International Labour Documentation ,1994 **Human Resource Management and the Institutional Perspective** Geoffrey Wood,Chris Brewster,Michael Brookes,2014-06-05 One of the most influential debates across business and management studies has centered on the relative impact of institutions on the fortunes of firms and nations However analyses have primarily focused on institutional effects on societal features rather than actual firm practices This volume brings together recent trends in comparative institutional analysis with a rich body of data on firm level human resource

management practice consolidating and extending more than a decade of research on the topic Human Resource Management and the Institutional Perspective explores the overlapping and distinct elements in work and employment relations both within and across country lines The authors focus on intra firm relations internal diversity within varieties of capitalism and the uneven and experimental nature of systemic change all the while employing an impressive level of theoretical rigor and empirical evidence In a single volume this text unites soundly based theoretically strong and empirically new chapters that bring advances in institutional theory to bear on the subject of international and comparative human resource management This book is a valuable resource for students and scholars interested in contemporary developments in institutional theory the relationship between regulation and practice and innovation and continuity in human resource management *The Oxford Handbook of Employment Relations* Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13

There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management
