The Economics of Persistent Innovation: An Evolutionary View Christian Bas, William Latham, 2009-06-04

William Latham Christian Le Bas Persistence of firm innovative behavior became an important topic in applied industrial organization with the publication of the seminal empirical work of P Geroski and his colleagues 1997 Evidence that firms innovate persistently has led previous studies to focus on the determinants of innovation persistence and on its heterogeneity across industries technologies and countries The aims of this book are 1 to illumine the scale and scope of the phenomenon of persistence in innovation and 2 to account for the principal factors that explain why some firms innovates persistently and others do not

Because this book deals intensively and extensively with the subject of firm innovation persistence which is not as yet a well known term we need to provide a nontrivial definition of it that encompasses the full range topics we want to address and aids our understanding of how they are related to each other We begin with a careful identification of innovation Our first definition is drawn from K Pavitt 2003 innovation processes involve the exploration and exploitation of opportunities for a new or improved product process or service based either on an advance in technical practice or a change in market demand or a combination of the two While this definition is clear and conforms well to both our empirical and theoretical perspectives some elaboration may help to clarify the concept

Feldman,Albert N. Link,2001-02-28 Scholars in the science and technology field have not collectively questioned much less proposed an agenda for policy makers Now is an appropriate time for such an undertaking First there is a growing belief that the U S national research and development system like that of many industrial nations is changing due to global competitive pressures and advancements in information technology and electronic commerce Second industry s R D relationship with the academic research community is changing not only because of the global competition but also because of alterations in the level of government support of fundamental research As a result policy makers will need to rethink their approaches to science and technology issues This volume is a collection of essays by scholars about innovative policy in the knowledge based economy By knowledge based economy we mean one for which economic growth is based on the creation distribution and use of technology As such innovation policy in such an economy must enhance the creation distribution and use of knowledge that leads to the creation distribution and use of technology This volume considers elements of an innovation policy innovation policy and academic research innovation policy in electronic commerce and innovation policy and globalization issues
