## **Healing In Religion And Society From Hippocrates To The Puritans:**

**Healing in Religion and Society, from Hippocrates to the Puritans** John Kevin Coyle, Steven C. Muir, 1999 The essays collected here explore social and religious dimensions of healing leaning heavily on the valuable insights that can be found in socio anthropological studies of healing and medicine in modern and ancient societies Teaching Religion and Healing Linda L. Barnes, Inés M. Talamantez, 2006-10-19 The study of medicine and healing traditions is well developed in the discipline of anthropology Most religious studies scholars however continue to assume that medicine and biomedicine are one and the same and that when religion and medicine are mentioned together the reference is necessarily either to faith healing or bioethics Scholars of religion also have tended to assume that religious healing refers to the practices of only a few groups such as Christian Scientists and pentecostals Most are now aware of the work of physicians who attempt to demonstrate positive health outcomes in relation to religious practice but few seem to realize the myriad ways in which healing pervades virtually all religious systems This volume is designed to help instructors incorporate discussion of healing into their courses and to encourage the development of courses focused on religion and healing It brings together essays by leading experts in a range of disciplines and addresses the role of healing in many different religious traditions and cultural communities An invaluable resource for faculty in anthropology religious studies American studies sociology and ethnic studies it also addresses the needs of educators training physicians health care professionals and chaplains particularly in relation to what is referred to as cultural competence the ability to work with multicultural and religiously diverse patient populations **The Blackwell Companion to The New Testament** David E. **Women Healing/Healing Women** Elaine Wainwright, 2017-10-03 Women Healing Healing Women begins with a search for women who were healers in the Graeco Roman world of the late Hellenistic and early Roman period Women healers were honoured in inscriptions and named by medical writers and were familiar enough to be stereotyped in plays and other writings What emerges by the first century of the Common Era is a world in which women functioned as healers but where healing becomes a contested site for gender relations By the time the gospels are written the place of women as healers is effectively erased The book uses the historical and cultural evidence to re read the gospel texts and discover healers in a woman pouring out ointment healed women bearing on their bodies the language describing Jesus and even in women

Deibert, 2017-01-30 How does Paul's bodily mortality both collapse his apostolic authority in Corinth and yet confirm his gospel Richard I Deibert explores the vital relationship between Paul's experience of death and his theology of death Back cover      **Frontiers of Faith** Jason David BeDuhn, Paul Allan Mirecki, 2007 Through a systematic analysis of the sources compositional structure and apologetic and polemical strategies of the early fourth century Acts of Archelaus Acta Archelai this volume explores inter religious contact conflict and comprehension in the encounter between Christianity and Manichaeism      Medicine and Health Care in Early Christianity Gary B. Ferngren, 2016-08 Drawing on New Testament studies and recent scholarship on the expansion of the Christian church Gary B Ferngren presents a comprehensive historical account of medicine and medical philanthropy in the first five centuries of the Christian era Ferngren first describes how early Christians understood disease He examines the relationship of early Christian medicine to the natural and supernatural modes of healing found in the Bible Despite biblical accounts of demonic possession and miraculous healing Ferngren argues that early Christians generally accepted naturalistic assumptions about disease and cared for the sick with medical knowledge gleaned from the Greeks and Romans Ferngren also explores the origins of medical philanthropy in the early Christian church Rather than viewing illness as punishment for sins early Christians believed that the sick deserved both medical assistance and compassion Even as they were being persecuted Christians cared for the sick within and outside of their community Their long experience in medical charity led to the creation of the first hospitals a singular Christian contribution to health care A succinct thoughtful well written and carefully argued assessment of Christian involvement with medical matters in the first five centuries of the common era It is to Ferngren's credit that he has opened questions and explored them so astutely This fine work looks forward as well as backward it invites fuller reflection of the many senses in which medicine and religion intersect and merits wide readership Journal of the American Medical Association In this superb work of historical and conceptual scholarship Ferngren unfolds for the reader a cultural milieu of healing practices during the early centuries of Christianity Perspectives on Science and Christian Faith Readable and widely researched an important book for mission studies and American Catholic movements the book posits the question of what can take its place in today's challenging religious culture Missiology An International Review Gary B

**Gratia Et Certamen** Donato Ogliaari, 2003 The issues involved in the discussion between the monks of Hadrumetum Marseille and Augustine range from questions of *initium fidei* and *naturae bonum* to the understanding of predestination The monks' reaction to Augustine's doctrine of absolute sovereign grace must be seen as a plea in favour of a harmonizing approach where human commitment is also envisaged as playing at times a primary role In the light of a dialogical synergism of a unitarian and cosmic view of God's *oeconomia salutis* and relying on a strong ascetic framework the monks' biggest fear was that the implications of Augustine's predestinarian view would jeopardise the importance of the struggle for perfection the meaning of God's universal salvific will of Christ's redeeming action and finally of the Church The different theological traditions to which Augustine and the monks appealed play also a significant role as do the specific social and religious context in which they respectively moved     **Fabrics of Discourse** Vernon Kay Robbins, David B.
