*Integration in Times of Crisis* Demosthenes Ioannou, Patrick Leblond, Arne Niemann, 2017-10-02 Few events over the past few decades have given rise to an amount of debate and speculation concerning the state of the European Union EU and the future of European integration as the economic and financial crisis that began in 2007 In spite of substantial media policy making and academic attention the fundamental questions of why and how the euro area EA has remained not only intact but also expanded and integrated further during the crisis require deeper theoretical investigation One needs to understand not only the economics but also the politics and institutions of the crisis A lack of such an understanding is the reason why a number of observers at least initially had a hard time making sense of policy makers decisions and pace thereof including why the EA did not implode as some predicted Economic theories provide a certain perspective for why the crisis occurred and what economic policies were and are needed to resolve it however they fail to capture the deeper roots and management of the crisis In order to improve our understanding of a discussion that has oscillated between fears of EA disintegration on the one hand and the concrete advancement of integration during the crisis on the other this special collection brings together leading scholars of European integration who apply key theoretical approaches from liberal intergovernmentalism and neofunctionalism to other prominent theoretical accounts that have been applied to European integration such as historical institutionalism critical political economy normative theory and a public opinion approach to the economic and financial crisis The contributions seek to analyse understand and or explain the events that occurred and the reactions to them in order to draw conclusions concerning the applicability and usefulness of their respective theoretical perspectives This book was published as a special issue of the Journal of European Public Policy EBOOK: The European Union: Economics, Policy and History SENIOR, 2011-11-16 EBOOK The European Union Economics Policy and History *Politics in the European Union* Ian Bache, Simon Bulmer, Stephen George, Owen Parker, 2015 This is an account of the main developments in the process of European integration It provides coverage of theory history member states institutions and policies drawing on academic debates including issues of legitimacy and globalisation The External Action of the European Union Sieglinde Gstöhl, Simon Schunz, 2021-03-26 This groundbreaking new textbook offers extensive coverage of EU External Action studies from its major concepts to the key theories in the field Over the past decades the European Union has progressively developed into a significant global actor in an increasing number of policy fields This long awaited volume looks into different ways of conceptualizing the EU as a global actor the processes and impact of EU external action explanations offered by IR and integration theories the discursive normative practice and gender turns and the decentring agenda for EU external action The book offers a reader friendly guidance on these various ways in which to study the EU as a global actor each chapter introduces one concept approach or theory and illustrates its application by a case study of EU external action In drawing the different perspectives together the book underscores that EU External Action Studies is becoming an academic speciality in its own right Written by leading experts the volume will make essential reading for
