R. Mitchell, **On the History of Economic Thought** A. W. Bob Coats, 2005-08-08 On the History of Economic Thought is introduced by an essay in intellectual autobiography outlining the development of Coats key ideas and the distinctive elements of his approach Two themes in particular emerge The first is the difference between British and American economics both in content and in the practice of the profession This is an important element in all areas of his research The second theme is in the interrelationships between economic ideas events or conditions and policy issues The book concludes by offering an assessment of the current state of the discipline indicating the advantages an historian of economics can offer as a commentator on recent developments Worlds Apart Jean-Christophe Agnew, 1986 Drawing on a variety of disciplines and documents Professor Agnew illuminates one of the most fascinating chapters in the formations of

Anglo American market culture *Worlds Apart* traces the history of our concepts of the marketplace and the theatre and the ways in which these concepts are bound together Focusing on Britain and America in the years 1550 to 1750 the book discusses the forms and conventions that structured both commerce and theatre As marketing practice broke free of its traditional boundaries and restraints it challenged longstanding popular assumptions about the constituents of value the nature of identity the signs of authenticity and the limits of liability New exchange relations bred new legal and commercial fictions to authorise them but they also bred new doubts about the precise grounds upon which the self and its interests were to be represented Those same doubts Professor Agnew shows animated the theatre as well As actors and playwrights shifted from ecclesiastical and civic drama to professional entertainments they too devised authenticating fictions that effectively replicated the bewildering representational confusions of the new placeless market **The Industrial**

Revolution Douglas Fisher, 2016-07-27 Fisher's book will appeal to scholars interested in historical macroeconomics and the industrial revolution It suggests promising directions for future research and it contains vast amounts of useful information In time specialists may find it to be an indispensable reference Gary Richardson *Journal of Economic History* In this study of the European economy from 1700 to 1910 the macroeconomic data from five countries is examined both descriptively and analytically using structural and time series methods The UK receives three chapters in view of the extensive literature in that case while France Germany Italy and Sweden are each covered in a separate chapter **Manias, Panics, and Crashes**

Robert Z. Aliber, Charles P. Kindleberger, 2017-12-07 This seventh edition of an investment classic has been thoroughly revised and expanded following the latest crises to hit international markets Renowned economist Robert Z Aliber introduces the concept that global financial crises in recent years are not independent events but symptomatic of an inherent instability in the international system **New Directions in European Historiography** Georg G. Iggers, 1984-07 Impressive

analytical essays on the transformation of historical studies in Europe In four impressively researched essays Georg Iggers recounts the transformation of historical studies in Europe during the twentieth century with particular emphasis on the historiography of the past fifteen years Although the book does survey a broad area of contemporary historical thought it is primarily a careful analytical examination of the methodological and theoretical reorientation of certain influential European historians The first essay discusses the emergence at German Universities during the eighteenth and nineteenth centuries of the concept of history as a scientific discipline distinct from the classical tradition of literary history and the later broad acceptance of this mode of Enquiry in the Western world Against this background Mr Iggers then considers the challenge to this mode of the political social and intellectual upheavals of the twentieth century especially after World War II The three essays following examine important attempts to develop alternate paradigms for historical study the French historians of the *Annales* tradition the German political historians of the 1960s the various Marxist historians of France Poland East Germany and Great Britain In despite of the frequent insistence by philosophers and theorists of history that history is not a science in

contemporary terms historians themselves have striven in recent years to strengthen the quantitative aspects of historical study moving away from traditional patterns of writing and adopting methods and concepts from the systematic social sciences Mr Iggers book is an excellent introduction to these contemporary changes in historiography and in its comparative analyses itself makes a contribution to historical studies

Capitalism Before Corporations Andreas Televantos, 2020-12-03 To what extent did English law facilitate trade before the advent of general incorporation and modern securities law This is the question at the heart of Capitalism before Corporations It examines the extent to which legal institutions of the Regency period especially Lord Eldon s Chancellorship were sympathetic to the needs of merchants and willing to accommodate their changing practices and demands within established legal doctrinal frameworks and contemporary political economic thought In so doing this book probes at the heart of modern debates about equity trusts insolvency and the justifiability of corporate privileges Corporations are an integral part of modern life We bank with corporations we usually buy our groceries from them and they provide us with most news and media We take it for granted too that most large scale business and even much small scale business is carried out by corporations Things were not always so Televantos considers the Bubble Act of 1720 which criminalised the forming of corporations without a Royal Charter or Act of Parliament its repeal in 1825 and the subsequent impact Much of the modernisation of Britain s industry therefore took place before general incorporation was allowed Unaided by statute traders had to create business organisations using the basic building blocks of private law trusts partnership and agency
