Economic Forces in French History Tom Kemp,1971 Economic Forces in French History Tom Kemp,1971

Economic Growth in Britain and France 1780-1914 (Routledge Revivals) Patrick O'Brien,Caglar

Keyder,2012-11-12 First published in 1978 Professor O'Brien's *Economic Growth in Britain and France 1780-1914* is an original and pioneering exercise in comparative and quantitative economic history. It finds a controversial place in the debate on the question of French retardation in the 19th century and as a brave and important contribution towards the understanding of economic growth in Western Europe. The author attempts to comprehend and evaluate the economic performance of France through explicit comparisons with Britain while considering British economic history from a French perspective. Challenging the orthodox view that France lagged behind Britain in economic terms, the book argues that there were two paths of economic growth to the 20th century, with France's path seen as a more humane and no less efficient transition to industrial society.

Industrialization in Nineteenth Century Europe Tom Kemp,2014-06-06 Written for the layman as well as the economic historian, this famous and much-used book not only presents a general synthesis of the pattern of European industrialisation; it also provides material for a comparative study by illustrating, in separate case studies, the specific characteristics of development in Britain, France, Germany, Russia

and Italy *The Course of French History* Pierre Goubert, 2002-09-11 This stimulating one volume history traces the social and economic evolution of France as a nation from the founding of the monarchy in 987 to the present day Against a background of structural change Goubert etches a vivid account of key events and personalities His perspective is a popular one and his main interest is in how political events and famous people affect the nation as a whole The book incorporates the findings and perspectives of recent monographic studies with clarity and precision but it is Goubert's own judgements direct forceful and iconoclastic which make this an invaluable text

The Development of the Economies of Continental Europe 1850-1914 (Routledge Revivals) Alan Milward, S. Saul, 2012-08-06 This work first published in 1977 is a reissue of a trailblazing work the first textbook of economic history to deal comprehensively with the economic development of the whole continent in this period and to do so from a continental rather than a British perspective But it is more than merely a textbook it is an interpretative synthesis of the wide range of research on this subject in many countries As such it will be an indispensable guide for teachers and will extend and improve the scope of teaching by making available for the first time in English the results of continental research In addition it is a work of fundamental interest to economists in which theories and hypotheses of economic development are now examined in a much wider historical context In this way the book is an exploration of the objective validity of earlier theories and the starting point for further research into economic development and European history The work covers the continental development of the German and French economies after 1870 and then in that context analyses the development of the smaller western economies It then considers the relatively underdeveloped economies of eastern and southern Europe and includes the first attempt at a synthesis of economic development before 1914 in the Balkans It concludes with an analysis of the international economy and its relationship to the economic development of the continent
