A Short History of Economic Progress Y.S. Brennor, 2014-06-17 Y S Brenner is an economist whose main concern is with development and this attitude is reflected in his approach to economic history He begins this seminal study in the era of the Reformation in Europe and bases it on the hypothesis that once started economic progress will spread over ever increasing parts of the earth wherever and whenever conditions become suitable From this point of view he examines the nature of the impediments which prevent the more rapid and general progress of mankind towards greater material affluence while at the same time considering the positive growth promoting factors in the various economies Thus he provides an analysis of economic progress in the developed countries showing which natural social political and cultural forces promoted such progress and which delayed or hindered it He attempts to explain why European nations took several decades to emulate the achievements of Britain and why nations in other parts of the world such as Japan and Russia were unable for a considerable time to match the advances made in parts of Western Europe and the United States Finally he attempts to explain why the developing countries are still finding it so difficult to catch up with the economic progress of the more advanced nations Y S Brenner was Head of the Department of Economics at Cape Coast University in Ghana The book arose from a series of lectures on economic development he delivered there during the years 1966 1967 This book was first published in 1969

The Industrial Revolutions, Volume 1 J. Chartres, 1994-03-23 Britain in the sixteenth century appeared little different from its European neighbours and shared their renewed Malthusian pressures as population growth threatened the resource base of the economy Yet by the later seventeenth century Britain had broken the limits imposed by food production With the development of its trade transport

and industry and the effective integration of its economy as a whole the country was becoming by the later eighteenth century more urban and industrial than its neighbours and was rapidly overtaking the Netherlands as the least rural country in Europe This volume of key readings sets British development in its broad context and in presenting the strong evidence of the extent and nature of its economic advance in the seventeenth and early eighteenth centuries provides the critical background for the understanding of the late process of British industrialization *London in the Age of Industrialisation* L. D. Schwarz, 1992-10-29 Analyses the effects of the industrial revolution on London's working population *The Culture of Cities* Lewis Mumford, 2016-03-08 A classic work advocating ecological urban planning from a civic visionary and former architecture critic for the New Yorker Considered among the greatest works of Lewis Mumford a prolific historian sociologist philosopher of technology and longtime architecture critic for the New Yorker *The Culture of Cities* is a call for communal action to rebuild the urban world on a sounder human foundation First published in 1938 this radical investigation into the human environment is based on firsthand surveys of North American and European locales as well as extensive historical and technological research Mumford takes readers from the compact worker friendly streets of medieval hamlets to the symmetrical neoclassical avenues of Renaissance cities He studies the squalor of nineteenth century factory towns and speculates on the fate of the booming twentieth century Megalopolis whose impossible scale Mumford believes can only lead to its collapse into a Nekropolis a monstrosity of living death A civic visionary Mumford is credited with some of the earliest proposals for ecological urban planning and the appropriate use of technology to create balanced living environments In the final chapters of *The Culture of Cities* he outlines possible paths toward utopian future cities that could be free of the stressors of the Megalopolis in sync with the rhythms of daily life powered by clean energy integrated with agricultural regions and full of honest and comfortable housing for the working class The principles set forth by these visions once applied to Nazi occupied Europe's razed cities are still relevant today as technological advances and overpopulation change the nature of urban life **Eighteenth Century English Literature and Its Cultural Background** James Edward Tobin, 1967 *Population in History* D.E.C. Eversley, 2017-07-12 This large scale comparative endeavor complete in two volumes reflects increasing concern with the population factor in economic and social change worldwide Demographers on their side have been focusing on history In response to this *Population in History* represents the work of two practitioners that have begun to work together using their combined approaches in an attempt to assess and account for population growth experienced by the West since the seventeenth century There is a long record of interest in the history of population But the interest now displayed is likely to be both more persistent and far more fruitful in its consequences New studies have been initiated in many countries And because the studies are more informed and systematic than many of those of earlier periods they are already provoking the further spread of research A much more positive part is now also being played by national and international associations of historians and demographers It is not unlikely that within the next fifteen or twenty

years the main outlines of population change in the seventeenth and eighteenth centuries will be firmly established for much of Europe Previous research has tended to appear in specialist journals and academic publications This volume is intended to provide a more easily accessible publication It has been thought appropriate to include some earlier work both because of its intrinsic interest and because it provided the background and part of the stimulus to the later research Of the twenty seven contributions to this outstanding volume seven are unabridged reprints of earlier work the remaining contributions are either entirely new or represent substantial revisions of work published elsewhere

The Eighteenth-century British Novel and Its Background Henry George Hahn, Carl Behm, 1985 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com **The Eighteenth-Century Town** Peter Borsay, 2014-01-14 The eighteenth century represents a critical period in the transition of the English urban history as the town of the early modern era involved into that of the industrial revolution and since Britain was the first industrial nation this transformation is of more than national significance for all those interested in the history of towns This book gathers together in one volume some of the most interesting and important articles that have appeared in research journals to provide a rich variety of perspectives on urban development in the period

Medicine and Industrial Society John V. Pickstone, 1985 **The Journal of Education**, 1927 **Unfortunate Objects** T. Evans, 2005-10-11 This book analyzes how poor eighteenth century London women coped when they found themselves pregnant their survival networks and the consequences of bearing an illegitimate child It does so by exploring the encounters between poor women and the parish as well as London's lying in hospitals and the Foundling Hospital It suggests that unmarried mothers did not constitute a deviant minority within London's plebeian community In fact many could expect to find compassion rather than ostracism a response to their plight All poor mothers left without the support of their child's father shared similar strategies of survival and economies of makeshift

The Eugenics Review, 1928 **Decolonizing Science and Modernity in South Asia** Sahara Ahmed, Suvabrata Sarkar, 2024-09-19 This book offers a unique perspective on the colonial roots of modern science technology and medicine STM in South Asia The book questions the deconstruction of imperial visions and definitions of science and modernity in South Asia It presents an in depth analysis of the contested relationship between science modernity and colonialism It explores how new research can contribute to the diversification of perspectives in the history and sociology of modern South Asian studies The chapters in the book delve into various aspects of STM in South Asia It covers diverse topics including the social cultural and pedagogic context of early modern Bengal the popularization of science in colonial Punjab the Hindi science periodical Vigyan and the emergence of the Indian science community The book also examines the intersection of indigenous medical practices ayurveda Unani and medical revivalism and highlights peripheral creativity in science The contributors engage with the existing historiography to raise new questions concerning the global circulations of scientific knowledge from the perspective of South Asia and the regional appropriation of the same It connects the history of science and modernity with South Asia's socio economic and

cultural background It offers valuable insights into the decolonization of STM It greatly interests scholars and students of modern South Asian history sociology social anthropology and Science Technology and Society Studies STS **Medicine and Society in Wakefield and Huddersfield 1780-1870** Hilary Marland,1987-09-24 This ambitious book presents an across the board study of medicine in any urban centre for any period of British history By selecting Wakefield and Huddersfield as contrasting types of northern towns and examining in details their systems of medical care Dr Marland has written a local history that says something important about the country as a whole Wakefield and Huddersfield contrasted in their economic demographic and social development during the late eighteenth and early nineteenth centuries allowing an effective comparative analysis of medical facilities in the two communities By drawing on diverse sources from Poor Law and philanthropy to self help organisations fringe medicine and medical practice the book places the development of medical services against the backdrop of the communities in which they evolved their class structure organization and social civic and economic developments *From Belloc to Churchill* Victor Feske,2000-11-09 Linking historiography and political history Victor Feske addresses the changing role of national histories written in early twentieth century Britain by amateur scholars Hilaire Belloc Sidney and Beatrice Webb J L and Barbara Hammond G M Trevelyan and Winston Churchill These writers recast the nineteenth century interpretation of British history at a time when both the nature of historical writing and the fortunes of Liberalism had begun to change Before 1900 amateur historians writing for a wide public readership portrayed British history as a grand story of progress achieved through constitutional development This Whig interpretation had become the cornerstone of Liberal party politics But the decline of Liberalism as a political force after the turn of the century coupled with the rise of professional history written by academics and based on archival research inspired change among a new generation of Liberal historians The result was a refashioned Whig historiography stripped of overt connections to contemporary political Liberalism that attempted to preserve the general outlines of the traditional Whiggist narrative within the context of a broad history of consensus This new formulation says Feske was more suited to the intellectual and political climate of the twentieth century Originally published in 1996 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value
