## **Heads You Lose:**

Heads You Lose Lisa Lutz, David Hayward, 2011-04-05 Dave I just finished the first chapter of a new novel a real crime novel with a dead body and all and I thought of you Paul and Lacey Hansen are pot growing twentysomething siblings sharing a modest ramblar of a home in rural Northern California When they find a headless corpse on their property they can't exactly call 911 so they simply move the body to another location Let somebody else find it Instead the corpse reappears on their land Clearly someone is sending them a message and it's getting riper by the day But that's only half of the story Enter authors Lisa Lutz and David Hayward former real life partners professionally and personally who have agreed to reunite for a tag team mystery novel written in alternating chapters One little problem they disagree on pretty much every detail of how their novel should unfold While the body count rises in Paul and Lacey's wildly unpredictable fictional world so too does the intensity of Lisa and David's rivalry The result is a literary brawl like no other and a murder mystery every bit as unanticipated and bloody

**Retirementology** Gregory Salsbury, 2010-04-25 Bonus content What's Your Retirementology I Q included in this digital edition Looking ahead to retirement Depending on your circumstances and your age you may no longer have any margin for error And your emotions and irrational behavior could be perpetuating a dangerous cycle of overspending and rising debt that may shatter whatever vision of retirement you still have Welcome to the world of Retirementology Retirementology bridges retirement planning with investor psychology and the market Meltdown of 2008 to produce an entirely new way of thinking about how we spend how we save how we borrow and how we invest Financial mistakes are deeply rooted in human nature but you may be able to overcome them if you understand the breakthrough principles of behavioral economics and apply them in your own retirement planning Dr Gregory Salsbury identifies some of the classic cognitive biases and behavioral mistakes most of us keep making when it comes to retirement planning For example Why will people drive 45 minutes to use a 2.00 coupon Why won't people sell a poor performing stock just because they inherited it from grandma Why do people spend differently with a credit card than they do with cash Why do people believe that they paid no income taxes because they received a refund You'll learn why the financial meltdown has amplified the impact of these all too human cognitive mistakes and discover ideas for addressing them The bottom line for your bottom line is that retirement can no longer be ignored viewed as a single event relegated to a zone or romanticized Instead you must understand how every spending and financial decision you make from here on can impact the way you will spend your golden years Retirementology attempts to help you do just that Retirement planning right brain versus left brain Why these different areas of the brain impact financial decisions and what to do about it It's real money De layering your finances How to overcome the psychological tricks that separate you from your money Family matters managing financial support decisions for your extended family Choosing between your family or your retirement Get long term smart How

longevity inflation volatility and your own expectations impact your retirement goals      *The Psychology of Suicide: From Research Understandings to Intervention and Treatment* Yossi Levi-Belz, Yari Gvion, Alan Apter, 2019-07-11 Suicide is a highly complex and multifaceted phenomenon with many contributing and facilitating factors and variables. However, given its being one of the most severe human behaviors, an obvious focus would be to identify the underlying psychological mechanisms and processes that may lead to suicidal ideation and behavior. This eBook is dedicated to studies exploring various approaches to the psychology of suicidal behavior as well as of non-suicidal self-injury (NSSI). The purpose of this eBook is to shed light on in-depth examinations of the current knowledge and empirical data regarding models, theories, and specific dimensions and variables that may help us increase the psychological understanding of suicidal phenomena. The specific goal is to identify particular psychological characteristics that may be used to develop prevention and intervention methods and programs. We believe that this eBook can contribute to the understanding of this behavior and help to develop specific tools, therapeutic guidelines, and programs that may help reduce the number of suicides occurring annually. This eBook is dedicated to our dearest friend Dafni Assaf, who was one of the greatest leaders of the suicide prevention program in Israel.      *Heads You Lose* Lisa and Hayward Lutz (David), 2011      **Heads Or Tails** Peter Corrigan, 2012 Are you fed up of not reaching your goals or achieving what you set out to do? Just wait until they're a teenager. Many parents of newborns

have heard this warning about the stressful phase that's to come. But what if it doesn't have to be that way? Child development expert Ellen Galinsky challenges widely held assumptions about adolescents and offers new ways for parents and others to better understand and interact with them in a way that helps them thrive. By combining the latest research on cognitive neuroscience with an unprecedented and extensive set of studies of young people nine through nineteen and their families, Galinsky reveals among other things that adolescents don't want to separate completely from their parents but seek a different type of relationship that they want to be helpers rather than be helped and that social media can become a positive influence for teens. Galinsky's Shared Solutions framework and Possibilities Mindset show you how to turn daily conflicts into opportunities for problem solving where both teens and parents feel listened to and respected, how to encourage positive risk taking in your child like standing up for themselves, making new friends and helping their communities, and how to promote five essential executive function based skills that can help them succeed now and in the future. *The Breakthrough Years* recasts adolescence as a time of possibility for teens and adults offering breakthrough opportunities for connection.

**SHIFT Commercial** Jay Papasan, Buddy Norman, 2023-12-05 Real estate shifts are easier to recognize than they are to acknowledge. One day job growth is beginning to stall and seemingly overnight vacancies are on the rise. Tenants start asking to downsize. Commercial property valuations level off. Negative news stories feed the worries of buyers and tenants. New development halts. Fear creeps in. Then the market that was quietly losing ground goes into full retreat as tenant delinquencies turn into owner delinquencies and lenders sever lines of credit. Rents go into a free fall as owners scavenge for income to offset a rising tide of red ink. Deals unravel. Buyers and tenants hunker down to wait for a steal. Bankruptcies mount. Eventually big commercial real estate owners start selling their companies or simply close their doors. Credit freezes up. Banks begin to shut down. Sound familiar? If you've been in the business for any length of time, it should. **SHIFT Commercial** provides proven models, tactics and insights from top commercial brokers who are thriving in this market, including: Find the Motivated Lead, Generation Get to the Table, Lead Capture and Conversion, Catch People in Your Web, Internet Lead Conversion, Expand the Options, Creative Financing, Master the Market of the Moment, Identify and Establish Needed Expertise, and so much more. Real solutions for real agents in commercial real estate.

**Causes, Laws, and Free Will** Kadri Vihvelin, 2013-05-06 Common sense tells us that we are morally responsible for our actions only if we have free will and that we have free will only if we are able to choose among alternative actions. Common sense tells us that we do have free will and are morally responsible for many of the things we do. Common sense also tells us that we are objects in the natural world governed by its laws. Nevertheless, many contemporary philosophers deny that we have free will or that free will is a necessary prerequisite for moral responsibility. Some hold that we are morally responsible only if we are somehow exempt from the laws of nature. **Causes, Laws, and Free Will** defends a thesis that has almost disappeared from the contemporary philosophical landscape by arguing that this philosophical flight from common sense is a mistake. We have free will even if

everything we do is predictable given the laws of nature and the past and we are morally responsible whatever the laws of nature turn out to be The impulses that tempt us into thinking that determinism robs us of free will spring from mistakes about the metaphysics of causation mistakes about the nature of laws and mistakes about the logic of counterfactuals

**Thinking and Deciding** Jonathan Baron, 2023-08-10 The fifth edition of the classic text *Thinking and Deciding* updates the broad overview of the field of judgments and decisions offered in previous editions It covers the normative standards used to evaluate conclusions such as logic probability and various forms of utility theory It explains descriptive accounts of departures from these standards largely in terms of principles of cognitive psychology emphasizing the distinction between search processes and inferences Chapters cover decisions under risk decision analysis moral decisions and social dilemmas and decisions about the future Although the book assumes no particular prerequisites beyond introductory high school algebra it is most suited to advanced undergraduates early graduate students and active researchers in related fields such as business politics law medicine economics and philosophy
