Footprint Vietnam Claire Boobbyer, 2008 Covers from watery plains to mountain scenery and magical deserted beaches noodle carts to nouvelle cuisine This guide helps you if you are planning a visit to Vietnam It also includes history and background section as well as various places to eat and sleep It provides what you need to know about navigating communist bureaucracy

Living within a Fair Share Ecological Footprint Robert Vale, Brenda Vale, 2013-09-02 According to many authorities the impact of humanity on the earth is already overshooting the earth's capacity to supply humanity's needs This is an unsustainable position This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint The authors describe numerical methods used to calculate this concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological means such as in Europe North America and Australasia The calculations focus on outcomes rather than on detailed discussion of the methods used The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future The emphasis is on workable practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity

Footprint Vietnam John Colet, 2004 From watery plains to mountain scenery and magical deserted beaches War wounds and historical symbolism Crossing the Mekong Delta and trekking opportunities in Northern Vietnam All you need to know about navigating communist bureaucracy with a sense of humour Highly regarded war history and background section
