INTRODUCTION AND OVERVIEW This book originated in a symposium on business ethics that took place in the faculty of commerce at the University of Canterbury in September 1997 Professor Werhane who was a visiting Erskine Fellow provided the keynote address Contributions to the proceedings were inter disciplinary spanning theory and practice Subsequent contributions were obtained from within New Zealand and from Asia The book starts off on rather a pessimistic note the new managerialism the kind of thing Scott Adams jokes about in the world famous Dilbert cartoons is economically suspect and psychologically damaging Handbook on the Economics and Theory of the Firm Michael Dietrich, Jackie Krafft, 2012-01-01

Staebus, 2021-12-29 A view of accounting as a practical activity a service function whose value depends on its adaptation to the environment in which it serves is a good place to start this book originally published in 1996 While arts such as music and drama can be said to serve human needs their development presumably cannot be explained primarily by reference to the economic features of their environments By contrast an economic service function such as accounting develops in response to economic features of its environment The objective of this book is to stimulate interest in explaining the

development of specific features of accounting as we know it in the firms that are so important to the economies of Western industrialized countries by reference to the economic features of those firms The emphasis in this work is on the influence of economic features of the firm in the development of accounting
