## Heat 9 Stardust:

The Long Heat Andreas Malm, Wim Carton, 2025-10-07 A scathing critique of proposals to geoengineer our way out of climate disaster by the bestselling authors of *Overshoot* The world is crossing the 1.5°C global warming limit perhaps exceeding 2°C soon after What is to be done when these boundaries set by the Paris Agreement have been passed In the overshoot era schemes proliferate for muscular adaptation or for new technologies to turn the heat down at a later date by removing CO<sub>2</sub> from the air or blocking sunlight Such technologies are by no means safe they come with immense risks and provide an excuse for those who would prefer to avoid limiting emissions in the present But do they also hold out some potential Can the catastrophe be reversed masked or simply adapted to once it is a fact Or will any such round about measures simply make things worse The Long Heat maps the new front lines in the struggle for a liveable planet and insists on the climate revolution long overdue In the end no technology can absolve us of responsibility for our planet and each other

*Frontiers in Physics - 2019 Editor's Choice* Alex Hansen, Thomas Beyer, Ewald Moser, Laura Elisa Marcucci, Ralf Metzler, Christian F. Klingenberg, James Sauls, José W. F. Valle, Jan De Boer, Dumitru Baleanu, Lorenzo Pavesi, Bretislav Friedrich, Christine Charles, Matjaž Perc, Jasper Van Der Gucht, 2020-05-19 Frontiers in Physics FPHY is now in its eighth year Up to last year the journal received a slowly increasing trickle of manuscripts and then during the summer Boom The number of manuscripts we receive started increasing exponentially This is of course a signal to us who are associated with the journal that we are on the right track to build a first rate journal spanning the entire field of physics And it is not the only signal We also see it in other indicators such as the number of views and downloads Impact Factor and the Cite Score Should we be surprised at this increase If I were to describe FPHY in one word it would be innovation Attaching the names of the reviewers that have endorsed publication permanently to the published paper is certainly in this class It ensures that the reviewers are accountable furthermore the level of transparency this implies ensures that any conflict of interest is detected at the very beginning of the process The review process itself is innovative After an initial review that proceeds traditionally the reviewers and authors enter a back and forth dialog that irones out any misunderstanding The reviewers retain their anonymity throughout the process The entire review process and any question concerning editorial decisions is fully in the hands of active scientists The Frontiers staff is not allowed to make any such decision They oversee the process and make sure that the manuscript and the process leading to publication or rejection upholds the standard FPHY is of course a gold open access journal This is the only scientific publication model that is compatible with the information revolution A journal's prestige is traditionally associated with how difficult it is to publish there Exclusivity as criterion for desirability is a mechanism we know very well from the consumer market However is this criterion appropriate for scientific publishing It is almost by definition not possible to predict the importance of a new idea otherwise it would not have been new So why should journals make decisions on publishing based on predicting the possible importance of a given work This can only be

properly assessed after publication Frontiers has removed importance from the list of criteria for publication That the work is new is another matter the work must be new and scientifically correct It would seem that removing the criterion of importance would be a risky one but it turns out not to be The Specialty Chief Editors who lead the 18 sections that constitute FPHY have made this selection of papers published in FPHY in 2019 We have chosen the papers that we have found most striking Even though this is far from a random selection they do give a good idea of what FPHY is about Enjoy We certainly did while making this selection Professor Alex Hansen Field Chief Editor **NASA Technical Paper** ,2006
