## **Health And Efficiency A Sociology Of Health Economics:**

**Health and Efficiency** Malcolm Ashmore, Michael Joseph Mulkay, Trevor J. Pinch, 1989 **Handbook of Health Economics** A J. Culyer, J. P. Newhouse, 2000-07-19 The Handbook of Health Economics provide an up to date survey of the burgeoning literature in health economics As a relatively recent subdiscipline of economics health economics has been remarkably successful It has made or stimulated numerous contributions to various areas of the main discipline the theory of human capital the economics of insurance principal agent theory asymmetric information econometrics the theory of incomplete markets and the foundations of welfare economics among others Perhaps it has had an even greater effect outside the field of economics introducing terms such as opportunity cost elasticity the margin and the production function into medical parlance Indeed health economists are likely to be as heavily cited in the clinical as in the economics literature Partly because of the large share of public resources that health care commands in almost every developed country health policy is often a contentious and visible issue elections have sometimes turned on issues of health policy Showing the versatility of economic theory health economics and health economists have usually been part of policy debates despite the vast differences in medical care institutions across countries The publication of the first Handbook of Health Economics marks another step in the evolution of health economics *The Economics of Resource Allocation in Health Care* Andrea Klonschinski, 2016-03-31 The question of how to allocate scarce medical resources has become an important public policy issue in recent decades Cost utility analysis is the most commonly used method for determining the allocation of these resources but this book counters the argument that overcoming its inherent imbalances is simply a question of implementing methodological changes The Economics of Resource Allocation in Health Care represents the first comprehensive analysis of equity weighting in health care resource allocation that offers a fundamental critique of its basic framework It offers a critique of health economics putting the discourse on economic evaluation into its broader socio political context Such an approach broadens the debate on fairness in health economics and ties it in with deeper rooted problems in moral philosophy Ultimately this interdisciplinary study calls for the adoption of a fundamentally different paradigm to address the distribution of scarce medical resources This book will be of interest to policy makers health care professionals and post graduate students looking to broaden their understanding of the economics of the health care system **Health Economics Worldwide** Peter Zweifel, H. E. Frech, 1992 This volume contains a selection of outstanding papers presented at the second World Congress on health economics held in september 1990 It covers the topics that have gained eminence in the course of the last decade and are likely to preoccupy health policy makers for many years to come In health insurance a major challenge addressed is how to prevent cream skinning when both private and social insurers are allowed to compete for subscribers Another area of considerable progress is the measurement of health a crucial precondition for developing criteria for the allocation of resources in health care Important contributions deal with the disturbing question of whether rationing

of health care has occurred in accordance with stated medical criteria and objectives of social policy both in the U S and in European countries Finally progress in the comparative analysis of health care expenditure of industrial countries is documented by papers analysing the roles of the political process in democracies and the ageing of the population In all this book is essential for those who wish to be kept informed about the policy issues confronting health care systems worldwide

*Fiscal Sustainability of Health Systems Bridging Health and Finance Perspectives* OECD,2015-09-24 The health systems we enjoy today and expected medical advances in the future will be difficult to finance from public resources without major reforms Public health spending in OECD countries has grown rapidly over most of the last half century These spending increases have contributed to

**New Economics and Its History** John Bryan Davis,1997 The HOPE Supplement contains the proceedings of the History of Political Economy Conference held at Duke in April 1996 The conference and the volume are devoted to the history of economic thought of recent on going economics Traditionally historian

**Sociological Readings and Re-readings (1996)** Paul Atkinson,2018-05-08 Published in 1996 this book comprises a number of essays by Paul Atkinson in which he reflects on processes of reading and writing in the social sciences Topics covered include ethnographers confessions an analysis of the style of Erving Goffman a reflection of his own experiences of re reading work and a discussion of the challenges of reading an alien discipline This book was originally published as part of the Cardiff Papers in Qualitative Research series edited by Paul Atkinson Sara Delamont and Amanda Coffey The series publishes original sociological research that reflects the tradition of qualitative and ethnographic inquiry developed at Cardiff The series includes monographs reporting on empirical research edited collections focussing on particular themes and texts discussing methodological developments and issues

**Differences in Medicine** Marc Berg,Annemarie Mol,1998 Western medicine is widely thought of as a coherent and unified field in which beliefs definitions and judgments are shared This book debunks this myth with an interdisciplinary and intercultural collection of essays that reveals the significantly varied ways practitioners of conventional Western medicine handle bodies study test results configure statistics and converse with patients

**Healthcare Funding and Christian Ethics** Stephen Duckett,2023-01-26 A necessary book for healthcare professionals and theologians struggling with moral questions about rationing in healthcare This book outlines a Christian ethical basis for how decisions about health care funding and priority setting ought to be made

*Constructive Conversations About Health* Marshall Marinker,Fritjof Capra,2018-08-15 Current health policy is required to respond to a constantly changing social and political environment characterised particularly in Europe by ageing populations increased migration and growing inequalities in health and services With health systems under increasing strain there is a sense that we need to seek new means of determining health policy Much political debate focuses on managerial issues such as the levels of health funding and the setting and missing of targets Meanwhile our moral imperatives our values and principles go relatively unexamined What are these values Can we agree their validity and salience How do we manage the paradox of

competing goods Can we find new ways of talking about and resolving our conflicting values and competing priorities in order to create sound appropriate and just health policies for the 21st Century Written by leading health policy makers and academics from many countries Constructive Conversations about Health examines in depth the underlying values and principles of health policy and posits a more enlightened public and political discourse The book will be invaluable for those involved in health policy making and governance politicians healthcare managers researchers ethicists health and social affairs media health rights and patient participation groups The literature on health policy is vast On offer are models of health services economic theory management theory disquisitions on ethical principles social analyses literally thousands of publications In a globalised and electronically networked world this literature has already generated its own particular language a policy jargon replete with terms that look deceptively familiar terms that will be much in evidence in what now follows terms whose meanings require our closest attention Marshall Marinker      Professions and the Public Interest Mike Saks,2005-08-16 The importance and influence of professions in public life has grown increasingly over the twentieth century but the question of whether they subordinate their own self interests to the public interest has yet to be adequately researched within a major sociological perspective In Professions and the Public Interest Mike Saks develops a theoretical and methodological framework for assessing professional groups in Western society The empirical applicability of this framework is demonstrated with particular reference to a novel case study of the response of the medical profession to acupuncture in the nineteenth and twentieth centuries Professions and the Public Interest will be of great interest to all lecturers and students of social policy sociology and medical sociology as well as to professional groups and their members

**Medical Proofs, Social Experiments** Catherine Will,Tiago Moreira,2016-04-22 Clinical trials have become key technologies for decision making in the contemporary world Their results shape medical practice and determine priorities across health care systems but the work that goes into producing credible data is often hidden Medical Proofs Social Experiments draws upon detailed case studies to argue that to understand their value we need to pay more attention to the contexts for these modern medical experiments recovering the diverse ways in which they involve doctors patients and the public the local practices that contribute to their completion and the complex negotiation of their results in professional and statutory institutions Presenting research from the UK USA Sweden and The Netherlands the ethnographic perspective adopted by the authors provides a space to explore the investments of different state market professional and other actors in particular forms of evaluation and the ways in which trial methodologies may be re designed or re imagined to satisfy social and political expectations As such this volume will be of interest to those working in the fields of science and technology studies the sociology and anthropology of medicine and researchers of policy and organisation in health care

**Gerontology** Kevin Morgan,1992-01-01 excellent reading for both undergraduate and post graduate students studying gerontology a collection of articles which adds considerable depth to our current knowledge in what is loosely known as

gerontology Australian Journal on Ageing The book manages as the editor claims to examine a range of approaches methodologies and controversies within gerontology I find the book a good exponent of the breadth and strength of British gerontology Ageing and Society Most of the chapters of this thought provoking book deal with different aspects of ageing in the normal population but several have implications for care of people with dementia Journal of Dementia Care In recent years gerontology has both diversified and specialised to meet the complex challenge of an ageing society This book aims specifically to reflect these developments and includes expert contributions from the disciplines of geography economics sociology and social policy psychology and medicine Contributions have been selected not only to highlight topics of particular concern but also to illustrate the development and deployment of pragmatic responses The chapters address important issues in lifestyle health adult education ethnicity pensions policy development residential care and professional training Attention also focuses on debate within gerontology particularly in the areas of community care dementing illness and health economics

*Management Control Theory* A.J. Berry, J. Broadbent, D.T. Otley, 2019-05-23 First published in 1998 this volume of readings provides an overview of the development of the study of Management Control theory over the past 35 years The period encompasses the publication of a major and seminal text by Anthony and Dearden in 1965 which acted as a touchstone in defining the range and scope of management control systems This laid management control's foundations in accounting based mechanisms of control an element which has been seen as both a strength and a constraint A good deal of work has followed providing both a development of the tradition as well as a critique In this volume we attempt to provide a range of readings which will illustrate the variety of possibilities that are available to researchers scholars and practitioners in the area The readings illustrate the view that sees control as goal directed and integrative They go on to explore the idea of control as adaption consider its relationship with social structure and survey the effects of the interplay between the

organisation and the environment The essays included are not intended to lead the reader through a well ordered argument which concludes with a well reasoned view of how management control should be Instead it seeks to illustrate the many questions which have been posed but not answered and to open up agendas for future research **Shaping Technology /**

**Building Society** Wiebe E. Bijker, John Law, 1994-09-29 Building on the influential book The Social Construction of Technological Systems this volume carries forward the project of creating a theory of technological development and implementation that is strongly grounded in both sociology and history Technology is everywhere yet a theory of technology and its social dimension remains to be fully developed Building on the influential book The Social Construction of Technological Systems this volume carries forward the project of creating a theory of technological development and implementation that is strongly grounded in both sociology and history The 12 essays address the central question of how technologies become stabilized how they attain a final form and use that is generally accepted The essays are tied together by a general introduction part introductions and a theoretical conclusion The first part of the book examines and criticizes the idea that technologies have common life cycles three case studies cover the history of a successful but never produced British jet fighter the manipulation of patents by a French R two studies argue for a strong sociotechnology in which artifact and social context are viewed as a single seamless web while the third looks at the ways in which a social program is a technology **Concerned Markets** Susi Geiger, Debbie Harrison, Hans Kjellberg, Alexandre Mallard, 2014-11-28 When

political social technological and economic interests values and perspectives interact market order and performance become contentious issues of debate Such hot situations are becoming increasingly common and make for rich sites of research

**Participation Beyond the Ballot Box** Usman Khan, 2005-08-31 Participation Beyond the Ballot Box is a welcome addition to the literature on democracy and the role of civil society It demonstrates that new mechanisms being introduced in Western Europe can and do offer the potential to significantly strengthen the democratic process *Mental Health*
