Evans,2019-03-13 This analysis of appropriate technology first explores the concept of development in terms of needs characteristics and theories and then examines the pivotal role of technology in the developmental process The twenty contemporary case histories illustrate specific instances of applied technology not necessarily as examples of successful applic **Productivity: a Selected Annotated Bibliography** ,1984 **Agribusiness and Rural Enterprise Project Analysis Manual** Samuel R. Daines,1979 **National Transportation Planning** Adib Kanafani,Daniel Sperling,2012-12-06 Soon after starting work on the development of a methodology for national transportation planning in Venezuela we realized the importance of an integrated management process for such an effort We also realized the absence in the literature of specific guidelines on how to manage and conduct a transportation planning effort The literature on the subject of national transportation planning is predominantly theoretical and technical in nature To a large extent the absence of literature on management and broad based methodological approaches reflects the limited and ad hoc nature of the experience in national transportation planning This book is an attempt to fill that gap The main objective of the book is to show one way by which a methodology for national transportation planning can be integrated into a process management framework It reports on the experience that the authors had in the Venezuelan case as well as in earlier national planning efforts The book is not intended as a theoretical discussion of planning Instead it adopts a particular theoretical stand and proceeds on that basis to develop a program for applying a specific methodology The intention is to leave as much of the details and elaborations of that methodology to the user This is motivated by two considerations The first is a pragmatic attempt to limit the scope of the book *Technology and Underdevelopment* F. Stewart,2016-01-12 **Science, Technology and Society** Klaus-Heinrich Standke,M. Anandakrishnan,2013-10-22 Science Technology and Society Needs Challenges and Limitations focuses on the role of science and technology in promoting development as well as its limitation in shaping the society The text outlines the contributions that this field has provided in health industries agriculture transportation and communication The book puts emphasis on the role of technologists and scientists in promoting

development such as in the fields of biology and medicine The text notes the emergence of socio economic problems in the sector of food and agriculture and how these problems can be solved by the application of agricultural technologies Case studies in this regard that is presented in this book include fish handling and distribution improving soil fertility and feed resources for animal feeding The role of science and technology in the management of water resources is noted and the problems associated with the application of science and technology to water resources development are discussed Science and technology has also played an important role in improving the quality of life in human settlements The text is a valuable source of data for scientists and technologists who aim to improve science and technology and serve the interest of mankind

Energy Abstracts for Policy Analysis, 1987 *Peace Corps Times*, 1979 **Technology and Rural Women** Iftikhar Ahmed, 2022-08-30 First published in 1985 Technology and Rural Women synthesizes the fragmented empirical evidence and the wide range of theoretical approaches on the effects of modernisation on women in the developing world Using a multi disciplinary methodology empirical and sectoral overviews and country case studies it draws together the literature to clarify the issues and the policies The book begins with a conceptual overview and analyses the applicability of traditional theories of technological change and impact on gender based distributional questions It proceeds to compare the African and Asian experience examines the African situation regionally and then as a set of four country case studies The authors find that the imperfections of rural factor markets have contributed to women s concentration in labour intensive sectors marked by low productivity and low returns Biases in the agrarian structure and the extension services are largely responsible for the Institutionalisation of discrimination against women Finally the volume identifies the social economic and technical constraints to the diffusion of technologies relevant to rural women s tasks In the final chapter the book s analysis is further refined and extended so that its conclusions to both theory and policy making are clearly brought out and areas of future research identified This book is an essential read for students and scholars of labour economics women s studies and economics in general *Rural Women at Work* Ruth B. Dixon-Mueller, 2013-11-26 First Published in 2011 This study is Volume I of the Global Environment and Development 7 volume set One of the most promising areas identified in the initial study was female labor force participation If good jobs at decent wages were offered to women particularly those living in rural areas would such employment have an effect on family size Would their jobs compete for the women s time as mothers

and housewives offer them an alternative route to acquiring status and a sense of purpose and perhaps also provide the women with an independent source of income which would enable them to achieve more control over their lives But as the original volume makes clear the situation is more complicated than it first appears to be *Foreign Acquisitions Newsletter*,1977 **Diffusion of Biomass Energy Technologies in Developing Countries** National Research Council (U.S.).
