Economic and Political Change in the Middle East (RLE Economy of Middle East) Elias H. Tuma,2014-10-30 In the early 1960s the Middle East suffered from political instability inefficiency of government widespread poverty and inequality low productivity and a mounting population pressure on the region s resources With the exception of some of the oil exporting countries the entire region still suffers from these same burdens There have been many studies in the economic development and industrialization of the region in recent years This study is different motivated by scepticism and a sense of intellectual frustration and apprehension because of the apparent inadequacy of socioeconomic and political development in the Middle East First published in 1987 *Economic Development in the Middle East* ,1995 *Final Report* United Nations Economic Survey Mission for the Middle East,1949 **Economic Development and Population Growth in the Middle East** Charles A. Cooper,Sidney Stuart Alexander,1971 Monograph comprising nine essays on economic development and population problems in the Middle East includes information on Egypt Lebanon Jordan Iraq Syrian Arab Republic Saudi Arabia Kuwait and the Gulf States in respect of economic growth the balance of payments trade prices economic policies population growth fertility patterns modernization etc Bibliographys graphs map references and statistical tables

economies and societies over the past two hundred years In this study Professor Issawi examines and explains the development of these economies since 1800 focusing particularly on the challenge posed by the use and subsequent decline of Western economic and political domination and the Middle Eastern response to it The book begins with an analysis of the effects of foreign intervention in the area the expansion of trade the development of transport networks the influx of foreign capital and resulting integration into international commercial and financial networks It goes on to examine the local response to these external forces migration within to and from the region population growth urbanization and changes in living standards shifts in agricultural production and land tenure and the development of an industrial sector Professor Issawi discusses the crucial effects of the growth of oil and oil related industries in a separate chapter and finally assesses the likely gains and losses in this long period for both the countries in the area and the Western powers He has drawn on long experience and an immense amount of material in surveying the period and provides a clear and penetrating survey of an extraordinarily complex area

Economic Development in the Middle East Rodney Wilson, 2002-03-11 Despite its oil resources the Middle East is falling behind other regions of the developing world notably the countries of East and South East Asia Rodney Wilson examines the economic prospects for the region considering the consequences of rapid population growth including the implications for education and employment low savings levels the absence of significant inflows of private capital and foreign investment fragmentation of the banking system the basic economic infrastructure and the problems caused by excessive military expenditure falling oil prices budget deficits The author examines alternative economic directions for the region arguing that both the methods and goals of development have to be reassessed in a region where Islam prevails

The Economic Development of the United Arab Emirates (RLE Economy of Middle East) Ragaei el Mallakh, 2014-10-30 Since the early 1970s the oil producing countries of the Gulf have become a focus of intense interest worldwide Most of this interest has centred on the oil giants Saudi Arabia Iran even Iraq and Kuwait Yet the United Arab Emirates is also among the largest producers on a par with Kuwait Nigeria and Libya with reserves greater than the USA Given its high economic growth rate the UAE is an excellent laboratory in which to test and evaluate policies and programmes to effect rapid economic development The international stature of the UAE far exceeds what its physical size population and breadth of resources would seem to indicate As a member of OPEC the UAE has played a vital role within that body's price moderates With one of the world's highest per capita incomes and with ambitious development efforts underway the UAE not surprisingly has become a major market for capital and consumer goods involving substantial foreign services banking business and industry Based on more than a decade of study on site research and interviews with key figures this book which mixes the practical with the academic approach will prove of great value to Middle Eastern and development specialists students and to the international business and financial communities First published in 1981

Economic Development in Saudi Arabia Ahmed Al Rajhi, Abdullah Al Salamah, Monica Malik, Rodney Wilson, 2012-10-12

The changing political situation in the Middle East poses challenges for the economies of the region and some see none more vulnerable to collapse than Saudi Arabia's. Yet as this study demonstrates the fundamentals of the Kingdom's economy are relatively robust as over three quarters of GDP is accounted for by the non oil sector and impressive modern industries have been established notably in petrochemicals. The financial system functions well and despite substantial government debts there is low inflation and currency stability. The private sector increasingly drives the economy although job creation has been insufficient to prevent rising youth unemployment. The development challenges Saudi Arabia faces are similar to those of other middle income countries and three decades of diversification have made the economy less unique than it was in the oil boom years of the 1970s.

The Determinants of Arab Economic Development Yusuf Sayigh, 2014-10-30. This book explores in depth the factors determining economic development in the Arab region. The particular factors relevant to the Arab world are also set within the context of the broad political economy of underdevelopment. The factors are identified as comprising three main groups: economic, political, administrative and socio cultural. Petroleum and regional Arab economic development are examined separately. The force and operation of each determinant is further assessed in the context of the individual countries from which the author is able to arrive at some important conclusions concerning the interaction of these determinants and their impact upon development. First published in 1978.
