## **Health Care In Canada During The Seventeenth And Eighteenth Centuries:**

Canadian Literature and Medicine Shane Neilson, 2023-09-08 Canadian Literature and Medicine breaks new ground by formulating a series of frameworks with which to read and interpret a national literature derived from the very fabric of that literature in this case Canadian literature is of particular interest because of its consideration of coloniality Indigeneity and coincident development alongside a nascent socialized medical system currently under threat from neoliberalism The first chapters of the book carefully track the development of Canada's socialized medical system as it manifests in the imaginations of the nation's poets and authors who depict care Reciprocal flows are investigated in which these poets and authors are quoted in policy documents The archive based methodology is sustained in subsequent chapters that rely upon a unique interdisciplinary mix of medical history philosophy of medicine medical policy theory inherent to the field of Canadian literature focusing in particular on the garrison mentality as a form of aesthetic protest and the feminist ethics of care and Indigenous ways of knowing

**Ireland and Medicine in the Seventeenth and Eighteenth Centuries** James Kelly, 2016-05-06 The story of early modern medicine with its extremes of scientific brilliance and barbaric practice has long held a fascination for scholars The great discoveries of Harvey and Jenner sit incongruously with the persistence of Galenic theory superstition and blood letting Yet despite continued research into the period as a whole most

work has focussed on the metropolitan centres of England Scotland and France ignoring the huge range of national and regional practice This collection aims to go some way to rectifying this situation providing an exploration of the changes and developments in medicine as practised in Ireland and by Irish physicians studying and working abroad during the seventeenth and eighteenth centuries Bringing together research undertaken into the neglected area of Irish medical and social history across a variety of disciplines including history of medicine Colonial Latin American history Irish and French history it builds upon ground breaking work recently published by several of the contributors thereby augmenting our understanding of the role of medicine within early modern Irish society and its broader scientific and intellectual networks By addressing fundamental issues that reach beyond the medical institutions the collection expands our understanding of Irish medicine and throws new light on medical practices and the broader cultural and social issues of early modern Ireland Europe and Latin America Taking a variety of approaches and sources ranging from the use of epistolary exchange to the study of medical receipt books legislative practice to belief in miracles local professionalization to international networks each essay offers a fascinating insight into a still largely neglected area Furthermore the collection argues for the importance of widening current research to consider the importance and impact of early Irish medical traditions networks and practices and their interaction with related issues such as politics gender economic demand and religious belief

*Bibliography of the History of Medicine*, 1993 Ask the Grey Sisters Elizabeth A. Iles, 1998-06-01 *Ask the Grey Sisters* Sault Ste Marie and the General Hospital 1898 1998 tells the story of the creation and one hundred year history of the Sault Ste Marie General Hospital At a time when Canada's healthcare system is at a crossroads and we are asked to make crucial decisions for its future it is intriguing and enlightening to look at

the colourful past of a typical community hospital Throughout the 1890s Sault Ste Marie was a town in search of a hospital Its glory days at the centre of the fur trade route were long gone and the Sault was in the process of becoming a modern industrial community Such a community needed a hospital as a centrepiece to attract investors and as a necessary social institution to care for the hundreds of workers who were flocking to town without family support The General Hospital was established in 1898 after the town committee charged with developing a hospital had been refused funding by both the federal and provincial governments In desperation the committee met with the provincial Inspector of Asylums and Prisons the only provincial official with hospitals in his mandate If you wish a hospital of which the work is serious and lasting he is reported to have advised them ask the Grey Sisters And so began a fruitful association between the community of Sault Ste Marie and two orders of Grey Sisters who have operated the hospital through its one hundred year history Based in part on the extensive archival collections of both orders of nuns this history includes material from the sisters Chronicles and their personal reminiscences The result is an intimate and detailed portrait of a community hospital placed in the context of an emerging provincial system of health care
