Handbook of Defense Economics Todd Sandler, Keith Hartley, 2007-04-12 The second volume of the Handbook of Defense Economics addresses defense needs practices threats and policies in the modern era of globalization This new era concerns the enhanced cross border flows of all kinds e g capital and labor flows revolutionary rhetoric guerrillas and terrorists including the spillovers of benefits and costs associated with public goods and transnational externalities i e uncompensated interdependencies affecting two or more nations These ever increasing flows mean that military armaments and armies are less able to keep out security threats Thus novel defense and security barriers are needed to protect borders that are porous to terrorists pollutants political upheavals and conflicts Even increased trade and financial flows imply novel security challenges and defenses Globalization also underscores the importance of a new set of institutions e g the European Union and global governance networks and agents e g nongovernmental organizations and partnerships This volume addresses the security challenges in this age of globalization where conflicts involve novel tactics new technologies asymmetric warfare different venues and frightening weapons Volume 2 contains topics not covered in volume 1 i e civil wars peacekeeping economic sanctions the econometrics of arms races conversion peace economics and the interface of trade peace and democracy Volume 2 also revisits topics from volume 1 where there has been a significant advancement of knowledge i e conflict analysis terrorism arms races arms trade military manpower and arms industries All of the main securities concerns of today are analyzed Chapters are written by the leading contributors in the topic areas Up to date surveys on the pressing defense issues theoretical empirical and policy issues Coverage of theoretical and empirical studies of terrorism Contributions by the leading researchers in the field of defense economics

Defense Economics Marcus Matthias Keupp, 2021-05-21 This textbook examines the economic problems of military organizations from an institutional perspective It discusses the efficiency and effectiveness of military performance using a capability based conceptualization Constitutional historical and economic considerations complement the analysis Neither the analysis nor the conclusions depend on any specific armed force culture organization or language On the contrary the challenge of defense economics analysis and armed forces management is reduced to a fundamental economic problem and solutions to this problem are offered This book is a must read for students scholars and practitioners interested in a better understanding of defense economics

The Economics of Human Systems Integration William B. Rouse, 2011-04-22 Fundamental Economic Principles Methods and Tools for Addressing Human Systems Integration Issues and Tradeoffs Human Systems Integration HSI is a new and fundamental integrating discipline designed to help move business and engineering cultures toward more human centered systems Integrating consideration of human abilities limitations and preferences into engineering systems yields important cost and performance benefits that otherwise would not have been accomplished In order for this new discipline to be effective however a cultural change starting with organizational leadership is often necessary The Economics

of Human Systems Integration explains the difficulties underlying valuation of investments in people's training and education safety and health and work productivity. It provides an overview of how the field of economics addresses these difficulties focusing on human issues associated with design development production operations maintenance and sustainment of complex systems. The set of thought leaders recruited as contributors to this volume collectively provides a compelling set of data and principles for assessing the economic value of investing in people not just in general but in specific investment situations. The early chapters provide the contexts for HSI and investment analysis illustrating the enormous difference context makes in how issues are best framed and analyzed. A host of practical methods and tools for investment valuation are then presented. Provided are a variety of real world applications of economic analysis ranging from military acquisition and automotive investment to healthcare and high tech investments in general in both the U S and abroad. A range of economics based methods and tools for cost analysis cost benefit analysis and investment analysis as well as sources of data for performing such analyses. Differing perspectives on economic decision making including a range of private sector points of view as well as government and regulatory perspectives. In addition five real world case studies illustrate how such valuations have been done and their major impacts on investment decisions. HSI professionals systems engineers and finance professionals who address investment analysis will appreciate the wide range of methods and real life applications. Senior undergraduates and masters level graduate students will find this to be an excellent textbook that provides theory and supports practice.

The Economics of Defence Gavin Kennedy, 1975

The Future of the United Nations System Chadwick F. Alger, 1998 What does the future hold for the UN? In this book twenty two scholars from all continents contribute twelve chapters that cover prevention of violence creating economic and social structures that sustain human fulfilment sharing and protecting the commons and peace education. The search for future potential based on experience in these twelve laboratories leads to sixty six recommendations for new institutions and programs on issues that include controlling weapons humanitarian intervention collaboration between UN peacekeepers and NGOs human rights economic policies advancement of women refugees ecological security communications and peace education. These recommendations are brought together in a concluding chapter and summarized in the appendix. Most of the recommendations do not require amendments to the UN Charter or to the treaties establishing the UN Specialized Agencies. Instead their implementation would require creative efforts of Member States secretariats NGOs and dedicated individuals that are pointed toward attainment of multilateral capacity for coping with an array of global problems that increasingly threaten the quality of human life. This is stimulating reading for anyone who wants to be

challenged to think creatively about the potential for coping with a growing array of global problems *The New Palgrave Dictionary of Economics*, 2016-05-18 The award winning *The New Palgrave Dictionary of Economics* 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product **The Political Economy of Defence** Ron Matthews, 2019-05-09 A contemporary and comprehensive analysis of national and supranational defence governance in an uncertain and increasingly dangerous world This book will appeal to policymakers analysts graduate students and academics interested in defence economics political economy public economics and public policy Japan's Military Renaissance? Keisuke Matsuyama, Ron Matthews, 2016-07-27 The purpose of this book is to examine the security related aspects behind Japan's emerging internationalism Japan has for some time been projecting a higher international profile which the Diet's approval to allow Japanese armed forces to operate abroad is but one manifestation The book's scope is not limited to military issues it embraces a spectrum of security related topics such as constitutional amendment international re alignment and cooperation defence industrialisation Japan US relations and technology leakage and Japan's role in the new international order **The Defense Economic Adjustment Act** United States. Congress. House. Committee on Education and Labor. Subcommittee on Employment Opportunities, 1983 Handbook of Defense Economics Keith Hartley, T. Sandler, 1995-12-11 This handbook examines the state of defence economics covering theoretical analysis econometric techniques and policy issues The chapters fall into two categories surveys and conceptual studies **The Economics of UN Peacekeeping** Nadège Sheehan, 2011-07-25 Peacekeeping is a security concept that is very representative of the current interventionism multilateralism human rights and humanitarian ideas UN peacekeeping plays an important role in international security and includes various activities that go beyond the original roles assigned to UN armed forces e.g humanitarian aid election supervision disarmament mine clearance civilian protection and peacebuilding The problem is to define the economic efficiency of these operations and to develop some recommendations in the context of an economic globalization process Although UN peacekeeping has shortcomings it must be considered essential for organizing and defending the world politico economic order UN peacekeeping is a political activity but its production strongly depends on nations economic considerations Governments make political decisions that also take into account the economic gains they expect to obtain from their contribution to any specific mission With low means and inadequate strategies to meet the challenges UN peacekeeping must pay particular attention to resolving the problems of free riding and of prisoner's dilemma in contributions that delay deployments and create significant financial problems Understanding how peacekeeping can be most cost effectively carried out while considering the importance of legitimacy in interventions is essential This book believes that regional organizations can ease the UN's financial responsibility by managing conflicts in their regions But to

be most effective they must involve the UN in their interventions This book also emphasizes UN peacekeeping trust funds as the key to better financial effectiveness It strongly recommends that NATO be empowered by the UN with the role of global peace police and proposes the establishment of a UN high ranking team of international specialists in peacekeeping issues This research should be of interest to students and researchers looking at international and political economics as well as international relations defence security and peace studies
