Textbook of Global Health of Women, Newborns, Children, and Adolescents Delan Devakumar, Jennifer Hall, Zeshan Qureshi, Joy Lawn, 2019 The aim of this book is to provide a summary of the current concepts and challenges in global maternal and child health in a format that appeals to students of the subject the general public and current practitioners in the field It also provides study exercises that may inform tutors on undergraduate and postgraduate courses **Persisting Undernutrition in India** Nira Ramachandran, 2014-04-21 The book revisits the causes of persisting under nutrition in India but moves away from the usual focus on women and children to a broader view of the entire population It estimates the economic losses resulting from ignoring under nutrition in the adult working population and questions the current narrow focus of nutrition interventions suggesting that a family based approach may provide quicker results and long term sustainability It compares the best and worst performing states in the country to glean learnings from both successes and failures and emphasizes the need to hand over the ownership of nutrition outcomes from the state to the community and family for more sustainable results The book is organized in three sections Part 1 details the nutrition status of the population regional variations in nutrition outcomes and government response in terms of interventions Part 2 reviews issues and concerns like gender discrimination poor child nutrition status ineffective implementation of government programmes in the field and the possible impacts of emerging issues like climate change Part 3 seeks solutions from both international and country experiences *Proceedings of the Xth International Scientific Congress in Fur Animal Production* P.F.
