Sander M. de Bruyn

Economic Growth Versus The Environment:

Economic Growth Versus the Environment Richard Lecomber, 1975 Growth versus the Environment: Is there a Trade-off? Per Kågeson, 2012-12-06 Economic growth and the environment is a complex and much debated issue Per Kågeson's book has a broader approach than earlier studies on this subject as he relates the analysis of present day problems and trends 1960-2010 to clearly defined long term objectives based on the concept of sustainable development The present volume covers the use of non renewable resources in the OECD countries in a global perspective while the regional environmental impact of economic growth is discussed in a European context The book also includes an analysis of the potential conflict between pollution abatement costs and economic growth Economic Growth Versus the Environment J. Cherni, 2002-04-19 Judith A Cherni presents a critical text of interdisciplinary research and a theoretical argued case for analyzing a physical social problem with a political economic approach The author identifies the convergence of global economic growth trends and the localization of environmental and health risks Backed by scientific findings she challenges the exclusive use of the natural sciences for explanation Drawing also on participatory knowledge of local residents she uses an original database of a large household survey in Houston US **Economic growth versus the environment : the politics of wealth, health and air pollution** Judith A. Cherni, 2002 Economic Growth and the Environment Sander M. de Bruyn, 2012-12-06 Is economic growth good for the environment A number of economists have claimed that economic growth can benefit the environment recruiting political support and finance for environmental policy measures This view has received increasing support since the early 1990s from empirical evidence that has challenged the traditional environmentalists belief that economic growth degrades the environment This book reviews the theoretical and empirical literature on growth and the environment giving an in depth empirical treatment of the relationship between the two Various hypotheses are formulated and tested for a number of indicators of environmental pressure The test results indicate that alternative models and estimation methods should be used altering previous conclusions about the effect of economic growth on the environment and offering an insight into the forces driving emission reduction in developed countries **Economic Growth Vs. the Environment** Warren A. Johnson, John Hardesty, 1971 **Economic Growth Versus the Environment** William D. Flach, 1979 **Economic Growth and Environmental Sustainability** Paul Ekins, 2002-01-04 A key area of public policy in the last twenty years is the question of how and how much to protect the environment At the heart of this has been the heated debate over the nature of the relationship between economic growth and environmental sustainability Is environmental sustainability economic growth or green growth a contradiction in terms Avoiding the confusion that often surrounds these issues Ekins provides rigorous expositions of the concept of sustainability integrated environmental and economic accounting the Environmental Kuznets Curve the economics of climate change and environmental taxation Individual chapters are organised as self contained state of the art expositions of the core issues of environmental economics

with extensive cross referencing from one chapter to another in order to guide the student or policy maker through these complex problems Paul Ekins breaks new ground in defining the conditions of compatibility between economic growth and environmental sustainability and provides measures and criteria by which the environmental sustainability of economic growth as it occurs in the real world may be judged It is argued that green growth is not only theoretically possible but economically achievable and the authors show what environmental and economic policies are required to achieve this Economic Growth and Environmental Sustainability will be welcomed by students of and researchers in environmental economics and environmental studies as well as all interested policy makers

Mega-urban Regions in Pacific Asia Gavin W. Jones,2008 Southeast Asia contains four urban conglomerates of the sort that this study characterizes as Mega Urban Regions Jakarta Manila Bangkok and Ho Chi Minh These locations are examined in this book along with Taipei and Shanghai Because the administrative boundaries of the cities at the core of these zones do not include the entire urban area the significance of the broader urban community has largely escaped scholarly attention The authors base their analysis on actual agglomeration size rather than administrative boundaries and draw on unpublished census data to study the dynamics of these massive urban zones considering area and population size as well as social and demographic patterns of change in core inner and outer zones They conclude that these mega urban regions continue to increase their share of national populations and zones immediately beyond the official metropolitan boundaries are where the most dramatic changes are occurring
