Environmental Impacts Jan Bojo,1991 **Economic Analysis Of Environmental Problems** Gregory C Chow,2014-11-27

This book introduces the basic tools of dynamic optimization in economics to study environmental problems applies econometric methods to estimate and test the models derived by dynamic optimization and discusses environmental problems in a broad perspective including the design and implementation of environmental policies Although the coverage is selective it represents what the author has to offer from his perspective and experience gained in research in dynamic optimization econometrics and policy analysis especially for China The volume is self contained for readers with mathematical background of first year graduate students in the analytical fields of science and engineering but only limited training in economics while an economics text presumes more knowledge of economics Once the tools are mastered the reader can pursue his own research on the topic if he is interested or simply become a more mature citizen in the global economy

The Application of Economic Techniques in Environmental Impact Assessment David E. James,2013-03-09 The contribution of economic thought and method to environmental management needs practical illustration Too few books on the subject achieve such an outcome This book is among the notable exceptions That economics can provide a powerful vehicle for communicating an integrated understanding of the often diverse scientific findings germane to environmental impact assessment needs to be illustrated convincingly This book does just that But it does more It speaks across cultures not to transfer know how from one culture to another but rather to activate an effective exchange of insights from one locale on the planet to another As such it is a genuine contribution to the great environmental exhortation of our times think globally act locally Too often the people best placed to make such contributions are too committed to practical outcomes and making a living doing so Just occasionally however they can be persuaded to make the special effort required to communicate globally In this book David James has once again orchestrated the contributions of virtuoso performers In doing so he has emulated the contribution he sustained throughout the International Drylands Project and preparation of the books written with John Dixon and Paul Sherman *The Economics of Dry and Management and Case Studies in Dry and Management* Earthscan London Taken together with his recent work as Special Commissioner for the path breaking national Forest and Timber Inquiry for the Australian Government we have a body of work characterised by great worthiness integrity and true global significance

Environment and Development: An Economic Approach Jan Bojö,Karl-Göran Mäler,Lena Unemo,2013-03-09 This book is the second edition of a text based on a report commissioned by the Swedish International Development Authority SIDA The financial grant from SIDA which made the work possible is hereby gratefully acknowledged There are already many books on the market about environmental economics some of them very good What is special about this one We do not claim to have obtained new results but we have our own way of presenting the subject matter In particular we are of the opinion that policy failures are often overlooked as an obstacle to efficient environmental management Although the main emphasis in this book is on project level analysis it is essential that such analyses be linked

to an understanding of the disincentives for environmental improvements that general economic and particular environmental policies provide. Another essential feature of the book although this is not unique is the links provided between theory and empirical illustrations. We hope that this will illustrate to our readers the practical usefulness but also the difficulties of applying economics to environmental problems. In particular we hope that the text can be of interest to decision makers, development programme personnel, teachers and the general public interested in how economics can contribute to better environmental decision making. In principle this book can be read by anyone interested in the subject matter without any formal education in economics. However, some background in microeconomic theory makes the reading easier.

Economic Analysis of Environmental Policies Donald N. Dewees, C.K. Everson, William A. Sims, 1975-12-15. A framework is concisely presented for the economic analysis of pollution problems and for evaluating proposed solutions. The substantial recent literature on environmental economics is reviewed and related to Ontario environmental policy. Topics include the theory of externalities as an explanation of environmental problems, policy objectives, costs of information and monitoring and the impact of these costs on control policy selection. Three case studies of specific pollution problems: sulphur dioxide from a smelter, lead from downtown factories and urban automobile emissions are given and possible solutions explored. The authors' methodology is applicable not only to air and water pollution but also to noise, aesthetic degradation and solid waste. This study will be welcomed by specialists, civil servants and students trying to understand the economic aspects of environmental maintenance.

Economic Analysis of Environmental Problems in Tanneries and Textile Bleaching and Dyeing Units and Suggestions for Policy Action, **Environmental Economics and Investment Assessment** K. Aravossis, 2006. The current emphasis on sustainable development is a consequence of the general awareness of the need to solve numerous environmental problems resulting from our modern society. This book addresses the topic of Investment Assessment and Environmental Economics in an integrated way in accordance with the principles of sustainability, considering social and environmental impacts of new investments. Bringing together papers from the First International Conference on Environmental Economics and Investment Assessment, papers encompass topic areas such as Economy and the Environment, Investment Planning and Assessment, Environmental Economics and Entrepreneurship, Environmental Investment Planning, Sustainable Environmental Management, Environmental Impact Assessments and Investments, Environmental Performance Indicators, Environmental Management Systems, Legislation and Law Enforcement, Cost-Benefits Analysis, Natural Resources Management, Social Issues and Environmental Policies, Risk Management in Environmental Investment, Location Optimization.

Economic Analysis of the Environmental Impacts of Development Projects, 1988. A Theory of the Environment and Economic Systems Reinout Heijungs, 2001. A number of tools for environmental analysis/decision support have been developed over time including life cycle risk assessment. This book aims to reconcile/unify the many different tools into one meta tool.
