Leadership and Succession in the Soviet Union, Eastern Europe, and China Martin McCauley, Stephen Carter, 2016-07-08 First Published in 1986 The papers in this volume were originally delivered at a series of seminars held at the School of Slavonic and East European Studies University of London between January and May 1984 The inspiration for the scheme was the Soviet succession struggle of 1982 but further reflection indicated that the problem of elderly leaderships and the apparent absence of legitimate succession mechanisms applied to nearly all communist systems **East-West Economic Relations in the Changing Global Environment** Bela Csikos-Nagy, David G. Young, 1986-09-29 **UNDOC, Current Index**, 1986 **Energy in Europe** Thomas G. Weyman-Jones, 2019-06-26 Originally published in 1986 Energy economics emerged in the 1970s as one of the most controversial and critical aspects of European economic and political development This book provides a fully comprehensive but easily accessible guide to the key issues of energy policy placing them in a European context As well as discussing oil price movements and their effects on European prosperity it assesses the role of energy conservation and pricing policies The chapters discuss the economic political and social impact of nuclear power programmes North Sea oil and gas discoveries Soviet gas imports and coal field closures and go on to forecast possible future developments This is for all those concerned with European and energy studies especially political scientists geographers economists and environmental and resource specialists The European Energy Challenge George Walter Hoffman, Leslie Dienes, 1985 By examining all of Europe in a single study an eminent geographer and expert on European development makes in this volume a unique contribution to the understanding of the changing energy relations of the European countries east and west The book examines the problem of establishing a reliable energy supply base in western Europe through structural changes and alternate and substitute energy sources The volume also evaluates western European security problems arising from present and future reliance on Soviet energy and relates this to North Sea supplies of gas and oil indigenous and import supplies and nuclear power generation *The Bulgarian Economy* John R. Lampe, 2024-12-02 First published in 1986 The Bulgarian Economy now with a new preface by the author traces the rapid growth of the Bulgarian economy throughout the twentieth century It also notes the obstacles Bulgaria has faced in bringing about industrial development in a small relatively poor country where in the early twentieth century agriculture predominated It

explores the difficulties which have arisen because of the unusual domination of a relatively isolated capital city Sofia over the rest of the country. It examines the effects of Bulgaria's being on the losing side in three wars. An abrupt change in economic strategy and management came with the Communist accession to power in 1944 and with the simultaneous reorientation from close ties with Germany to close ties with the Soviet Union. The book shows however that significant state control had appeared well before this transition and that there is much in common between the pre and post war periods. It goes on to emphasise economic growth and structural change in the post war period and the unusually large role of foreign trade. The reforms which have taken place since 1960 are accorded a separate final chapter.
