**Economics and Management of Networks** Gérard Cliquet, George Hendrikse, Mika Tuunanen, Josef Windsperger, 2007-03-20 Previous research on the institutional structure of franchising networks Bri ley et al 1991 Lutz 1995 Shane 1998 Lafontaine and Shaw 1999 2005 fuso 2002 Penard et al 2003a b does not explain the governance structure of the franchising firm as an institutional entity that consists of two interrelated parts Residual decision rights and ownership rights The latter includes not only residual income rights of franchised outlets but also residual income rights of franchisor owned outlets Previous studies primarily examines the incentive signalling and screening effects of fees royalties and other contractual provisions from the point of view of organizational economics see Dnes 1996 for a review without taking into account the interactions between residual decision and residual income rights as interrelated parts of the governance structure This paper fills this gap in the literature According to the property rights view decision rights should be allocated according to the distribution of intangible knowledge assets between the franchisor and franchisee and ownership rights should be assigned according to the residual decision rights Since ownership rights are diluted in franchising networks the dilution of residual income rights of franchised outlets is compensated by residual income rights of company owned outlets Under a dual ownership structure company owned outlets

compensate the disincentive effect of low royalties for the franchisor and low royalties strengthen the investment incentives for the franchisee
