Economics of Standards in Information Networks Tim Weitzel, 2012-12-06 Standards play a prominent role in systems characterized by interaction In information systems standards provide for compatibility and are a prerequisite for collaboration benefits More generally speaking standards constitute networks In this work a standardization framework based on an analysis of deficiencies of network effect theory and a game theoretic network equilibrium analysis is developed Fundamental determinants of diffusion processes in networks e g network topology agent size installed base are identified and incorporated into a computer based simulation model As a result typical network behaviour specific diffusion patterns can be explained and many findings from traditional network effect theory can be described as special cases of the model at particular parameter constellations e g low price high density On this basis solution strategies for standardization problems are developed and a methodological path towards a unified theory of networks is proposed *The Sourcing of Application*

Software Services Jens Dibbern, 2012-12-06 The field of Information Systems IS outsourcing has drawn considerable attention among scientists and practitioners for the past fifteen years The present book analyses why organizations insource or outsource IS functions specifically the development and maintenance of software applications Concepts from transaction cost theory resource based theory incomplete contracts theory the theory of planned behaviour and cross cultural research are integrated into a coherent framework that recognizes the economic strategic and social dimension of the IS sourcing decision This framework is specified in a research model and empirically tested across countries Germany versus USA industries Machinery versus Finance and IS functions Application Software Development versus Maintenance using the partial least squares PLS approach of structural equation modelling The book thereby provides theoretically and empirically grounded insights into the reasons and implications of the IS sourcing decision **Formation and Early Growth of**

Business Webs Florian Steiner, 2005 Networks of firms have been in the focus of management research for several years Recently special attention has been paid to so called business webs Business webs are networks of firms which provide complements to a common product architecture In the past research focused on management issues of such webs but neglected the important question of how they actually came into being The present book explicitly examines the formation and early growth of business webs The author illustrates the early growth phases with two in depth cases of the formation of the wireless internet ecosystem i mode and the leading person to person online auction platform eBay The book uncovers the contingencies under which the establishment of business webs is likely to succeed Business researchers will benefit from the theoretical framework while interested business managers will find explanations and advice for establishing a business web

Leveraging Mobile Media Valerie Feldmann, 2005-02-24 Mobile communications emerges as a new digital distribution platform for media content due to the migration to next generations networks and their capabilities for broadband data communications As such mobile communications offers opportunities for media development because of an increased overlap

between interpersonal and group communications with mass media communications ubiquitous access to trusted media brands as well as integrated cross network strategies for media content The book takes two different viewpoints on potential levers for the developments of the media industry and mobile media from a competitive strategy point of view it assesses the potentials for an extension of cross media strategies from a public policy point of view the book investigates demands and requirements for innovation policy that foster innovation in mobile media markets TOC Introduction Incentives barriers and drivers for media development under the influence of mobile communications The mobile communication system elements and characteristics The social use of the mobile communications system Cross media and cross network strategies for mobile media Innovation policy for mobile media Conclusion **Accelerating Japan's Economic Growth** F.
