territories of imperial conquest or ones much closer to home      Economics of Agriculture ,1969      Annual Report of the National Bureau of Economic Research National Bureau of Economic Research,1967      *Aristocrats of Color* Willard B. Gatewood,2000-05-01 Every American city had a small self aware and active black elite who felt it was their duty to set the standard for the less fortunate members of their race and to lead their communities by example Professor Gatewood s study examines this class of African Americans by looking at the genealogies and occupations of specific families and individuals throughout the United States and their roles in their various communities from publisher description      **Regional Competitiveness** Ron Martin,Michael Kitson,Peter Tyler,2012-11-12 There is now a wide spread interest in regions as a key focus in the organization and governance of economic growth and wealth creation This important book considers the factors that influence and shape the competitive performance of regions This is not just an issue of academic interest and debate but also of increasing policy deliberation and action However as the readings in this book make clear the very idea of regional competitiveness is itself complex and contentious Many academics and policy makers have used the concept without fully considering what is meant by the term and how it can be measured Policy formulation has tended to rush ahead of understanding and analysis and the purpose of this book is to close this important gap in understanding This book was previously published as a special issue of Regional Studies      **Chapters on Statistical Methods as Applied to Economic Business Problems** Frederick Cecil Mills,1923      **Subject Index of the Modern Works Added to the Library of the British Museum in the Years ...** British Museum,1922      **Latina Issues** Antoinette Sedillo López,1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company      *Japanese Studies from Pre-History to 1990* Richard Perren,1992      **The Cambridge Review** ,1920 Vols 1 26 include a supplement The University pulpit vols 1 26 no 1 661 which has separate pagination but is indexed in the main vol      **Problems of Staple Production in Canada** Harold Adams Innis,2022-08-01 In Problems of Staple Production in Canada Harold Adams Innis presents a thorough analysis of the economic and social ramifications of Canada s staple based economy Through a critical examination of resource extraction and its geographical implications Innis employs a unique blend of empirical data and theoretical insights revealing how staple production shapes societal structures and national policies His writing is characterized by meticulous research and a profound understanding of the interplay between economy and culture situating the work within the broader context of economic historiography and Canadian studies Harold Adams Innis a prominent Canadian economist and communication theorist was deeply influenced by his experiences in the Canadian agricultural landscape and his education at the University of Toronto His scholarship reflects a commitment to understanding how communication mediums combined with economic practices forge cultural identities Innis s interdisciplinary approach draws from history economics and sociology allowing for a nuanced perspective on staple production which remains a foundational aspect of Canadian industry Problems of Staple Production in Canada is essential reading for scholars and students delving into the intersections of economics geography

**Monumental Ambivalence** Lisa C. Breglia, 2009-12-03 From ancient Maya cities in Mexico and Central America to the Taj Mahal in India cultural heritage sites around the world are being drawn into the wave of privatization that has already swept through such economic sectors as telecommunications transportation and utilities As nation states decide they can no longer afford to maintain cultural properties or find it economically advantageous not to do so in the globalizing economy private actors are stepping in to excavate conserve interpret and represent archaeological and historical sites But what are the ramifications when a multinational corporation or even an indigenous village owns a piece of national patrimony which holds cultural and perhaps sacred meaning for all the country's people as well as for visitors from the rest of the world In this ambitious book Lisa Breglia investigates heritage as an arena in which a variety of private and public actors compete for the right to benefit economically and otherwise from controlling cultural patrimony She presents ethnographic case studies of two archaeological sites in the Yucatán Peninsula Chichén Itz and Chunchucmil and their surrounding modern communities to demonstrate how indigenous landholders foreign archaeologists and the Mexican state use heritage properties to position themselves as legitimate heirs and beneficiaries of Mexican national patrimony Breglia's research masterfully describes the monumental ambivalence that results when local residents excavation laborers site managers and state agencies all enact their claims to cultural patrimony Her findings make it clear that informal and partial privatizations which go on quietly and continually are as real a threat to a nation's heritage as the prospect of fast food restaurants and shopping centers in the ruins of a sacred site
