Ziche, 2006 Ancient Economies Modern Methodologies is a collection of essays which focuses on the art of questioning it is about ideas and analytical experiment Ancient economic history has developed enormously since the publication of M I Finley s *The Ancient Economy* in 1973 Much new material has been brought to bear on the debate on the character of economic life in the Greek and Roman world But at the same time discussions have been going round in circles This is because not enough attention has been given to the questions ancient historians ask and the concepts with which they approach the economy In this collection an attempt is made to renew the terms of the debate by presenting a wide variety of new analytical approaches to ancient economic history ranging from literary theory cross cultural comparison statistical analysis of archaeological data to neo institutional economics and model building **Belgium, Luxembourg, and the Netherlands** Britannica Educational Publishing, 2013-06-01 Despite being

known as the Low Countries Belgium Luxembourg and the Netherlands are far from insignificant The Benelux Economic Union which sought economic integration between the three countries in fact served as the model for the European Union Additionally each of the three boasts rich histories and what they lack in size or population they make up for in thriving cultural climates This absorbing volume pays each country its due surveying the lands societies traditions and histories that have elevated the Low Countries on the world stage **Funding the Rise of Mass Schooling** Johannes

Westberg,2016-11-24 This book presents expert analysis on how the remarkable rise of mass schooling was funded during the nineteenth century Based on rich source materials from rural Swedish school districts and drawing up evidence from schooling in countries including France Germany England and the U S Westberg examines the moral considerations that guided economic practices and sheds new light on how the advent of schooling did not only rest upon monies but also on grains firewood and cow fodder Exploring school districts motives and economic culture this book shows how schooling was neither primarily guided by frugal impulses nor motivated by a fear of the growing working classes Instead school spending served multiple purposes in school districts that pursued a fair and reasonable economic practice In addition to being a highly detailed case study of Sweden 1840 1900 this book also entails a broadening of the theoretical horizon of history of education into social agrarian and economic history in a wider context With a focus on different systems of school finance this work reveals a key change over time from a largely in kind system supporting schools in an early phase followed by an increasingly monetarized depersonalized and homogenized system of school finance Boasting an interdisciplinary appeal this will be a welcome contribution of interest to scholars in the fields of education history sociology and economics
