Research Handbook on the Economics of Property Law Kenneth Ayotte, Henry E. Smith, 2011-01-01 Leading scholars in the field of law and economics contribute their original theoretical and empirical research to this major Handbook Each chapter analyzes the basic architecture and important features of the institutions of property law from an economic point of view while also providing an introduction to the issues and literature Property rights and property systems vary along a large number of dimensions and economics has proven very conducive to analyzing these patterns and even the nature of property itself The contributions found here lend fresh perspectives to the current body of literature examining topics including initial acquisition the commons anticommons and semicommons intellectual property public rights abandonment and destruction standardization of property property and firms marital property bankruptcy as property titling systems land surveying covenants nuisance the political economy of property and

takings The contributors employ a variety of methods and perspectives demonstrating the fruitfulness of economic modeling empirical methods and institutional analysis for the study of both new and familiar problems in property Legal scholars economists and other social scientists interested in property will find this Handbook an often referenced addition to their libraries *University of Michigan News-letter*, 1898 Big Data, Databases and "Ownership" Rights in the Cloud Marcelo Corrales Compagnucci, 2019-11-02 Two of the most important developments of this new century are the emergence of cloud computing and big data However the uncertainties surrounding the failure of cloud service providers to clearly assert ownership rights over data and databases during cloud computing transactions and big data services have been perceived as imposing legal risks and transaction costs This lack of clear ownership rights is also seen as slowing down the capacity of the Internet market to thrive Click through agreements drafted on a take it or leave it basis govern the current state of the art and they do not allow much room for negotiation The novel contribution of this book proffers a new contractual model advocating the extension of the negotiation capabilities of cloud customers thus enabling an automated and machine readable framework orchestrated by a cloud broker Cloud computing and big data are constantly evolving and transforming into new paradigms where cloud brokers are predicted to play a vital role as innovation intermediaries adding extra value to the entire life cycle This evolution will alleviate the legal uncertainties in society by means of embedding legal requirements in the user interface and related computer systems or its code This book situates the theories of law and economics and behavioral law and economics in the context of cloud computing and takes database rights and ownership rights of data as prime examples to represent the problem of collecting outsourcing and sharing data and databases on a global scale It does this by highlighting the legal constraints concerning ownership rights of data and databases and proposes finding a solution outside the boundaries and limitations of the law By allowing cloud brokers to establish themselves in the market as entities coordinating and actively engaging in the negotiation of service level agreements SLAs individual customers as well as small and medium sized enterprises could efficiently and effortlessly choose a cloud provider that best suits their needs This approach which the author calls plan like architectures endeavors to create a more trustworthy cloud computing environment and to yield radical new results for the development of the cloud computing and big data markets

Community Engagement in Higher Education W. James Jacob, Stewart E. Sutin, John C. Weidman, John L. Yeager, 2015-06-17 There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local national and international levels But what is community engagement Even if this interest is genuine and widespread there are many different concepts of community service outreach and engagement The wide range of activity encompassed by community engagement suggests that a precise definition of the community mission is difficult and organizing and coordinating such activities is a complex task This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster

it Contributors provide empirical research findings including several case study examples that respond to the following higher education community engagement issues What is the community and what does it need and expect from higher education institutions Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities technical universities community colleges or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on educating internationally competent researchers and professionals How can a university be global and at the same time locally relevant Is it or should it be left to the institutions to determine the scope and mode of their community engagement or is a state mandate preferable and feasible If community engagement or community service are mandatory what are the consequences of not complying with the mandate How effective are policy mandates and university engagement for regional and local economic development What are the principal features and relationships of regionally engaged universities Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it or should it be made mandatory for both faculty and students How can community engagement be better integrated with the other two traditional missions of the university research and teaching Cover image The Towering Four fold Mission of Higher Education by Natalie Jacob **Directory of Corporate Counsel, 2025 Edition** In house, **Property Rights Dynamics** Donatella Porrini, Giovanni Ramello, 2012-07-26 Issues such as the patentability of scientific ideas the market for organs and open source software are hotly debated and yet poorly understood In particular there is a great need for sound economic theorizing on such issues There is also a need for a clear and concise exposition of the state of the art of the economics of property rights This book fulfils these various needs
