**French Trade in Istanbul in the Eighteenth Century** Edhem Eldem,2023-08-28 This work deals with French trade in Istanbul in the eighteenth century using French and Ottoman sources and integrating the political and social dimensions of the question It also sheds light on the financial dimension of trade particularly that of bills of exchange and monetary trade linking Istanbul to other Ottoman cities and to European financial centers Finally it tackles the issue of western economic penetration arguing that despite some signs of domination French control over the market was efficiently opposed by local actors that economic integration with the West was often realized on equal terms and that much of the domination witnessed toward the end of the century was in fact the result of French diplomatic leverage and of the gradual estrangement of non Muslim traders from the Ottoman commonwealth

**Meridians of Salt** Paul N. Eubanks,Ashley A. Dumas,Heather McKillop,Marius Alexianu,2025-09-26 This book explores the relationship between salt sodium chloride and the development of human societies from a cross cultural and global perspective Although it is not possible to discuss the importance of salt to all ancient and modern societies the geographically and temporally diverse examples highlighted here are used to examine a series of related topics critical to understanding the economic political social and religious impacts of salt through space and time These topics include among others the techniques used to produce salt the individuals responsible for its production its cultural uses and applications its

role in cross cultural exchange and the impact of its circumscribed distribution on settlement patterns and developing complexity In exploring these topics the chapter authors rely on archaeological data to craft their interpretations however as salt itself is largely invisible in the archaeological record other avenues of investigation such as ethnoarchaeology ethnohistory and experimental archaeology are necessary to gain a more complete understanding of this mineral s influence on the development of human cultures Each chapter includes a summary of seminal research within a particular geographic region along with a discussion of recent or on going projects from that area This volume is intended for a professional audience but university students and graduates and readers with an interest in anthropology archaeology ethnoarchaeology or history will find the chapters comprehensible and informative
