Economics And Language Five Essays:

Economics and Language Ariel Rubinstein, 2000-09-14 A challenging and accessible analysis of the relationship between economics and language

The Economics and Language Ariel Rubinstein, 2000 Arising out of the author's lifetime fascination with the links between the formal language of mathematical models and natural language this short book comprises five essays investigating both the economics of language and the language of economics Ariel Rubinstein touches on the structure imposed on binary relations in daily language the evolutionary development of the meaning of words game theoretical considerations of pragmatics the language of economic agents and the rhetoric of game theory These short essays are full of challenging ideas for social scientists that should help to encourage a fundamental rethinking of many of the underlying assumptions in economic theory and game theory

The Economics of Language Policy Michele Gazzola, Bengt-Arne Wickström, 2016-09-30 Insights from the application of economic theories and research methods to the management of linguistic diversity in an era of globalization In an era of globalization issues of language diversity have economic and political implications Transnational labor mobility trade social inclusion of migrants democracy in multilingual countries and companies international competitiveness all have a linguistic dimension yet economists in general do not include language as a variable in their research This volume demonstrates that the application of rigorous economic theories and research methods to issues of language policy yields valuable insights The contributors offer both theoretical and empirical analyses of such topics as the impact of language diversity on economic outcomes the distributive effects of policy regarding official languages the individual welfare consequences of bilingualism and the link between language and national identity Their research is based on data from countries including Canada India Kazakhstan and Indonesia and from the regions of Central America Europe and Sub Saharan Africa Theoretical models are explained intuitively for the nonspecialist The relationships among linguistic variables inequality and the economy are approached from different perspectives including economics sociolinguistics and political science For this reason the book offers a substantive contribution to interdisciplinary work on languages in society and language policy proposing a common framework for a shared research area Contributors Alisher Aldashev Katalin Buzsi Ramon Caminal Alexander M Danzer Maxime Leblanc Desgagn Peter H Egger Ainhua Aparicio Fenoll Michele Gazzola Victor Ginsburgh Gilles Grenier François Grin Zoe Kuehn Andrea Lassmann Stephen May Serge Nadeau Suzanne Romaine Selma K Sonntag Stefan Sperlich Jos Ramón Uriarte François Vaillancourt Shlomo Weber Bengt-Arne Wickström Lauren Zentz

The Elgar Companion to Social Economics, Second Edition John B. Davis, Wilfred Dolfsma, 2015-05-29 Social economics is a dynamic and growing field that emphasizes the key roles social values play in the economy and economic life This second edition of the Elgar Companion to Social Economics revises all chapters from the first edition and adds

Hegel, Institutions and Economics Carsten Herrmann-Pillath, Ivan Boldyrev, 2014-01-10 Hegel's philosophy has witnessed periods of revival and oblivion at times considered to be an unrivalled

and all embracing system of thought but often renounced with no less ardour This book renews the dialogue with Hegel by looking at his legacy as a source of insight and judgement that helps us rethink contemporary economics This book focuses on a concept of institution which is equally important for Hegel s political philosophy and for economic theory to date The key contributions of this Hegelian perspective on economics lead us to the synthesis of traditional approaches and new ideas gained in economic experiments and advanced by neuroeconomists sociologists and cognitive scientists The proper account of contemporary civil society involves comprehending it as a historically evolving totality of individual minds ideas and intersubjective structures that are mutually dependent tied by recognitive relations and assert themselves as a whole in the ongoing performative movement of objective spirit The ethics of recognition is paired with the ethics of associations that supports moral principles and gives them true concrete universality This unusual constellation of seemingly remote fields suggests that Hegel read in a pragmatist mode anticipated the new theories and philosophies of extended mind social cognition and performativity By providing a new conceptual apparatus and reformulating the theory of institutions in the light of this new synthesis this book claims to give new meaning both to Hegel as interpreted from today and to the social sciences Seen from this perspective such phenomena as cooperation in games personal identity or justice in the version of Amartya Sen s realization focused comparisons are reinscribed into the logic of institutional theory This Hegel clearly goes beyond the limits of philosophical discussion and becomes a decisive reference for economists sociologists political scientists and other scholars who study the foundations and consequences of human sociality and try to explore and design the institutions necessary for a worthy common life

The Economics of Language Barry R. Chiswick, Paul W. Miller, 2007-03-08

Written by two internationally renowned experts in the field this book explores the determinants of dominant language proficiency among immigrants and other linguistic minorities and the consequences of this proficiency for the labour market Using empirical material from a range of countries including the USA Canada Australia and Bolivia the authors develop a range of models of the determinants of dominant language proficiency and use econometric techniques to test them and estimate the magnitude of the effects This volume is an excellent resource for researchers and a fine reader for specialists in labour economics linguistics as well as a number of other disciplines

Foundations of Economic Evolution Carsten Herrmann-Pillath, 2013-01-01

This book is an ambitious intellectual enterprise to build a naturalistic

foundation for economics with amazingly vast knowledge of physical biological social sciences and philosophy Readers will discover that approaches and insights emergent in institutional studies social neuroscience network theory ecological economics bio culture dualistic evolution etc are persuasively placed in a grand unified frame It is written in a good Hayekian tradition I recommend this book particularly to young readers who aspire to go beyond a narrowly specified discipline in the age of expanding communicability of knowledge and ideas Masahiko Aoki Stanford University US Carsten Herrmann Pillath s new book is an in depth application of natural philosophy to economics that draws up an entirely new framework for economic analysis It offers path breaking insights on the interactions between human economic activity and nature and outlines a convincing solution to the long standing reductionism controversy A must read for everyone interested in the philosophical underpinnings of economics as a science Ulrich Witt Max Planck Institute of Economics Jena Germany Big picture philosophy of economics drifted into a dull cul de sac as it became obsessively focused on falsifiability and rationality In this book Carsten Herrmann Pilath pushes the field back onto the open highway by locating economics in the larger frameworks of metaphysics evolutionary dynamics and information theory This is large scale ambitious synthesis of ideas of the kind we expect from time to time to see devoted to physics and biology Why should economics merit anything less But of course this kind of intellectual tapestry must await the appearance of an unusually devoted scholar with special patience and eccentric independence from the pressure for quick returns that characterizes academic life In the person of Hermann Pilath this scholar has appeared No one who wants to examine economics whole and in its richest context should miss his virtuoso performance in this book Don Ross University of Cape Town South Africa and Georgia State University US Herrmann Pillath s work attempts to bring to bear upon the discipline of economics perspectives from other discourses which have been burgeoning recently namely thermodynamics evolutionary biology and semiotics aiming at a consilience contextualized by economic activity and problems This marks the work as a contemporary example of natural philosophy which is now at the doorstep of a revival The overall perspective is that human economic activity is an aspect of the ecology of the earth s surface viewing it as an evolving physical system mediated through distributed mentality as expressed in technology evolution Knowledge is taken to be physical with a performative function as in Peirce s pragmatism Thus the social meanings of expectations prices and credit are found to be rooted in energy flows The work draws its foundation from Hegel and C S Peirce and its immediate guidance from Hayek Veblen and Georescu Roegen The author generates an energetic theory of economic growth guided by Odum s maximum power principle Economic discourse itself is reworked in the final chapter in light of the examinations of the previous chapters naturalizing economics within an extremely powerful contemporary framework Stanley N Salthe Binghamton University US An Oscar winning performance in the theatre of consilience It s hard to know which to praise first Carsten Herrmann Pillath s humility or his ambition He says his book is not a great intellectual feat because he pursues the humble task of putting together the ideas of others When he finally gets to economics he tries to

be as simple as possible and to conceive of economics in terms of the basics at undergraduate level so to say On the other hand the scale of his ambition is to rethink the foundations of economics from first principles while at the same time holding a running dialogue between contemporary sciences and classic philosophy He s much too modest of course because Foundations is a major achievement but his modesty points to what makes it such a powerful treatise the book is not about his preferences or prejudices it is a scientific approach that aims at establishing truthful propositions about reality That is much harder to achieve than grand theories or complicated mathematics because it amounts to a new modern synthesis of the field an achievement on a par with Julian Huxley s whose own modern synthesis of evolutionary theories in the 1940s allowed for the explosive growth of the biosciences over the next decades The structure of the book is simple enough providing a framework for the naturalistic turn in economics Starting from material existence causation and evolution Herrmann Pillath takes us through four fundamental concepts individuals networks institutions and technology before coming finally to the realm of economics proper i e markets However Herrmann Pillath believes that the foundations of economics cannot be found within economics but only in dialogue with other sciences or what he calls the theatre of consilience It s a theatre in which various characters come and go where dialogue ebbs and flows conflicts arise and are resolved and where individual actions can be seen as concepts as leading to higher levels of meaning as the plot unfolds The magic of theatre of course is that the point of intelligibility where the characters actions and narrative resolve into meaningfulness is projected out of the drama itself into the spectator That s you dear reader So it is with economics as a discipline Economics is a player in a much larger performance about what constitutes knowledge and how we know that It is also a player in the economy it seeks to explain To understand why money firms growth prices markets and other staples of economic thought emerge and function the way they do it is necessary situate the analysis beyond economics and the economy and to engage with developments across the human evolutionary and complexity sciences This is what Herrmann Pillath does analyzing a breathtaking range of illuminating and sometimes challenging work along the way We are treated to new ideas about the externalized brain the evolution of knowledge in the Earth System i e not just among humans the role of signs and performativity in these processes as well as that of energetic transformations But Herrmann Pillath is not satisfied with the modest task of bringing the best of modern scientific thought to bear on economic concepts and performances he really does harbor a deeper purpose The clue is in his apparently quixotic desire to hang on to philosophical insights associated with pre evolutionary thinkers like Aristotle and Hegel and his apparently eccentric desire to place the semiotic philosophy of C S Pierce at center stage But the patient observer will see that he is not seeking to change the facts by imposing idealist notions on them after the event Instead he is arguing for a change in the way we perform ourselves in the face of these facts He is looking for a modern day equivalent of Confucius or Socrates one who can imagine values and beliefs that define the human species in a new way For those who have eyes to see as the drama unfolds it may be that we

have found such a figure in Carsten Herrmann Pillath himself modesty ambition and all This is Cultural Science as it should be done John Hartley Curtin University Australia and Cardiff University UK *The Economics of Identity and Creativity* Carsten Herrmann-Pillath,2017-07-28 The Economics of Identity and Creativity aims to sythesize naturalistic evolutionary theory while discussing new developments in economics The author s approach reexamines fundamental assumptions about how a capitalist economy works from the relation between producers and consumers to the functioning of intellectual property rights In the creative economy the author argues identities merge with the flow of creative action To explain these changes he draws upon a range of theories from analytical philosophy to biology and from economics to sociology The first part of the book examines the role of language in the naturalistic approach to cultural science Hermann Pillath draws on Darwinian evolutionary theory to map a concept of knowledge Part Two offers a systematic approach to creativity and identity from the naturalistic point of view developed in Part One Here the author builds a theory of creativity from the ideas of conceptual blending in the cognitive sciences Herrmann Pillath presents a theory of identity based on analytical philosophy and looks at the problems in fixing the boundaries of an individual identity both in biological evolutionary theory and brain sciences He takes the concept of identity through the current economic approaches examining the distinction between social and personal identity This fascinating interdisciplinary work provides a precise argument that the foundations of economics can be found in cultural science and it has evolved to become the cultural institution at the core of the modern economy Cognitive Developments in Economics Salvatore Rizzello,2003-06-26 This book proposes an interdisciplinary approach to the study of human problem solving choice decision making and change to explain economic transactions and the nature and evolution of organisations and institutions *Handbook of Language & Ethnic Identity* Joshua A. Fishman,Ofelia García,Oxford University Press,2010 This volume presents a comprehensive introduction to the connection between language and ethnicity **Contemporary Applied Linguistics Volume 2** Li Wei,Vivian Cook,2009-06-23 Written by internationally renowned academics this volume provides a snapshot of the field of applied linguistics and illustrates how linguistics is informing and engaging with neighbouring disciplines Chapters in this second volume present an overview of new and interdisciplinary applications of linguistics to such diverse fields as economics law religion tourism media studies and health care Both volumes represent the best of current practice in applied linguistics and will be invaluable to students and researchers looking for an overview of the field Discourse Analysis and Austerity Kate Power,Tanweer Ali,Eva Lebdušková,2019-03-04 In the immediate aftermath of the global financial crisis of 2008 governments around the developed world coordinated policy moves to stimulate economic activity and avert a depression In subsequent years however cuts to public expenditure or austerity have become the dominant narrative in public debate on economic policy This unique collaboration between economists and linguists examines manifestations of the discourses of austerity as these have played out in media policy and academic settings across Europe and the Americas Adopting a critical perspective it seeks to

elucidate the discursive and argumentation strategies used to consolidate austerity as the dominant economic policy narrative of the twenty first century **Cognitive Economics** Bernard Walliser,2007-10-25 Written in an informal way this book is addressed to philosophers or cognitive scientists curious of how economics deals with cognition and to graduate students in economics eager to discover how economics evolves It aims at extending the framework of game theory in order to better fit with the results of rapidly increasing laboratory experiments concerned with individual choices and collective interactions Logic, Language and Meaning Maria Aloni,Harald Bastiaanse,Tikitu de Jager,Katrin Schulz,2010-09-21 This book contains the revised papers presented at the Amsterdam Colloquium 2009 held in Amsterdam The Netherlands in December 2009 The 41 thoroughly refereed and revised contributions presented together with the revised abstracts of 5 invited talks are organized in five sections the first section contains extended abstracts of the talks given by the invited speakers the second third and fourth sections contain invited and submitted contributions to the three thematic workshops hosted by the colloquium the Workshop on Implicature and Grammar the Workshop on Natural Logic and the Workshop on Vagueness the final section consists of submissions to the general program The topics covered range from descriptive syntactic and semantic analyses of all kinds of expressions to theoretical logical and computational properties of semantic theories philosophical foundations evolution and learning of language PRIMA 2015: Principles and Practice of Multi-Agent Systems Qingliang Chen,Paolo Torroni,Serena Villata,Jane Hsu,Andrea Omicini,2015-10-20 This book constitutes the proceedings of the 18th International Conference on Principles and Practice of Multi Agent Systems PRIMA 2015 held in Bertinoro Italy in October 2015 The 29 full papers and 24 short papers presented in this volume were carefully reviewed and selected from 94 submissions The conference brings together active researchers developers and practitioners from both academia and industry to showcase share and promote research in several domains ranging from foundations of agent theory and engineering aspects of agent systems to emerging interdisciplinary areas of agent based research **Escape from Democracy** David M. Levy,Sandra J. Peart,2017 This text interrogates the role of experts in governing and proposes a viable alternative governing by democratic discussion *The Idea of History in Constructing Economics* Michael H. Turk,2015-08-11 How scientific is economics This question has often been framed by analogies and correspondences made between economics and other seemingly more well established scientific disciplines starting with classical mechanics At the same time economics is likely to be seen in opposition to or in contrast with history where the reliance upon generalizing rules thought experiments and model construction in economics is set against the amassing of particular facts intended to create narratives in history In this new volume Turk explores the relationship between economics and history including the often fraught one between economics and economic history making the case that economics does in fact require the proper grounding in history that has so often been ignored This work challenges the attempt to link economics with other more clearly scientific disciplines as flawed and fundamentally wrongheaded A key element of this book is its examination of the

gaps and associations that exist in or are seen through linkages with thermodynamics classical mechanics biology literature mathematics philosophy and sociology This exploration is frequently undertaken through study of the work of one or more major figures in the history of economic thought ranging from Quesnay and Smith through Walras and Max Weber to Robinson Krugman David and Arthur Through the possibility of an alternative to the gaps noted in each such comparison the underlying necessary connection between economics and history can be brought out The book concludes by exploring the basis for the positive construction of a historical economics This book is suited for those who study history of economic thought and philosophy of economics Vagueness and Rationality in Language Use and Cognition Richard

Dietz,2019-09-17 This volume presents new conceptual and experimental studies which investigate the connection between vagueness and rationality from various systematic directions such as philosophy linguistics cognitive psychology computing science and economics Vagueness in language use and cognition has traditionally been interpreted in epistemic or semantic terms The standard view of vagueness specifically suggests that considerations of agency or rationality broadly conceived can be left out of the equation Most recently new literature on vagueness has been released which suggests that the standard view is inadequate and that considerations of rationality should factor into more comprehensive models of vagueness The methodological approaches presented here are diverse ranging from philosophical interpretations of rational credence for vagueness to adaptations of choice theory dynamic choice theory revealed preference models social choice theory probabilistic models of pragmatic reasoning Bayesian pragmatics evolutionary game theory and conceptual space models of categorisation *The Changing Firm* Associazione italiana per la storia del pensiero economico. Conference,Daniela Parisi Acquaviva,2005
