The Power of the Media in Health Communication Valentina Marinescu, Bianca

Mitu, 2016-04-20 Health is a contested concept that has been defined in numerous ways The media is extremely powerful in promoting health beliefs and in creating role models for contemporary people The ways in which health is defined or understood can have wide ranging implications and can have an impact on issues such as health promotion or health literacy Health presentation in the media has a significant social impact because this type of message is important in changing people's beliefs attitudes and behaviours relating to health and in promoting health related knowledge among the target audience The present volume provides an interdisciplinary and multicultural contemporary approach to the controversial link between medicine and media The authors that have contributed to this volume analyse the media and medicine from different perspectives and different countries USA UK Portugal Turkey Taiwan Mexico Estonia Romania thus offering a re positioning of the study of media and medicine The new perspectives offered by this volume will be of interest to any health communication or media studies student or academic since they bring to light new ideas new methodologies and new results

An Introduction to the Geography of Health Helen Hazen, Peter Anthamatten, 2012-05-23 Health issues such as the emergence of infectious diseases the potential influence of global warming on human health and the escalating strain of increasing longevity and chronic conditions on healthcare systems are of growing importance in an increasingly peopled and interconnected world A geographic approach to the study of health offers a critical perspective to these issues considering how changing relationships between people and their environments influence human health An Introduction to the Geography of Health provides an accessible introduction to this rapidly growing field covering theoretical and methodological background The text is divided into three sections which consider distinct approaches and techniques related

to health geographies Section one introduces ecological approaches with a focus on how natural and built environments affect human health For instance how have irrigation projects influenced the spread of water borne diseases How can modern healthcare settings such as hospitals affect the spread and evolution of pathogens Section two discusses social aspects of health and healthcare considering health as not merely a biological interaction between a pathogen and human host but as a process that is situated among social factors which ultimately drive who suffers from what and where disease occurs Section three then considers spatial techniques and approaches to exploring health giving special focus to the growing role of cartography and geographic information systems GIS in the study of health This clearly written text contains a range of pedagogical features including a wealth of global case studies discussion questions and suggestions for further reading at the end of each chapter a colour plate section and over eighty diagrams and figures The accompanying website also provides presentations exercises further resources and tables and figures This book is an essential introductory text for undergraduate students studying Geography Health and Social Studies Poverty, Community and Health V.

Cattell,2011-10-27 If we are becoming increasingly disconnected from our local communities are there implications for health well being and happiness particularly for people on low incomes This book looks at the interplay between poor people poor communities and poor health with a particular focus on social networks as key linkages *Distribution of Resources in the Nigerian Health Care System* Anthony Okechukwu Nnadi,2020-01-09 This publication representing the doctoral dissertation of Rev Fr Anthony Okechukwu Nnadi examines the healthcare system in Nigeria in the light of the Catholic social teaching He supports that the allocation of health care resources is not only a matter of organization but is also an ethical problem The debacles and failure of the Nigerian health system result from many factors including lack of will to implement the right policies on the ground corruption among the leaders lack of justice lack of respect for the dignity of each human person mismanagement and insufficient consideration and application of ethical principles in the administration of common good especially in the distribution of health care and social resources For the distribution of health care resources this doctoral dissertation suggests that priority be given to the basic health care needs of Nigerian citizens especially those who have no means of satisfying these needs themselves In this context the research affirms that great attention needs to be paid to ensuring that the principle of human dignity is completely respected in each and every policy in this important area This doctoral thesis is an ethical vision of social reality in Nigeria It proposes the person centred Catholic principles as a possible way forward in the distribution of health care resources in Nigeria It does not imply substituting the economic political and health care experts in offering technical solutions in their areas of competence The author is convinced that healthcare allocation is also an ethical issue that needs to be governed by ethical principles The key factors for choosing this theme are based on the author s knowledge of the deplorable condition of the health care system in Nigeria and his desire to save human lives Rev Fr Anthony Okechukwu Nnadi believes that we are all stewards of human life This implies a moral

obligation to protect the dignity of the human person which is inseparable from protecting human life *Regional Mortality Differences in Germany* Eva U.B. Kibele,2012-10-01 Regional mortality differences are one dimension of health inequalities but its trends and determinants in Germany are widely unknown This book examines and illustrates patterns of regional mortality in Germany with focus on small area differentials and their changes over time It identifies explanatory factors at individual and regional level Mortality differences between eastern and western Germany exist but small area mortality differentials are often greater Though the main spatial mortality patterns remain this study provides evidence that some distinct changes in the small area mortality patterns in Germany especially among women occurred within a short period of time Mortality inequalities at younger ages and in behavior related causes as well as differences in socioeconomic conditions contribute strongly to regional mortality differences in Germany The book shows that the complex interplay between individual and regional level mortality risk factors requires a multidimensional approach to reduce regional mortality inequalities *Mental Health Interventions and Services for Vulnerable Children and Young People* Panos Vostanis,2007 This book provides a model which offers guidance on effective and appropriate therapeutic interventions and services for vulnerable children and young people the book enables professionals working with vulnerable children to choose the right intervention for each individual child *A Dictionary of Human Geography* Noel Castree,Alisdair Rogers,Rob Kitchin,2013-04-25 This new dictionary provides over 2 000 clear and concise entries on human geography covering basic terms and concepts as well as biographies organisations and major periods and schools Authoritative and accessible this is a must have for every student of human geography as well as for professionals and interested members of the public

Mental Health and Wellbeing in the Anthropocene Jamie McPhie,2019-01-22 This book makes the unorthodox claim that there is no such thing as mental health It also deglamourises nature based psychotherapies deconstructs therapeutic landscapes and redefines mental health and wellbeing as an ecological process distributed in the environment rather than a psychological manifestation trapped within the mind of a human subject Traditional and contemporary philosophies are merged with new science of the mind as each chapter progressively examples a posthuman account of mental health as physically dispersed amongst things emoji photos tattoos graffiti cities mountains in this precarious time labelled the Anthropocene Utilising experimental walks play scripts and creative research techniques this book disrupts traditional notions of the subjective self resulting in an Extended Body Hypothesis a pathway for alternative narratives of human environment relations to flourish more ethically This transdisciplinary inquiry will appeal to anyone interested in non classificatory accounts of mental health particularly concerning areas of social and environmental equity post nature

Migration, Health and Ethnicity in the Modern World C. Cox,H. Marland,2013-10-29 The volume focuses on the relationship between migration health and illness in a global context from c 1820 to the present day It takes a wide range of finely grained case studies to examine epidemic disease and its containment chronic illness and mental breakdown and the

health management of migrant populations in the modern world **The Sage Handbook of Health Psychology** Katherine Brown, Cecilia Cheng, Martin Hagger, Kyra Hamilton, Stephen R Sutton, 2025-06-28 The Sage Handbook of Health Psychology 2e Volume Two Applications of Health Psychology covers the practical applications of health psychology addressing intervention development health improvement strategies mental health and wellbeing health protection and the integration of health psychology into policy and professional practice With contributions from leading experts this is an indispensable resource for those looking to apply health psychology principles to real world challenges This Handbook is a must read for postgraduate students researchers and practitioners aiming to improve health and wellbeing outcomes through evidence based practices Section One Issues and Debates in Health Psychology Section Two Intervention Development Approaches Section Three Health Improvement Interventions and Preventive Behaviors Section Four Improving Mental Health and Wellbeing Section Five Health Protection Interventions and Long term Conditions Section Six Health Psychology in Practice

Geography of Health Swati Rajput, 2024-01-01 This book is an attempt to understand the basics of health in geographical perspective The book is based on the curriculum of CBCS LOCF and NEP UGCF of geography of various universities in India The subject is also taught in many foreign universities outside India as a part of their curriculum and research The book explains in detail the concept of health and wellbeing Health geography has its crux in spatial distribution of various geographical phenomena influencing multiple aspects of human health The book thus discusses the aetiology of human health It also elaborates on human development processes and their impact on environment and human health The book tries to put forth the spatial epidemiology of communicable and non communicable diseases in India and the world based on authentic published sources of national and international organizations The book devotes one full chapter on types of mental health and their prevalence in the world based on authentic sources of information The last chapter of the book talks about Global Health Organizations and agencies It also discusses Healthcare system in India its merits and drawbacks The geographical variations generate complexity in understanding cause and effect relationship between environment and human health The book thus is organized in a simplified way and tries to structure the complex aspects for the readers I hope readers get benefitted from the book and get encouraged working on one of the most dynamic and extremely relevant theme of Geography of Health

HIV/AIDS in Bangladesh Alak Paul, 2020-10-13 This book aims to show the conditions and behaviors of vulnerable and marginalized people in Bangladesh which put them at risk of HIV AIDS infection and what their adopted coping strategies are and how these play out In addition the book seeks to gain an understanding of the perceptions of civil society and policy planners with respect to vulnerability to HIV and the necessary mitigation measures While there is much published literature on the epidemiology and etiology for the most at risk groups in the region there has not yet been any in depth research concerning the socio cultural and geographic impacts of HIV issues in Bangladesh Almost all of the literature shows HIV as an epidemiological problem rather than investigating it from a social or cultural point of view and

still less using qualitative methods The present work is an endeavor to fill these gaps by providing valuable qualitative field data to demonstrate the causes of HIV risk and vulnerability and to examine the nature of the social and locational context of HIV AIDS in Bangladesh and to assist with health care policy planning The book will be of use to students and researchers studying public health health geography medical sociology medical anthropology social psychology and social epidemiology and to professionals in the fields of development community medicine health management and social policy

Geographies of Peace and Armed Conflict Audrey Kobayashi, 2013-09-13 This collection addresses the impact of armed conflict and explores pathways to peace across the world Topics range from geopolitics to the effects of armed conflict on the environment resources health children and transnational migration Others explore the social processes involved in post conflict situations and others still the lessons for achieving effective peace The geographical concepts addressed include the notion of conflict space landscapes of terror the relationship between violence and justice the conditions for peace and the dynamics of post conflict Methods include landscape analysis interviews with a range of citizens mapping and geographic information science and policy analysis Several papers address the situation of children in conflict zones the impact of conflict on patterns of migration the role of gender in achieving peace the concept of territory as a basis for conflict and for negotiation of peace as well as the economic impact of conflict The studies cover several world regions including Africa the Middle East South and Southeast Asia and eastern Europe This book was originally published as a special issue of Annals of the Association of American Geographers

Therapeutic Landscapes Allison Williams, 2017-05-15 The therapeutic landscape concept first introduced early in the 1990s has been widely employed in health medical geography and gaining momentum in various health related disciplines This is the first book published in several years and provides an introduction to the concept and its applications Written by health medical geographers and anthropologists it addresses contemporary applications in the natural and built environments for special populations such as substance abusers and in health care sites a new and evolving area and provides an array of critiques or contestations of the concept and its various applications The conclusion of the work provides a critical evaluation of the development and progress of the concept to date signposting the likely avenues for future investigation

Wellbeing and Place Sara Fuller, 2016-02-24 The last twenty years have witnessed an important movement in the aspirations of public policy beyond meeting merely material goals towards a range of outcomes captured through the use of the term wellbeing Nonetheless the concept of wellbeing is itself ill defined a term used in multiple different contexts with different meanings and policy implications Bringing together a range of perspectives this volume examines the intersections of wellbeing and place including immediate applied policy concerns as well as more critical academic engagements Conceptualisations of place context and settings have come under critical examination and more nuanced and varied understandings are drawn out from both academic and policy related research Whilst quantitative and some policy approaches treat place as a static backdrop or context others explore the interrelationships of emotional

social cultural and experiential meanings that are both shape place and are shaped in place Similarly wellbeing may be understood as a relatively stable and measurable entity or as a more situation dependent and relational effect The book is structured into two sections essays that explore the dynamics that determine wellbeing in relation to place and essays that explore contested understandings of wellbeing both empirically and theoretically
