The Cult and Science of Public Health Kevin Dew, 2012 In contemporary manifestations of public health rituals and events people are being increasingly united around what they hold in common their material being and humanity As a cult of humanity public health provides a moral force in society that replaces traditional religions in times of great diversity or heterogeneity of peoples activities and desires This is in contrast to public health s foundation in science particularly the science of epidemiology The rigid rules of scientific evidence used to determine the cause of illness and disease can work against the most vulnerable in society by putting sectors of the population such as underrepresented workers at a disadvantage This study focuses on this tension between traditional science and the changing vision articulated within public health and across many disciplines that calls for a collective response to uncontrolled capitalism and unremitting globalization and to the way in which health inequalities and their association with social inequalities provides a political rhetoric that calls for a new redistributive social programme Drawing on decades of research the author argues that public health is both a cult and a science of contemporary society

Ginter, 2013-03-05 A structured strategic management approach is what's needed to tackle the revolutionary change the health care system has been experiencing. Today, health care organizations have almost universally embraced the strategic perspective first developed in the business sector and now have developed strategic management processes that are uniquely their own. Health care leaders have found that strategic thinking, planning and managing strategic momentum are essential for coping with the dynamics of the health care industry. Strategic Management has become the single clearest manifestation of effective leadership of health care organizations. The 7th edition of this leading text has been revised and updated to include a greater focus on the global analysis of industry and competition and analysis of the internal environment. It provides guidance on strategic planning, analysis of the health services environment, both internal and external, and lessons on implementation. It also looks at organizational capability, sustainability, CSR and the sources of organizational inertia and competency traps. **Changing Perspectives on the Social Sciences in Ghana** Samuel Agyei-Mensah, Joseph Atsu Ayee, Abena D.
