Economic Growth in France and Britain Charles P. Kindleberger, 1964 **Economic growth in France and Britain, 1851-1950** Charles P. Kindleberger, 1964 **The Economics of the Industrial Revolution (Routledge Revivals)** Joel Mokyr, 2018-07-18 In recent years scholars from a variety of disciplines have addressed many perplexing questions about the Industrial Revolution in all its aspects Understandably economics has become the focal point for these efforts as professional economists have sought to resolve some of the controversies surrounding this topic First published in 1985 this collection contains ten key essays written by leading economists on the subject of the Industrial Revolution Among the questions discussed are the causes for the pre eminence of Britain the roles of the inputs for growth capital labor technical progress the importance of demand factors the relation between agricultural progress and the Industrial Revolution and the standard of living debate The essays demonstrate that the application of fresh viewpoints to the literature has given us a considerable new body of data at our disposal making it possible to test commonly held hypotheses In addition this new data has enabled economists to apply a more rigorous logic to the thinking about the Industrial Revolution thus sharpening many issues heretofore blurred by slipshod methodology and internal inconsistencies **The British Economy 1870-1939** Derek H. Aldcroft, Harry W. Richardson, 1969-11-01 **Capitalism and the State in Modern France** Richard F. Kuisel, 1983-04-29 Les charbonnages du nord de la France au XIXe siècle Marcel Gillet, 2019-04-15 No detailed description available for Les charbonnages du nord de la France au XIXe siècle **The Great Exhibition of 1851** Jeffrey A. Auerbach, 1999-01-01 The book challenges the common view that the Exhibition symbolized peace progress prosperity and the emergence of an industrial middle class Auerbach suggests instead that the Great Exhibition became a cultural battlefield on which proponents of different visions of industrialization modernization and internationalism fought for ascendancy in the struggle for a new national identity **BOOK JACKET** Free Trade and its Enemies in France, 1814-1851 David Todd, 2015-04-30 In the aftermath of the French Revolution advocates of protection against foreign competition prevailed in a fierce controversy over international trade This groundbreaking study is the first to examine this protectionist turn in full Faced with a reaffirmation of mercantile jealousy under the Bourbon Restoration Benjamin Constant Jean Baptiste Say and regional publicists advocated the adoption of the liberty of commerce in order to consolidate the new liberal order But after the Revolution of 1830 a new generation of liberal thinkers endeavoured to reconcile the jealousy of trade with the discourse of commercial society and political liberty New justifications for protection oscillated between an industrialist reinvention of jealousy and an aspiration to self sufficiency as a means of attenuating the rise of urban pauperism A strident denunciation of British power and social imbalances served to defuse the internal tensions of the protectionist discourse and facilitated its dissemination across the French political spectrum *ECONOMIC GROWTH IN FRANCE AND BRITAIN 1851 - 1950* CHARLES P. KINDLEBERGER, 1964 **France's Long Reconstruction** Herrick Chapman, 2018-01-08 Postwar

recovery required a transformation of France but what form it should take remained a question Herrick Chapman charts the course of France's reconstruction from 1944 to 1962 offering insights into the ways the expansion of state power produced fierce controversies at home and unintended consequences abroad in France's crumbling empire The Endurance of Family Businesses Paloma Fernandez Perez, Andrea Colli, 2013-09-30 The Endurance of Family Businesses is a collection of essays offering an overview of the importance and resilience of family controlled large businesses Much of economic and business history research neglects family businesses considering them an inefficient form of business organization These essays discuss the strengths of family businesses the ways family firms have managed financed and governed their corporations as well as the way in which they structure their relationship with the external environment from the government to the company's stakeholders Family businesses have learned new ways of organizing their resources and using their accumulated know how for new markets and institutional environments This volume combines the expertise of well known scholars who specialize in business history economic history management and consulting to provide an interdisciplinary perspective on family businesses Contributors provide a global view by taking into account Asian American and European experiences *Wealth and Welfare* Martin Daunton, 2007-04-26 Martin Daunton provides a clear and balanced view of the continuities and changes that occurred in the economic history of Britain from the Great Exhibition of 1851 to the Festival of Britain in 1951 In 1851 Britain was the dominant economic power in an increasingly global economy The First World War marked a turning point as globalisation went into reverse and Britain shifted to insular capitalism Rather than emphasizing the decline of the British economy this book stresses modernity and the growth of new patterns of consumption in areas such as the service sector and the leisure industry *Catalogue of the Foreign Office Library, 1926-1968: Subject catalogue* Great Britain. Foreign Office. Library, 1972 Catalogue, 1926-1968 Great Britain. Foreign Office. Library, 1972

Consciousness and Class Experience in Nineteenth-century Europe John M. Merriman, 1979 Agricultural Enlightenment Peter Jones, 2016 Agricultural Enlightenment explores the modernization of the rural economy in Europe through the lens of the Enlightenment It focuses on the second half of the eighteenth century and emphasizes the role of useful knowledge in the process of agrarian change and agricultural development As such it invites economic historians to respond to the challenge issued by Joel Mokyr to look beyond quantitative data and to take seriously the argument that cultural factors broadly understood may have aided or hindered the evolution of agriculture in the early modern period what people knew and believed had a direct bearing on their economic behavior Mokyr The Enlightened Economy Evidence in support of the idea that a readily accessible supply of agricultural knowledge helps to explain the trajectory of the rural economy is drawn from all of the countries of Europe The book includes two cases studies of rapid rural modernization in Scotland and Denmark where Agricultural Enlightenment was swiftly followed by full scale Agricultural Revolution **The Transformation of the Provincial City** Rosemary M. Wakeman, 1985 **Statistical Tables Relating to the Economic**

Growth of the United States Frederick John Guetter, Albert Edward McKinley, 1924 **Choice** , 1964 **Paths to Democracy** Rosemary H. T. O'Kane, 2004-07-31 How and why countries become democracies remain intriguing questions This innovative volume provides a theoretically informed comparative investigation of the links between revolutions totalitarianism and democracy It will appeal to those interested in the relationship between history and democracy and the implications for the understanding of democracy today
