The Routledge Handbook of Tourism and Sustainability C. Michael Hall, Stefan Gossling, Daniel Scott, 2015-02-11 Routledge Handbook of Tourism and Sustainability from C Michael Hall Stefan G ssling Daniel Scott is one of the winners of the ITB Book Awards 2016 in the category Specialist tourism literature Sustainability remains one of the major issues in tourism today Concerns over climate and environmental change the fallout from the global economic and financial crisis and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to tourism however they be defined Given the centrality of sustainability in tourism curricula policies research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability This timely Handbook of Tourism and Sustainability is developed from specifically commissioned original contributions from recognised authors in the field providing a systematic guide to the current state of knowledge on this area It is interdisciplinary in coverage and international in scope through its authorship and content The volume commences with an

assessment of tourism's global environmental e.g. climate emissions, energy use, biodiversity, water use, land use and socio-economic effects e.g. economic impacts, employment and livelihoods, culture. This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability management tools and approaches and the approaches used in different tourism and travel industry sectors. The book concludes by examining emerging and future concerns in tourism and sustainability such as peak oil, post-carbon tourism, green economy and transition tourism. This is essential reading for students, researchers and academics interested in the possibilities of sustainable forms of tourism and tourism's contribution to sustainable development. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability of tourism will be measured for years to come.

Tourism: Tourism, development and sustainability Stephen Williams, 2004. This collection of key articles from the most influential journals and books in the field examines what social scientists mean by the term tourism and what it means to be a tourist. Carefully selected and introduced by the editor, this material charts the sociological changes that have occurred in tourism and the change from the upper class grand tours of the late nineteenth century to the mass tourism of the present day. The collection also assesses the economic impacts of tourism on local economies, environmental considerations and whether the growth of tourism is sustainable in a post-September 11th world. **Tourism Critical Concepts in the Social Sciences** is an accessible and comprehensive resource designed for academics and scholars researching in tourism, globalization and human geography.

Tourism and Animal Ethics David A. Fennell, 2011-12-14. There is a long history of the involvement of animals for tourism purposes in circuses, zoos, fairs, ecotourism and wildlife tourism, using animals as the prime focus of their experience. The wave of responsibility and sustainability that currently permeates the tourism field is catalyzing deeper moral questions about equity, equality, rights, justice and values in regards to what constitutes acceptable tourism practice. **Tourism and Animal Ethics** represents a required extension of the sustainability imperative and environmental theory by providing a critical account of the role that animals play in tourism. This book explores the rich history of animal ethics research that lies outside the field of tourism for the purpose of providing greater theoretical, empirical and conceptual guidance inside the field. It examines historical and current practices of the use of animals in the tourism industry from both in situ to ex situ consumption and production perspectives, identifying a range of ethical issues associated with such use. This detailed examination of current animal ethics theories will be instrumental in determining the rightness or wrongness of these practices and hence allow tourism practitioners and theorists to think about these issues and practices in a different light, minimizing the impact that the industry has on animals. This text provides an interdisciplinary overview of the moral issues related to the use of animals in tourism and contains cutting edge research and boxed international case studies throughout. It will appeal to students, academics and researchers interested in Tourism Ethics, Sustainable Tourism and Wildlife Tourism.

Ecotourism

Programme Planning David A. Fennell, 2002-01-01 Tourism is the world's largest industry. In the past decade it is the natural resource based sector that has experienced the greatest growth. In particular adventure cultural and ecotourism ACE tourism for example skiing white water rafting whale watching festivals and fairs. This book provides an in depth overview of the different operations of ACE tourism. It draws on theory from recreation and leisure studies tourism marketing and environmental management to demonstrate the importance of effective program planning. This is especially significant as industry competition becomes more intense in this growth sector.

Tourism in the Mountain South C. Brenden Martin, 2007 C. Brenden Martin examines tourism in the context of the transformation of transportation networks urban and rural community development and the changing role of government in regulating tourism. Martin illustrates how tourism represents a double edged sword cutting both ways in its impact on the region. It is a transformative force that has accelerated the modernization of the Mountain South in many ways and yet tourism has also provided the main economic rationale for the region's cultural historical and environmental preservation movements.
