

The economic evaluation of engineering projects typically involves estimation of:

- * Equipment
- * Installation
- * Raw materials
- * Energy
- * Maintenance costs

Disposal and pollution control costs are often factored into these calculations in determining economic rates of return, but other regulatory and social costs are not.

>>>> *It's important to consider them in the economic analysis of pollution prevention projects too.*

Economic Methods For Multipollutant Analysis And Evaluation Pollution Engineering And Technology 25
