McKenzie,2012-12-06 The essays in this volume were a challenge to me to write I am an economist to the core inclined to  
evaluate most observed behavior and public policies with conventional neoclassical theory The essays represent my attempt  
to come to grips with the meaning and importance of what I try to do as a professional economist They reflect my attempt to  
acquire a new and improved understanding of the usefulness and limitations of the writings of professional economists  
especially my own In this regard although I hope others will find the thoughts useful the volume represents a personal  
statement of how one economist views his and others work For that reason the discussion is often openly normative tinged  
with the conviction that social discourse is more than costs and benefits and that economics cannot be fully evaluated by the  
methods economic methods that are the subject of the evaluation These essays could not have been written without  
considerable encouragement and help from colleagues and friends The following people are recognized for having read one  
or more chapters and for having contributed critical substantive comments Diana Bailey Wilfred Beckerman Geoffrey  
Brennan William Briet James Buchanan Delores Martin David Maxwell Mary Ann McKenzie Warren Samuels Robert Staaf

examines how it became possible for Japanese economists to do so by shedding light on the professional discussion of the  
international gold standard and parity policies in the early twentieth century the acceptance of mathematical economics in  
the following period the impact of establishment of the Econometric Society 1930 and the swift distribution of theory  
oriented economics journals since 1930 This book also includes topics on the historical research of the Japanese foundations

of modern economics the transformation of the economics of Keynes into Keynesian economics Japanese developments in econometrics and Martin Bronfenbrenner's visit to Japan in the post WWII period This book provides insight into the economic research done by Japanese scholars in the international context It traces how during the period 1900-1960 economics was harmonized with economics and a standard economics was re-shaped on the basis of mathematics thanks to economists' appetite for rigor and will help to contribute to existing literature
