New Directions in Literature and Medicine Studies Stephanie M. Hilger, 2017-11-11 This book is situated in the field of medical humanities and the articles continue the

dialogue between the disciplines of literature and medicine that was initiated in the 1970s and has continued with ebbs and flows since then. Recently the need to renew that interdisciplinary dialogue between these two fields which are both concerned with the human condition has resurfaced in the face of institutional challenges such as shrinking resources and the disappearance of many spaces devoted to the exchange of ideas between humanists and scientists. This volume presents cutting edge research by scholars keen on not only maintaining but also enlivening that dialogue. They come from a variety of cultural, academic and disciplinary backgrounds and their essays are organized in four thematic clusters: pedagogy, the mind/body connection, alterity and medical practice.

Narrative & State of the Art Michael Bamberg, 2007-03-14. *Narrative State of the Art* which was originally published as a Special Issue of *Narrative Inquiry* 16:1 (2006) is edited by Michael Bamberg and contains 24 chapters with a brief introduction by the editor that look back and take stock of developments in narrative theorizing and empirical work with narratives. The attempt has been made to bring together researchers from different disciplines with very different concerns and have them express their conceptions of the current state of the art from their perspectives. Looking back and taking stock, this volume further attempts to begin to deliver answers to the questions: i) What was it that made the original turn to narrative so successful? ii) What has been accomplished over the last 40 years of narrative inquiry? iii) What are the future directions for narrative inquiry? The contributions to this volume are deliberately kept short so that the readers can browse through them and get a feel about the diversity of current narrative theorizing and emerging new trends in narrative research. It is the ultimate aim of this edited volume to stir up discussions and dialogue among narrative researchers across these disciplines and to widen and open up the territory of narrative inquiry to new and innovative work.

Health Humanities in Postgraduate Medical Education Allan D. Peterkin, Anna Skorzevska, 2018-07-27. Most medical schools in the US, Canada and UK now incorporate some form of arts and humanities based teaching into their curricula. What happens in residency is another story. Most postgraduate programs do not continue the thread of such teaching although many residents would like to deepen their understanding of the medical humanities before they move into practice. The humanities emphasize the human side of medicine and can provide a counterpoint to the reductionism of evidence based medicine and technological hubris for young doctors as they apply new knowledge and skills in ambiguous real life encounters with patients who are living with complicated health problems. Humanities based education can help both sides of the relationship: programs are shown to reduce burnout and mental health issues in young physicians and can also help learning practitioners grapple with the most difficult aspects of their craft: how does one persuade patients on a course of treatment while respecting informed consent? How does one work with families? How does one listen to and treat patients exhibiting self-harm tendencies? Available research may demonstrate the efficacy of such exposures but provide little practical advice or resources for setting up programs across specialty and sub-specialty disciplines. *Health Humanities in Postgraduate Medical Education* will fill this gap in knowledge translation for the thousands of residency programs worldwide.

Performing Emotions Peta Tait, 2017-07-05 In *Performing Emotions* Peta Tait's central argument is that performing emotions in realism is also performing gender identity This study integrates scholarship on realist drama theatre and approaches to acting with interdisciplinary theories of emotion phenomenology and gender theory With chapters devoted to masculinity and femininity specifically as well as to emotions generally it investigates social beliefs about emotions through Chekhov's four major plays in translation and English language commentaries on Constantin Stanislavski's direction of the play's first productions and his approaches to acting and Olga Knipper's acting of the central women characters Tait demonstrates how theatrical emotions are predicated on embodied social performances and create cultural spaces of emotions *Performing Emotions* investigates how sexual difference impacts on the representations of emotions The book develops an accumulative analysis of the meanings of emotions in twentieth century realist drama theatre and acting

Facing Death: Images, Insights, and Interventions Sandra L. Bertman, 2016-01-08 *Facing Death* is a unique handbook for educators healthcare professionals and counselors It uses materials from the visual arts excerpts from poetry fiction drama and examples from popular culture to sensitize the reader to important universal issues confronting the dying and those responsible for their care

Interpreting Chekhov's Prose Leonard A. Polakiewicz, 2024-08-06 The essays collected in this book constitute a new contribution to our understanding of the originality and significance of Chekhov's prose A close textual analysis of his work is provided and especially of previously neglected works some long overdue for in depth investigation that Chekhov himself rightfully considered to be masterpieces Analysis of both these and other previously analyzed works offers a new interpretation which contrasts with those offered by previous Chekhov scholars Works examined include those dealing with Chekhov's astonishingly accurate and artistic portrayal of a wide variety of illnesses without the use of any medical terms These works are shown to be not mere clinical studies but genuine impressive works of art The author who suffered half of his life from tuberculosis effectively portrayed many characters afflicted with this disease which was incurable at the time Many of these works reveal an indisputable symbiosis of the doctor and the artist Chekhov maintained that in Goethe the poet lived amicably side by side with the scientist a fitting description of him as well Doctors the most frequently portrayed characters in Chekhov's oeuvre are appropriately subjected to extensive analysis as are the themes of fate and death and dying that figure so prominently in Chekhov's work Attention is accorded to imaginative fictional works dealing with philosophy and the theme of crime and punishment as well as *The Island of Sakhalin* a narrative of non fictional sociological content
