Unravelling the Mysteries of Africa's Underdevelopment W. Forje, 2020-05-19 Unravelling the mysteries of Africa's underdevelopment presents an Afrocentric ideological understanding of the continent's fragmentation a scientific and objective Mijadala discourse as well as an approach of how to move progressively and sustainably Africa forward The breadth and depth of the book shows the unwavering impoverishment and urgent need for the continent to stand up and take the bull by the horn It offers an inspiring means of grappling with the continent's problems to build the change we want An African Wealth of Nation not the continent of collapsed failed states under the governance construct of centralised authoritarian regimes It is a thought provoking discourse that challenges us all to be inherent participants in the

reconstruction of a Brave New Africa far beyond the 21st Century International Organization John J. Kirton, 2017-05-15 For well over a century international organizations have been central to the study and practice of international relations and global governance But how much and how do they help hinder or otherwise alter the behaviour of the actors who utilize them and provide public goals for the global community as a whole By assembling the leading works that have defined the scholarly field of international organization from realist liberal institutionalists constructivists and political economy traditions this work examines the many organizations which have formed in ever expanding numbers and fields over the years the degree to which they have succeeded and their future potential It looks at the changing international arena particularly with the expansion of civil society and how that affects the role of such organizations Has a formula for an effective and successful international organization developed or will one have to wait for the next generation of organizations institutions and regimes A Multidimensional Perspective on Corruption in Africa Sunday Bobai Agang, Chris Jones, Pregala Pillay, 2019-11-15 This book brings together a number of African anti corruption policy makers from across different academic disciplines religions and generations It engages in processes of economic social and political transformation to eliminate poverty and inequity through individual and institutional means Through historical and contemporary perspectives on authority structures institutionalised myths beliefs and rituals of authority the volume explores how to correctly mobilise and influence citizens behaviour and attitudes towards accountability transparency and probity all of which are key to strengthening national integrity systems all over Africa and are needed for equity and sustainable development The book strongly advocates that corruption is everybody s business All the chapters in some way commemorate the inaugural anti corruption year of the African Union in 2018 by interrogating how mechanisms to eliminate inequity and poverty can be built in Africa **Imperialism** Bill Warren, 2020-05-05 Ever since the First World War socialists have considered imperialism a calamity responsible for militarism economic stagnation and assaults on democracy in metropolitan countries an impediment to economic and cultural development in the Third World So widespread has this view become that it is shared in its essentials not only by Marxists but also by an entire school of liberal development economists Bill Warren breaks with this traditional outlook arguing that the theory of imperialism one of Marxism s most influential concepts is not only contradicted by the facts but has diluted and distorted Marxism itself In particular Warren disputes the claim that monopoly capitalism represents the ultimate stage of senile capitalism and sets out to refute the notion that imperialism is a regressive force impeding or distorting economic development in the Third World The book argues on the contrary that direct colonialism powerfully impelled social change in Asia and Africa laying the foundation for a vibrant indigenous capitalism Finally it takes issue with the conventional view that postwar economic performance in the Third World has been disastrous presenting a powerful empirical case that the gap between rich and poor countries is actually narrowing Closely argued clearly written original and iconoclastic Imperialism Pioneer of Capitalism is a compelling challenge to one of the chief tenets of

Crichlow, 2005-01-24 Michaeline A Crichlow extends the contemporary critique of development projects by examining the political and discursive relationship of the state to the land based working people or smallholders in modern Jamaica The first book of its kind Negotiating Caribbean Freedom does for Jamaican historiography and sociology what Akhil Gupta's PostColonial Developments did for studies of India Michaeline A Crichlow gives us an incredibly nuanced discussion of how development dominates the lives of the subsistence peasantry not through force but through the instrumentalization of social relationships that were once ends in themselves For example what were once effective agricultural practices embedded in the every day lives of smallholders all over the island have in the interest of serving international capital been bureaucratized to the point that they are untenable to support the livelihoods of smallholders Not content to measure the success or failure of development to deliver on its promises she discloses both the continuities and differences between development projects of very different political regimes and helps to establish why smallholders support development projects even when those projects fail to address their needs
