictions. They will have learned a new approach to thinking about many age old concerns in public and private life and will have a myriad of fun facts to share.
