discussions of the 2008 panic and the economic turmoil have found the situation to either be unprecedented or greatly similar to that of 1931. However, the book's wide range of contributors suggest that the economic crisis of 2008 cannot be categorised in this way. This book was originally published as a special issue of *Business History*. **Global Financial Crisis** Paolo Savona, John J. Kirton, Chiara Oldani, 2011. This collection gathers experts from Africa, North America, Asia, and Europe to examine international policy responses to the 2008 global financial crisis. Congress. House. Committee on Banking, Finance, and Urban Affairs, 1989. **Financial Crisis in Eastern Europe** Jens Jungmann, Bernd Sagemann, 2011-01-19. During the past few years, all the regions of Europe have suffered from the effects of the World Financial Crisis. Most notably, in Eastern Europe, countries have adopted different approaches to combat the crisis, and the impact has been varying politically, economically, and socially. This book gives an overview of chosen countries and their situation before and during the crisis, providing a detailed view of the different regions during this difficult period. It also looks at their current status and the individual ways in which they have attempted to stimulate recovery. *The ABCs of the Economic Crisis* Fred Magdoff, Michael D. Yates, 2009-09-21. The economic crisis has created a host of problems for working people: collapsing wages, lost jobs, ruined pensions, and the anxiety that comes with not knowing what tomorrow will bring. Compounding all this is a lack of reliable information that speaks to the realities of workers. Commentators and pundits seem more confused than anyone, and economists, the so-called experts, still cling to bankrupt ideologies that failed to predict the crisis and offer nothing to explain it. In this short, clear, and concise book, Fred Magdoff and Michael D. Yates explain the nature of the economic crisis. Contrary to conventional wisdom, the authors demonstrate that this crisis is not some aberration from a normally benign capitalism but rather the normal and even expected outcome of a thoroughly irrational and destructive system. No amount of tinkering with capitalism, whether it be discredited neoliberalism or the return of Keynesianism and a new New Deal, can overcome the core contradiction of the system: the daily exploitation and degradation of the majority of the world's people by a tiny minority of business owners. While the current economic maelstrom has laid bare the web of greed, corruption, and propaganda that are central to capitalism, only an aroused public demanding the right to health care, decent employment, a secure old age, and a clean and healthy environment can lead the United States and the world out of the worst crisis since the Great Depression and toward a system of production and distribution conducive to human happiness. This book is aimed primarily at working people, students, and activists who want not just to understand the world but to change it. *The Economics of Recreation, Leisure, and Tourism* John Tribe, 2011. understanding of key concepts      **Japan's Financial Crisis and Its Parallels to U.S. Experience** Ryōichi Mikitani, Adam Simon Posen, 2000 Japan is only one of many industrialized economies to suffer a financial crisis in the past 15 years but it has suffered the most from its crisis as measured in lost output and investment opportunities and in the direct costs of clean up Comparing the response of Japanese policy in the 1990s to that of US monetary and financial policy to the American Savings and Loan Crisis of the late 1980s sheds light on the reasons for this outcome This volume was created by bringing together several leading academics from the United States and Japan plus former senior policymakers from both countries to discuss the challenges to Japanese financial and monetary policy in the 1990s The papers address in turn both the monetary and financial aspects of the crisis and the discussants bring together broad themes across the two countries experiences As the papers in this Special Report demonstrate while the Japanese government's policy response to its banking crisis in the 1990s was slow in comparison to that of the US government a decade earlier the underlying dynamics were similar A combination of mismanaged partial deregulation and regulatory forbearance gave rise to the crisis and allowed it to deepen and only the closure of some banks and injection of new capital into others began the resolution The Bank of Japan's monetary policy from the late 1980s onward however was increasingly out of step with US or other developed country norms In particular the Bank of Japan's limited response to deflation after being granted independence in 1998 stands out as a dangerous and unusual stance      **The Next Financial Crisis and How to Save Capitalism** H. Askari, A. Mirakhor, 2015-06-04 The financialization of the economy has brought a number of interrelated problems which have contributed to growing income and wealth inequality Askari and Mirakhor assert that it is time to make a bold change by putting our financial house in order and on a better path advocating for a fundamental reform of the financial system
