Health Policy Research In South Asia Building Capacity For Reform:

Health Policy Research in South Asia Abdo Yazbeck, David H. Peters, 2003-01-01 South Asia is a region of contrasts with impressive technological achievements but also more than 40 percent of the world's poor. These contrasts are evident in the health sector which demonstrates large variations in health, nutrition and fertility outcomes. Health Policy Research in South Asia showcases some of the innovative qualitative and quantitative research methodologies being used in South Asia to provide empirical guidance for health sector reform and policy development. The four research areas presented are analysis of inequality, expenditure analysis, private sector analysis and consumer and provider perspectives. Salient themes emerge from the 12 health policy research activities reviewed and emphasize the importance of strengthening local capacity and building ownership. Governments can and should distribute subsidies in the health sector more efficiently and effectively. The private sector which dominates service delivery in most of South Asia requires a different set of public sector policy instruments. Informed consumers/citizens can and should play an important role in influencing health service delivery. Empirical research can and should provide policymakers with some of the tools needed to improve and monitor the performance of the sector. This book will be of interest to health sector policymakers and analysts, to academics and students in public health and health economics and to anyone with an interest in the impact of health policy on development.

Human Well-Being and Policy in South Asia Vijay Kumar Shrotryia, 2019-11-08 This book explores human well-being in South Asia from a policy dimension. It discusses the cultural history and diversity of the region in order to highlight major priority areas of public policy to improve people's quality of life. The huge gap between economic development and human development in areas such as education, health and income is a concern for policymakers, researchers and other stakeholders. The book helps develop a strong argument for a shift of focus of state's expenditures aimed at improving human well-being and assesses public policy initiatives from the perspectives of the stakeholders such as the state, the market, households, civil society as well as NGOs and agencies involved in this development mission. As such it is of great interest to scholars in the field of quality of life and well-being research and policymakers at national and international level.

Transforming Health Markets in Asia and Africa Gerald Bloom, 2013 There has been a dramatic spread of health markets in much of Asia and Africa over the past couple of decades. This has substantially increased the availability of health-related goods and services in all but the most remote localities but it has created problems with safety, efficiency and cost. This book documents the problems associated with unregulated health markets and presents innovative approaches that have emerged to address them.

The Sociology of South Asian Women's Health Sara Rizvi Jafree, 2020-08-06 This contributed volume is the first known collection of essays that brings together scholarly review, critiques and primary and secondary data to assess how sociocultural factors influence health behavior in South Asian women. The essays are authored by working scholars or healthcare practitioners from Bangladesh, India and Pakistan. In the chapters the contributors acknowledge social economic

and environmental factors to recommend improved interventions and health policy for women of the region Studies on South Asian women's health have targeted clinical evidence with less attention on social and environmental factors driving health recovery and health outcomes The South Asian region more than any other part of the world is driven by traditional and cultural forces that are possibly the most significant factors determining a woman's health awareness and her rights to adopt healthy behavior or pursue health recovery Women of the region share a common culture and political history and there are benefits to understanding their problems collectively in order to design joint improvements in health policy for women Salient but neglected socio-political areas that influence health behavior and health outcomes in women of the region are covered in the chapters including Oral Narrations of Social Rejection Suffered by South Asian Women with Irreversible Health Conditions Women's Role in Decision Making for Health Care in South Asia Poverty Health Coverage and Credit Opportunities for South Asian Women Refugee Displaced and Climate Affected Women of South Asia and Their Health Challenges The Political Sociology of South Asian Women's Health The Sociology of South Asian Women's Health is a useful resource for students researchers and academicians especially those interested in public health gender social policy and occupational management as well as healthcare practitioners administrators health and public policy makers government officers and scholars of South Asian studies
