 Internet technology since the year 1995 new business models emerged and ultimately established the on line industry as a
 distinct economic environment The author defines this new marketplace as a multi layered industry consisting of five main
 layers network hosting software content and devices Each layer consists of sub layers Players from the converging industries
 telecommunications computer hardware software media and consumer electronics conduct on line business units offering a
 set of on line services S 17 Significance and growth of the on line industry are enormous The market for multimedia products
 and services represents approximately 10% of the US GOP already today The industry volume is expected to double every 12
 to 18 months The increasing relevance of the on line industry is driving the interest of academia in a theoretical foundation of
 the observed economic phenomena The term network economics establishes a new scientific area Due to the specific
 structure and logic of the industry traditional business concepts and strategy approaches can be translated only in a limited
 way At this point the work of Christian Götsch comes in play which by utilizing the theoretical concepts of network
 economics and game theory models the structure of the on line industry and delivers a methodic set of instruments to
