Economic Thinking in a Canadian Context Gordon F. (Gordon Francis) Boreham, Leftwich, Richard H, 1971 *Economic Thinking in a Canadian Context* Gordon Francis Boreham, Richard H. Leftwich, 1971 **Student Workbook and Study Guide to Accompany Economic Thinking in a Canadian Context** Gordon F. (Gordon Francis) Boreham, Joseph J. Klos, Leftwich, Richard H, 1971 *Instructor's Key to the Study Guide to Accompany Economic Thinking in a Canadian Context* Gordon F. (Gordon Francis) Boreham, Joseph J. Klos, Leftwich, Richard H, 1971 A History of Canadian Economic Thought Robin Neill, 1991-06-06 A History of Canadian Economic Thought investigates the relationship between the evolution of economic theory and the particular geographical and political context of that theory Theories and policies are critiqued by testing them against both the conditions to which they were applied and against competing theories Not surprisingly Canadian economics reflects a number of significant issues in Canadian history Neill argues that there were distinctive economic movements in nineteenth century Ontario and in early twentieth century Quebec but that these have been displaced by an emerging North American discourse The book includes full accounts of the work of all the major figures in Canadian economics including John Rae H A Innis and Harry Johnson *Student Workbook and Study to Accompany Economic Thinking in a Canadian Context* Gordon Francis Boreham, 1971 Economic Theory, Welfare, and the State Athanasios Asimakopulos, Robert D. Cairns, 1991-02-01 Economic Theory Welfare and the State looks at how economic theory can be used to investigate and analyse the operations of market economies and to provide the basis for improvements in government policy making The collection begins with two chapters on the history of economic thought followed by an exploration of possible areas of conflict between the interests of groups and individuals and an insightful blend of economic history and economic theory that sheds light on the Canadian government's policy of settling the Prairies by providing land grants Also included are a critical analysis of rational expectations models and their use in econometrics an examination of why money should be treated as a public good and two contributions on international trade theory Two chapters deal with the problem of maintaining satisfactory levels of employment and three chapters examine different aspects of public pensions Among the contributors to this volume are a former teacher of Weldon's his fellow students and colleagues and former students They are Louis Ascah Athanasios Asimakopulos Clarence Lyle Barber Kenneth E Boulding John Burbidge Robert D Cairns John S Chipman John H Dales Christopher Green Peter Howitt Murray C Kemp Gideon Rosenbluth Robin Rowley Thomas K Rymes David Schwartzman Dan Usher and Shigemi Yabuuchi *A new theory of value* Robin Neill, 1972-12-15 Continuing problems in the Canadian economy have been the occasion of a partisan debate between nationalists and continentalists both of whom claim the staples thesis to be the premise of their proposed solutions As one of the principal progenitors of that premise Harold Innis contributed much to the roots of this debate and its present flowering cannot be

understood apart from what he had to say This is an account of the Canadian problem as it was elaborated in the staples thesis of H A Innis But it is more than that In order to cope with the economics of a satellite country in the age of machine and post machine industry Innis found it necessary to fill in the empty boxes of neoclassical value theory and at times to make new ones when the standard theory provided insufficient room to contain the facts of the case He went beyond price theory to come to grips with the unsolved problems of growth and to work out answers of his own The result was a new kind of economics based as was the economics of J M Keynes on the assertion of a new ethical foundation Unlike Keynes Innis was concerned with the long run for we can survive now only by understanding the coping with the long run consequences of past policies and given the right policies now the nation as a whole will live on Innis and Keynes are like two sides of a coin in the new issue of value theory We can flip that coin to see which policy will come up or we can account for both sides in some sort of rational compromise A New Theory of Value is a plea for a rational approach to the problem **The Economic Mind in**

America History of Economics Society. Conference,1998 The Economic mind of America examines the concept of American economic thought reassessment of pioneering American policy analysts such as Irving Fisher Wesley Mitchell Harold Moulton and Leo Paslovsky as well as the theoretical contributions of Herbert Davenport and Frank Knight Thorstein Veblen s institutional economics and an exploration of the influence of Canadian and European economic thought analysis of contributions of C S Peirce Alvin Johnson and science fiction author Robert A Heinlein American economists interests in issues from 1886 1995 *Routledge Encyclopedia of International Political Economy* R. Bonham, 2019-03-01 Trade Offs The History of Canada U S Trade Negotiations was the subject of the Canadian Business History Association's annual conference held in November 2018 The conference discussed the history of Canada's efforts in negotiating past trade agreements with the United States including the Reciprocity Agreement of 1854 the AutoPact 1965 the Free Trade Agreement 1987 the North American Free Trade Agreement 1994 and the most recent United States Mexico Canada Agreement 2018 A critical assessment is provided through twelve presentations which are intended to be the basis of broad guidelines around future trade negotiation efforts **Women's Health in Canada** Marina Morrow, Olena Hankivsky, Colleen Varcoe, 2008-05-03 In recent years healthcare professionals have recognized the distinctly different healthcare needs and concerns of men and women Women's health in particular has come into its own in the last two decades In Canada however there has been little available in the way of a general text on women's health This volume works toward filling that gap by providing a resource for teaching and understanding women's health in this country To lay out the methodological and theoretical foundations for their study editors Olena Hankivsky Marina Morrow and Colleen Varcoe bring together an interdisciplinary group of scholars and practitioners from economics anthropology sociology nursing political studies women's studies and psychology Contributors draw on the rich history of the Canadian women's health movement providing analysis of that history and of the emergent theory policy and practice Aimed at undergraduate and graduate students as well as practitioners the collection adopts an intersectional approach looking closely at social factors such as gender race ethnicity class sexuality and gender identity and analysing how they relate both to each other and to women's health Connections between the social economic and cultural contexts of women's lives and their physical spiritual and mental well being are a primary focus Providing a much needed resource for teachers students and practitioners of women's health in Canada this comprehensive volume makes an important contribution to the literature *Political Thought in Canada* Katherine Fierlbeck, 2006-03-01 What if anything makes Canada's political identity unique Pollsters can measure values but they cannot explain how these values arose over time why they changed or how people have attempted to make sense of them within a changing social and political environment By examining the history of political ideas in Canada we can better understand why Canada takes the shape that it does In this book Katherine Fierlbeck looks at the legacy of ideas taken from or shaped in reaction to the nations that have been most influential to Canada's development the United Kingdom and the United States The first section looks specifically at the nature of toryism constitutional liberalism and market liberalism Then she examines the evolution of social justice in Canada Does the country have as J S Woodsworth hoped a definitive third way The final section focuses upon debates over cultural identity and minority rights Contemporary political discussions in Canada are very much based upon the expressions of French Canadian nationalism that have existed as long as and perhaps even longer than the country itself

How have these ideas influenced current thinking about culture and accommodation The experiences characterized by Canadian political thought also provide insight and ideas for nations around the world as their citizens struggle with similar questions The political dynamics of the present are a product of how Canadians have viewed their country or a vision of their country in the past These ideas of Canada in history and in myth provide a way of thinking about politics that may provoke and inspire Canadians and others to reflect upon their future

Recent Social Trends in Canada, 1960-2000 Lance W. Roberts, 2005 Canadian society has changed dramatically since 1960 This work captures the scope and range of these changes through a systematic documentation of seventy eight social trends The introduction summarizes and locates the major waves of change The authors then document each trend in relation to eighteen thematic groups that include age community women labour management stratification social relations the state mobilizing institutions social forces ideologies households lifestyle leisure education integration and attitudes and values In contrast to many recent works and journalistic reports *Recent Social Trends in Canada* concentrates on the trajectory of change rather than on current events It provides a longitudinal context in which unfolding events can be interpreted in a broader historical and international context Comparable volumes in the McGill Queen's Comparative Charting of Social Change series describe similar tendencies in the United States Quebec France Germany Italy Greece Russia and Bulgaria making it possible to situate the Canadian experience in a global context

The New Industrial Geography Trevor Barnes, Meric S Gertler, 2002-01-04 Drawing on the theoretical resources of institutional economics *The New Industrial Geography* opens new perspectives in economic geography In its focus on historical and geographical context institutional embeddedness and tacit rules and formal regulations institutional economics is shown to be the perfect basis for understanding the profound economic and geographical changes of the last two decades and on which also to build a new kind of industrial geography Issues covered include the retheorization of the geography of industrial districts the analysis of institutional thickness and the economic geographical effects of institutional rigidity and sclerosis the economic geographical consequences of new regulatory bodies and policies and the geographically situated character of institutions and regulatory frameworks and the effects of separating them from their originating context the development of new strategies for achieving more equitable forms of regional development
