**Records** James E. Demetriades,Robert M. Kolodner,Gary A. Christopherson,2006-12-22 Person Centered Health Records

Toward HealthPeople provides essential information on person centered healthcare systems that will serve individuals throughout their lifetime enabling a new approach to wellness that goes far beyond outpatient visits to the physician s office or hospitalizations These health systems represent a profound transformation from the present healthcare system because they will enable individuals to protect and promote their own personal health The center of the healthcare system will be

those individuals not the entities such as hospitals or physician groups And the circle will encompass the full range of activities that contribute to wellness and to fighting disease not just those services traditionally defined as healthcare The book consists of three important sections Section I addresses how the new person centered system will change the way individuals care for their own health giving them health records that accompany them throughout their lives across the full range of experiences that affect their health Section II lays out considerations involved in building new systems including the need to address human factors such as control and ownership and the difficulties involved in relearning and learning to function in changed workflow environments The third section focuses on approaches to transformation including focuses on delivering change open source health systems critical standards convergence and person centered systems now in place outside the United States Chapter highlights include Clinical Impact Human Factors Health Security and Privacy Critical Standards Convergence and much more To represent the book s depth and breadth the editors have brought together contributors from varied health care sectors in the United States and elsewhere public and private not for profit and for profit to explicate the concept of the electronic health record and to define the technological enablers that can make it a reality The editors describe the concept involved in transformation define the architectural issues and tools involved in building new person centered systems and describe the approaches that make it possible to integrate concept architecture and tools into person centered health systems Person Centered Health Records Toward HealthPeople is a must have for those with an interest in person centered health systems that can be built using the Web and Web based tools Both business and technical leaders will benefit from reading this book

**Advancing Federal Sector Health Care** Peter Ramsaroop, Marion J. Ball, David Beaulieu, Judith V. Douglas, 2013-11-11 As a result of severe wounds received in World War II I have spent many months in military hospitals including 20 months in an Army hospital immediately after the war I continue to use the Military Health System as do many of my colleagues in Congress because I firmly believe the quality of health care delivered in military and veterans hospitals is second to none The largest system of its type in the world the U S military healthcare system is undergoing changes as dramatic as those experienced by the entire country During Desert Storm we saw new technologies such as telemedicine at work in the field Since then military medicine has continued to improve and develop innovations that often focus on healthcare issues of concern to society as a whole We already have seen technology transfer at work Things we use in our everyday lives from sunscreen to the Internet have come to us directly from innovations developed by federal researchers The private sector working with the public agencies has creatively adapted federal research For example the hemopump is used successfully by heart surgeons world wide to save heart patients This device developed by Richard Wampler was based on satellite technology information that was declassified in the early 1980s The chapters in this book focus on current federal sector efforts to shape health care and technology transfer Many of the initiatives described involve some degree of partnering between the public and private sectors
