Collinge, 2004 *Current Issues in Environmental Economics* Per-Olov Johansson, Bengt Kriström, Karl-Göran Mäler, 1995 This text examines some major issues in environmental economics looking in particular at the issue of unpriced services provided by the environment and how to value them *Game Theoretic Problems in Network Economics and Mechanism Design Solutions* Y. Narahari, Dinesh Garg, Ramasuri Narayanam, Hastagiri Prakash, 2009-04-03 This monograph focuses on exploring game theoretic modeling and mechanism design for problem solving in Internet and network economics For the first time the main theoretical issues and applications of mechanism design are bound together in a single text *Introduction to the Law and Economics of Environmental Policy* T. Swanson, 2002-08-15 Three important issues concerning institutional design are policies instruments and enforcement This volume surveys each of the issues and emphasises the common themes arising in optimal institutional design It looks at the importance of institutional design in addressing social problems **The Axiomatics of Economic Design, Vol. 1** William Thomson, 2023-09-08 This textbook is Volume 1 of a two volume set on the axiomatics of economic design Its central argument is that economic institutions are not God given they are man made Their ultimate goal is to promote social welfare The book describes the axiomatic approach to design It consists in the formulation of criteria of desirability of solution mappings and of the examination of their logical implications when imposed in various combinations Its goal is to identify as precisely as possible the line that separates those combinations of desiderata that are compatible and those that are not The end product of axiomatic work are menus of choices for practitioners to choose from when they have to make a decision The first volume offers pedagogical coverage of the axiomatic approach to economic design in the form of answers to questions posed by a young person curious about it It introduces readers to what motivates economic design It continues with the mathematical representation of a class of allocation problems The bulk of the volume is to present structured inventories of the field of axioms arranged by format first and content next These chapters are followed by a user s manual on the axiomatic method Lastly the volume discusses how economic design can be aided by other disciplines in particular philosophy mathematics and computer science *Contemporary Economic Issues* Murat Sertel, 2016-01-01 A guide to the experiences of economic reform since the second World War and system reform and economic integration across

the world in the past decade The first part of the book examines why only a small number of developing countries have succeeded in their modernization attempts this century What lessons can be learnt from the successes of the East Asian NIEs and failures of other economies to emulate them The very different experiences of the transition to market economies in the former socialist countries of Eastern Europe and China is the focus of the next section with comparisons drawn with the Latin American reform experience especially in Chile The effects of economic integration schemes are examined in the final sector with case studies of Tunisia and Morocco s Free Trade Agreements with the EU and of economic integration and the Arab Israeli peace process

The Impact of Economic Policies on Poverty and Income Distribution François Bourguignon,Luiz A. Vincent,2003 The Handbook of Environmental Economics focuses on the economics of environmental externalities and environmental public goods Volume I examines environmental degradation and policy responses from a
