**Transaction Cost Economics and Beyond** John Groenewegen, 1995-12-31 This book contains the papers that were presented in 1994 at the conference Transaction Cost Economics and Beyond organized by GRASP at the Tinbergen Institute in Rotterdam It is generally recognized that transaction cost economics TCE is at the heart of the new theory of the firm It is a well established research program with a well developed theoretical framework and

good results in empirical testing However critics consider the approach too limited to understand the essential characteristics of such complex organizations like firms Critics plea convincingly for the need to go beyond the original TCE framework and to develop a more pluralistic approach towards issues of economic organization The new theory of the firm can only be further developed when scholars are willing to debate the issues in an open minded academic way I thank the participants of the conference very much for putting so much effort in writing their papers and for their contribution to an open and stimulating discussion It is my wish that this book contributes to the further development of the theory of the firm and that it helps us to a better understanding of the complexities of economic organization I would like to thank the following organizations for their support the Tinbergen Institute the Vereniging Trust Fonds of the Erasmus University the Faculty of Economics of the Erasmus University and GRASP Group for Research and Advice in Strategic management and Industrial Policy
