Structured Approach to Combine Models of the Technosphere Ecosphere and Valuesphere presents a proposal for a second generation framework and method for Life Cycle Impact Assessment Many of the suggested elements are either based on other tools for environmental analysis e g risk assessment or fit in well with tools and concepts such as industrial ecology technology assessment or environmental impact assessment The research presented in this book goes beyond the scope of presently used methods for Life Cycle Assessment and may stimulate new developments in a variety of areas The book will appeal to persons from a wide range of scientific disciplines who are interested in learning more about Life Cycle Assessment It will be especially valuable to members of SETAC and to students and researchers in the fields of environmental impact assessment risk assessment and industrial ecology      *Nature in Indian Philosophy and Cultural Traditions* Meera Baindur,2015-05-19 Working within a framework of environmental philosophy and environmental ethics this book describes and postulates alternative understandings of nature in Indian traditions of thought particularly philosophy The interest in alternative conceptualizations of nature has gained significance after many thinkers pointed out that attitudes to the environment are determined to a large extent by our presuppositions of nature This book is particularly timely from that perspective It begins with a brief description of the concept of nature and a history of the idea of nature in Western thought This provides readers with a context to the issues around the concept of nature in environmental philosophy setting a foundation for further discussion about alternate conceptualizations of nature and their significance In particular the work covers a wide array of textual and non textual sources to link and understand nature from classical Indian philosophical perspectives as well as popular understandings in Indian literary texts and cultural practices Popular issues in environmental philosophy are discussed in detail such as What is nature in Indian philosophy How do people perceive nature through landscape and mythological and cultural narratives In what ways is nature sacred in India To make the discussion relevant to contemporary readers the book includes a section on the ecological and ethical implications of some philosophical concepts and critical perspectives on alternate conceptualizations of nature      *Biodiversity Conservation Ethics in Major Religions* H. *Research* Dr. Mallika Tosha, Dr. Shubh Narayan Singh & Prof Ram Kumar, Religion, Consumerism and Sustainability L. Thomas, 2010-12-14 To varying degrees classic religions are associated with critique of materialistic values. Onto this opposition of the market and the temple other binaries have been grafted so that North and the West are portrayed as secular and materialistic South and East either as tigers pursuing western style affluence and economic growth or locked into retrospective fundamentalisms. These characterisations are called into question in a context of diversity and global movements of peoples and goods. In this collection this complexity is addressed in an analysis of the interconnections between religious and consumption practices and cultures and the ways in which both are responding to the ecological threat posed by continuous economic growth. International in scope the book combines empirical and theoretical work in its attempt to interrogate the traditional opposition of spiritual and materialistic values and to explore the interplay of religious and consuming passions in contemporary cultures. This analysis leads to a consideration of the ways in which religions and secular spiritualities can contribute to a new ecological consciousness and to the adoption of less destructive and rapacious ways of life.

**Animals and World Religions** Lisa Kemmerer, 2012-01-05 Despite increasing public attention to animal suffering human beings continue to exploit billions of animals in factory farms, medical laboratories and elsewhere. This wide ranging study shows how spiritual teachings in seven major religious traditions can help people consider their ethical obligations towards other creatures.

**This Sacred Earth** Roger S. Gottlieb, 2003-11-07 Updated with nearly forty new selections to reflect the tremendous growth and transformation of scholarly theological and activist religious environmentalism the second edition of *This Sacred Earth* is an unparalleled resource for the study of religion's complex relationship to the environment.

**Sacred Paths of the West** Theodore M. Ludwig, 2015-08-07 This text combines study of the dynamic historical development of each religious tradition with a comparative thematic structure. Students are encouraged to discover and explore the nature of religious experience by comparing basic themes and issues common to all religions, finding connections with their own personal experiences. By sensitively introducing descriptive material within a comparative thematic structure this text helps students to understand how each religion provides for its adherents patterns and meanings that make up a full way of life.

**The Human Relationship to Nature** Matthew R. Foster, 2016-11-02 Growing alarm over the harm done by humans to the natural world and even to the viability of our own industrial civilization compels us to ask the deeper moral question: What should be the human relationship to nature? Matthew R. Foster starts by assessing three contrasting patterns of moral reasoning: the Progress Ethic that created the world we live in; the biblically inspired Stewardship Ethic; and the Connection Ethic based on scientific understanding of the interdependence of all natural entities. Critical analysis reveals that none of these ethics is able to sustain the values it advocates due to two unsupportable presumptions: that the norms of human morality are commensurate with the natural world and that the value of an entity is an intrinsic property. Foster argues that in order for a future environmental ethic to be both logically coherent and

environmentally constructive it must start from unconventional notions First because nature will never be commensurate with human moral reasoning non rational resources must be employed despite the risks involved Second value resides in the relationship of one entity to another and does not belong intrinsically to either in short value is foremost a verb rather than a noun Foster proposes a new paradigm attentive to the realm of value relations among all natural entities one which offers mediating opportunities between nature and morality In this new ethic there are no shoulds Rather moral responsibilities to the natural entities around us are elective placing us in an unfamiliar yet potentially liberating network of relationships This book will be of interest to scholars both instructors and students of environmental ethics philosophy religion and intellectual history and all who are concerned about the environmental challenges of our time **The Intellectual Journey of Thomas**

**Berry** Heather Eaton,2014-04-02 Thomas Berry had a gentle yet mesmerizing and luminescent presence that was evident to anyone who spent time with him His intellectual scope and erudite manner were compelling and the breadth depth clarity and elegance of his vision was breathtaking Berry was an intellectual giant and cultural visionary of extraordinary stature Thomas Berry s vast knowledge of history religions and cultural histories is a unique blend revealing a genuine original thinker The ecological crisis in all its manifestations came to dominate Berry s concerns He perceived that the greatest need was to offer the possibility of a viable future for an Earth community Many know of his proposal for a functional cosmology the need for a new story and a vital Earth sensitive spirituality Few know of his rich and varied intellectual journey The Intellectual Journey of Thomas Berry Imagining the Earth Community is about the roots and insights hidden within his ecological spiritual proposal These essays written by experts on Thomas Berry s work probe into and reveal distinct themes that permeate his work in gratitude for his contribution to the Earth Animals and the Environment Lisa

Kemmerer,2015-05-01 Contemporary Earth and animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual and neither seems to have much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals

Belief, Bounty, and Beauty Albertina Nugteren,2018-08-14 This study is focused on the interaction of material and symbolic values in the domain of sacred trees in India By presenting samples from 3 000 years of Indian ritual practice it is shown that in many sacred geographies trees continue to connect the present with the past the material with the symbolic

and the contemporary ecological with the traditionally sacred Although in India religion may have become very much a temple cult its embeddedness in the natural world enhances today's green interpretation of religious traditions That in environmental matters such religious inspiration may be both successful and highly ambivalent at the same time is the thought provoking position taken in the final chapters

**Preservation and Protest** Ryan Patrick McLaughlin, 2014 A title that systematically develops the paradigm of cosmocentric transfiguration arguing that the entire cosmos including all instantiations of life therein shares in the eschatological hope of a harmonious participation in God's triune life a participation that entails the end of suffering predation and death
