Environmental Regulation in Transforming Economies: The Case of Poland Piotr Jasinski, Helen Lawton-Smith, 2018-12-17

First published in 1999, the book is based on papers given at the final workshop of a research project into the evolution of environmental regulation in Poland undertaken as part of the UK's ERSC Global Environmental Change Programme. Other invited papers focused on the development of regulatory policy in transforming economies and in the UK. Furthermore, the book highlights the weakness of internal political processes in Poland and the important role played by foreign sponsored pressures whilst examining the divergence between the way environmental changes are supposed to operate and the ways in which they are implemented and enforced. Topics covered include the links between privatisation and the environment, the saline water problem in Upper Silesia, enforcement of and compliance with environmental charges, air pollution in Krakow, and the structure of the Polish environmental administration system.
