Mental Health in the Time of Coronavirus (COVID-19) Ursula Werneke, Dinesh Kumar Bhugra, Bernd Löwe, Christina Maria Van Der Feltz-Cornelis, Antonio Ventriglio, 2022-03-14 **Cognitive and Mental Health Improvement Under- and Post-COVID-19** Chong Chen, Gabriele Nibbio, Yuka Kotozaki, 2025-03-19 An increasing body of research suggests that the COVID 19 pandemic has worsened global mental health and caused more cognitive impairments Whereas the COVID 19 pandemic is still ongoing in some regions it is expected to be ending for most regions in the very near future From a psychological psychiatric and public mental health perspective it is of vital importance to conduct effective and efficient interventions to promote cognitive and mental health for they not only are essential for us to cope with the ongoing pandemic but also necessary for us to rebuild a better world post the pandemic Not to say that a healthy cognitive and mental health state is at the core of human wellbeing and deserves its own place From previous studies and everyday practices we already know that regular exercise appropriate sleep nutritious diet close social ties connection with nature mindfulness among others help improve cognition and boost mental health However the optimal regimen for each specific cognitive and mental health outcome for a specific population including both those of healthy and clinical is unclear and remain to be identified Furthermore the underlying psychological physiological and neurobiological mechanisms through which each activity or

intervention improves cognition and promotes mental health are to be clarified The aim of this Research Topic is to publish a wide range of studies that help address these unsolved issues and advance our understanding of what activities and interventions help improve cognition and promote mental health Any topics relevant to cognitive functions academic or work performance affective wellbeing and mental health are welcome Both studies of acute and chronic regular effects are welcome The subjects can be healthy human volunteers clinical patients or animals of different ages and sexes Article types include but are not limited to original research brief research reports clinical trials reviews meta analyses hypothesis and theory articles For original research and brief research reports the design can be cross sectional longitudinal or

interventional as long as they provide insights into cognitive and mental health promotion **Rhizosphere Microbiology:**
