An Economic History of Nineteenth-Century Europe Ivan Berend, 2013 A transnational survey of the economic development of Europe exploring why some regions advanced and some stayed behind Economic History of a Divided Europe Ivan T. Berend, 2020-02-28 This book presents the sharp regional differences within the integrating European continent Four regions Northwestern Europe Southern Europe Central Europe and Eastern Southeastern Europe represent high medium and relatively less developed levels of economic advancement These disparities have emerged as a result of historical differences that produced and reinforced cultural and behavioral differences The author examines the distinctions between the regions looks at how these differences transpired and became so retrenched and answers the question of why some countries were able to elevate to higher levels of economic development while others could not This book is unique in that it provides a timely historical analysis of the main causes of the most pressing conflicts in Europe today Readers will come away from this book with a deeper understanding of the sharp divergence in economic standing between the four different regions of Europe as well as knowledge about how institutional corruption and other cultural features exacerbated these variations The book also offers a better understanding of major European Union conflicts between member countries and between member and nonmember countries as well as the rise of autocratic regimes in certain countries The book begins with a short history of European integration throughout European civilization and then goes on to discuss the modern reality of integration and attempts to homogenize the Continent that divided into four different macro regions It will primarily appeal to scholars researchers and students studying Europe from various fields including economics business history political science and sociology as well as a general readership interested in Europe's past present and future **AP European History Premium, 2022-2023: 5 Practice Tests + Comprehensive Review + Online Practice** Seth A. Transatlantic Slave Trade David Eltis,1987-06-11 This watershed study is the first to consider in concrete terms the consequences of Britain's abolition of the Atlantic slave trade Why did Britain pull out of the slave trade just when it was becoming important for the world economy and the demand for labor around the world was high Caught between the incentives offered by the world economy for continuing trade at full tilt and the ideological and political pressures from its domestic abolitionist movement Britain chose to withdraw believing in part that freed slaves would work for low pay which in turn would lead to greater and cheaper products In a provocative new thesis historian David Eltis here contends that this move did not bolster the British economy rather it vastly hindered economic expansion as the empire's control of the slave trade and its great reliance on slave labor had played a major role in its rise to world economic dominance Thus for sixty years after Britain pulled out the slave economies of Africa and the Americas flourished and these powers became the dominant exporters in many markets formerly controlled by Britain Addressing still volatile issues arising from the clash between economic and ideological goals this global study illustrates how British abolitionism changed the tide of economic and human history on three continents A History of World Societies, Combined Volume John P. America and Central Europe Henryk Szlajfer offers against the background of developments in Latin America mainly Brazil and Central Europe mainly Poland in times of first globalization from late 19th century until late 1930s a reinterpretation of economic nationalism both as an analytical category and historical experience Also critically explored are attempts at proto economic nationalism in early 19th century Poland and Latin America as well as links between economic nationalism and the emergence of integral political nationalism and authoritarianism Economic nationalism is interpreted as historically significant world wide phenomenon intimately linked with the birth development and crisis of capitalist modernity and as a response to underdevelopment under first globalization Continuity of economic nationalism under present globalization is suggested

Socialist Unemployment Susan L. Woodward, 2020-10-06 In the first political analysis of unemployment in a socialist country Susan Woodward argues that the bloody conflicts that are destroying Yugoslavia stem not so much from ancient ethnic hatreds as from the political and social divisions created by a failed socialist program to prevent capitalist joblessness Under Communism the concept of socialist unemployment was considered an oxymoron when it appeared in postwar Yugoslavia it was dismissed as illusory or as a transitory consequence of Yugoslavia's unorthodox experiments with worker managed firms In Woodward's view however it was only a matter of time before countries in the former Soviet bloc caught up with Yugoslavia confronting the same unintended consequences of economic reforms required to bring socialist states into the world economy By 1985 Yugoslavia's unemployment rate had risen to 15 percent How was it that a labor oriented government managed to tolerate so clear a violation of the socialist commitment to full employment Proposing a politically based model to explain this paradox Woodward analyzes the ideology of economic growth and shows that international constraints rather than organized political pressures defined government policy She argues that unemployment became politically invisible owing to its redefinition in terms of guaranteed subsistence and political exclusion with the result that it corrupted and ultimately dissolved the authority of all political institutions Forced to balance domestic policies aimed at sustaining minimum standards of living and achieving productivity growth against the conflicting demands of the world economy and national security the leadership inadvertently recreated the social relations of agrarian communities within a postindustrial society
