Ecosystems and Human Well-being Carlos Corvalán,Simon Hales,Anthony J. McMichael,Millennium Ecosystem Assessment (Program),World Health Organization,2005 Approximately 60% of the benefits that the global ecosystem provides to support life on Earth such as fresh water clean air and a relatively stable climate are being degraded or used unsustainably In the report scientists warn that harmful consequences of this degradation to human health are already being felt and could grow significantly worse over the next 50 years *Ecosystems and Human Well-Being* Neville Ash,2010-04-05 The Millennium Ecosystem Assessment MA is the most extensive study ever of the linkages between the world s ecosystems and human well being It is one of the most important conservation initiatives ever undertaken and the ecosystem services paradigm on which it is based provides the standard for practice This manual supplies the specific tools that practitioners of the paradigm need in order to extend their work into the future The manual is a stand alone how to guide to conducting assessments of the impacts on humans of ecosystem changes It builds on the experiences and lessons learned from the MA global and sub global assessment initiatives with chapters written by well known participants in those initiatives It also includes insights gained from service focused assessment activities since the completion of the MA in 2005 *Handbook of Human and Planetary Health* Walter Leal Filho,2022-09-06 This book contains a set of papers which explore the subject

matter of human and planetary health at various angles The year 2015 was a special year in the field of human and planetary health In that year the report produced by the Rockefeller Foundation and the journal The Lancet called Safeguarding human health in the Anthropocene epoch report of The Rockefeller Foundation Lancet Commission on planetary health was launched Also in 2015 the World Health Organization and the Secretariat of the Convention on Biological Diversity published the report Connecting global priorities biodiversity and human health a state of knowledge review with over 100 contributors meant to guide future joint actions Both documents comprehensively address the need for a better understanding of the connections between human health and ecosystems and the risks associated with damages to the integrity of the planet The period in which humanity finds itself right now the Anthropocene is a risk one since mankind is putting the planet under considerable pressure These elements have led to the emergence of a new field of research namely planetary health Planetary health seeks to address a very concrete and urgent contemporary problem namely the need to understand quantify and act in order to reverse the effects of human population growth and the acceleration of socioeconomic activities on the environment and inter alia the disturbances in the Earth's natural ecosystems and how these in turn impact human health and well being Anthropogenic disturbances in natural ecosystems are characterized by changes in climate land use changes in the nitrogen and phosphorus cycle chemical pollution of soil water and air reduction in the availability of drinking water loss of biodiversity destruction of the ozone layer and ocean acidification among others In all these areas there is a perceived need to document and promote examples of initiatives and good practice which may change current trends This book addresses this need It documents experiences case studies and projects which explore the connections between human and planetary health and illustrates examples which show the consequences of ecosystemic disturbances to the health and well being of humanity with the emergence of new diseases worsening of infectious diseases and increase in chronic non communicable diseases related to the deterioration of the current food system hyper urbanization microbial resistance climate led migration and zoonoses among others Planetary health is a new effort to deal with the question of sustainability and human life on the planet under an increasingly integrative transdisciplinary and global perspective since the problems of this planetary crisis cross geopolitical borders and academic boundaries and affect humanity as a whole This book provides a contribution to this emerging field Thanks to its design and the contributions by experts from various areas it provides a welcome contribution to the literature on planetary health and it inspires further works in this field

Sustainability: The Basics Peter

Jacques, 2014-09-15 Sustainability is concerned with the issues around the ongoing and mutual preservation of both society and the environment It is a widely used term and supposed goal for many governments but it is also easily misunderstood Sustainability The Basics offers an accessible and interdisciplinary introduction to the concept and discusses key questions such as How do we decide who or what should be sustained How can we ensure that the world's resources are distributed fairly What lessons can we learn from the collapse of previous civilizations Sustainability studies is in a position to ask some

of the most interesting questions about human purpose identity modernity ethics and the nature of progress This book is an ideal starting point for anyone who wants to know more about we can hold up civilization humanity and the world we live in

Earth Observation of Ecosystem Services Domingo Alcaraz-Segura, Carlos Marcelo Di Bella, Julieta Veronica Straschnoy, 2013-11-12 A balanced review of differing approaches based on remote sensing tools and methods to assess and monitor biodiversity carbon and water cycles and the energy balance of terrestrial ecosystem Earth Observation of Ecosystem Services highlights the advantages Earth observation technologies offer for quantifying and monitoring multiple ecosystem functions and services It provides a multidisciplinary reference that expressly covers the use of remote sensing for quantifying and monitoring multiple ecosystem services Rather than exhaustively cover all possible ecosystem services this book takes a global look at the most relevant remote sensing approaches to estimate key ecosystem services from satellite data Structured in four main sections it covers carbon cycle biodiversity water cycle and energy balance Each section contains a review of conceptual and empirical methods techniques and case studies linking remotely sensed data to the biophysical variables and ecosystem functions associated with key ecosystem services The book identifies relevant issues and challenges of assessment presents cutting edge sensing techniques uses globally implemented tools to quantify ecosystem functions and presents examples of successful monitoring programs Covering recent developments undertaken on the global and national stage from Earth observation satellite data it includes valuable lessons and recommendations and novel ways to improve current global monitoring systems The book delineates the use of Earth observation data so that it can be used to quantify map value and manage the valuable goods and services that ecosystems provide to societies around the world

Urban Ecology Kevin J. Gaston, 2010 This is the urban century in which for the first time the majority of people live in towns and cities Understanding how people influence and are influenced by the green component of these environments is therefore of enormous significance Providing an overview of the essentials of urban ecology the book begins by covering the vital background concepts of the urbanisation process and the effect that it can have on ecosystem functions and services Later sections are devoted to examining how species respond to urbanisation the many facets of human ecology interactions and the issues surrounding urban planning and the provision of urban green spaces Drawing on examples from urban settlements around the world it highlights the progress to date in this burgeoning field as well as the challenges that lie ahead Provided by publisher

Risk Layla Skinns, Michael Scott, Tony Cox, 2011-09-01 Recent events from the economic downturn to climate change mean that there has never been a better time to be thinking about and trying to better understand the concept of risk In this book prominent and eminent speakers from fields as diverse as statistics to classics neuroscience to criminology politics to astronomy as well as speakers embedded in the media and in government have put their ideas down on paper in a series of essays that broaden our understanding of the meaning of risk The essays come from the prestigious Darwin College Lecture Series which after twenty five years is one of the most popular public lecture series

at the University of Cambridge The risk lectures in 2010 were amongst the most popular yet and in essay form they make for a lively and engaging read for specialists and non specialists alike **Ecosystem and Natural Resources** Mr. Rohit Manglik,2024-03-06 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels

Social Work Practice for Promoting Health and Wellbeing Liz Beddoe,Jane Maidment,2013-12-17 Promoting health and wellbeing is an essential part of all effective social work not just for practice in healthcare settings In fact the IFSW holds that social workers in all settings are engaged in health work and physical and mental resilience can make a major difference to all service users lives Drawing on international literature and research the authors collected here encourage thinking about the social political cultural emotional spiritual economic and spatial aspects of health and wellbeing and how they impact on the unique strengths and challenges of working with particular populations and communities Divided into three parts the first section outlines the major theoretical paradigms and critical debates around social work and ideas of wellbeing globalisation risk and vulnerability and the natural environment The second part goes on to explore how diverse understandings of culture identity spirituality and health require different strategies for meeting health and wellbeing needs The final part presents a variety of examples of social work research in relation to health and wellbeing with specific populations including mental health Exploring how structural inequality oppression and stigma can impact upon people and drawing upon a social model of health this book is an important read for all practitioners and researchers interested in social work public health and social inclusion **Human and Societal Security in the Circumpolar Arctic** Kamrul Hossain,Jose Miguel Roncero Martin,Anna Petr  tei,2018-09-04 Human and Societal Security in the Circumpolar Arctic addresses a comprehensive understanding of security in the Arctic with a particular focus on one of its sub regions the Barents region The book presents a comparative and interdisciplinary perspective to which the Arctic is placed as referent and special attention is paid to the viewpoint of local and indigenous communities Overarching topics of human and societal security are touched upon from various angles and disciplinary approaches The discussions are framed in the broader context of security studies The volume specifically addresses the challenges facing the Arctic population which are important to be looked at from human security perspectives **Past, Present and Future of a Habitable Earth** Res. Group Dev Strategy of Earth Science,2022-08-27 This perspective of this book views Earth s various layers as a whole system and tries to understand how to achieve harmony and sustainable development between human society and nature with the theme of habitability of the Earth This book is one effort at providing an overview of some of the recent exciting advances Chinese geoscientists have made It is the concerted team effort of a group of researchers from diverse backgrounds to generalize their vision for Earth science in the next 10 years The book is intended for scholars administrators of the Science and Technology policy

department and science research funding agencies This is an open access book **Modeling the Human Well-being Benefits of Ecosystem Restoration and Management for Environmental Decision Making** Susan Harrell Yee, Matt Harwell, Marc Russell, Joel Christopher Hoffman, Tammy Newcomer-Johnson, 2024-08-28 Human well being is inextricably linked to the condition of the natural environment Environmental management decisions often aim to maintain ecosystems in a healthy and resilient condition while providing the ecosystem goods and services that humans want and need Models methods frameworks and metrics are needed to characterize and forecast the potential benefits from remediation restoration and revitalization that improve human health and well being through the delivery of ecosystem services However ecosystems are complex and layering on social and economic considerations can make environmental decision making seem intractable Dynamics of socio ecological systems are complicated making models a pivotal tool for identifying and quantifying relationships assessing historical patterns and forecasting alternative decision scenarios The goal of this Research Topic is to leverage modeling approaches to provide science based evidence metrics and frameworks and methods for quantifying how restored ecosystem goods and services lead to benefits for public health community well being and economic vitality Modeling approaches may range in complexity from conceptual models to statistical models to dynamic process models empirically derived to mechanistic to participatory Research will evaluate connections between ecosystem condition ecosystem services and human health and well being and may include covarying socio economic or biophysical factors that modify relationships between ecosystem health and perceived or realized benefits Applications or case studies will demonstrate how to integrate community priorities with nature based solutions to enhance benefits of environmental remediation ecological restoration community revitalization and climate resilience decisions
